INAUGURAL ADDRESS

OF

Hon. George Rogers

MAYOR OF NEW BEDFORD

MASSACHUSETTS

TO

CITY COUNCIL

JANUARY 5, 1970

Reverend Clergy, Secretary of State John Davoren, Commissioner of Education, Neil Sullivan, City Clerk, Ellen Gaughan, School Committee Members, Members of the City Council, parents, friends, relatives of those being sworn in, members of the faculty and friends:

I know New Bedford looks ahead with great anticipation to the New Year and the New Decade now unfolding before us. It's a warm feeling I share with all of you, for the City has massive problems to solve, but I know New Bedford also has the skills and the resources to meet almost any challenge — in housing, in education, in industry, in recreation, on the waterfront, and, most of all, in giving rebirth to the philosophy that City Hall is the seat of your government, and not the personal sanctuary of the people who occupy that overcrowded building.

Yes, the new administration is going to be one of light, not of darkness, and one in which the exchange of information will contrast sharply with the crafty maneuvering that has overshadowed our City Hall for the last few years.

No change comes easily and neither will this one. We have just witnessed the death of a municipal administration which, in its final moments passed out some important appointments, attempting thereby to create municipal policy for years to come. The effort will die aborning. I am taking steps to restructure or change those boards and authorities which the former mayor treated with such contempt, like watered livestock foisted on an unsuspecting public.

I am sure we were all amused when the former mayor challenged a remark I made about the number of positions he tried to fill. Does anyone seriously doubt that it was the former mayor's intention to create jobs for all his cronies, whether or not they had earned the right to continue serving the public in the new administration?

The public supported me in overwhelming numbers in November because voters wanted a change in policies — not more of the shallow shuffling that has cast a disturbing shadow over City Hall. That shadow will not hover there long.

During the campaign I pledged several times to institute a thorough review of the city's overall status, to determine its fiscal position, personnel practices and policies, property assessments and abatements, interdepartmental relationships and how these all are tied to the Mayor's Office.

Such an inquiry already has begun. As a consequence of some preliminary findings, the first major change in the new administration will be the introduction of periodic departmental meetings, probably every week, so that each department will be aware of what the others are doing. We want to coordinate some of these efforts, and hope to save valuable tax dollars in the process.

Tax dollars will receive attention from the new administration in another way. I shall institute a review of property abatements over the last ten years to determine if the abatements granted were valid then, and if they are still valid today. We must have equitable property taxation so that we all bear a fair share of the tax burden. I look with great disfavor on granting unjustified tax abatements to those who have friends in City Hall.

Last week the outgoing administration presented a rosy picture of its stewardship. Not a wrinkle showed; all the warts were covered. The city has never been in better financial condition, according to our former Mayor. And yet we recall how often he warned during the last year that cities were in danger of going bankrupt. I don't know which statement to believe. This, also, will have to be reviewed.

No longer will the city be administered on a piecemeal basis. Too many present city officials have complained about the right hand not knowing what the left hand was doing for this practice to continue. As part of these changes, I am preparing a weekly progress checklist. . . . department heads will be required, where such information is pertinent, to provide information about their personnel status, what projects have been scheduled for the week, the number of men required for the work order, and what progress is being made on public projects.

I know how disappointed we all were during the past few years when one department or another reported it could not collect garbage or trash, or clean the streets of snow because equipment was being repaired, or out of order, or on some assignment from which it could not be removed to meet an emergency.

The city garage will be required to provide weekly reports on the equipment it has under repair, when the necessary work will be completed and the approximate cost involved. Taxpayers have the right to expect that municipal services for which they are being taxed will be performed.

I see no reason to continue the practice of having one department collect burnables and another nonburnables. Logic dictates that a single department, the Department of Public Works, should perform this task. It has the equipment, the manpower and the know-how to repair streets and sidewalks and to keep the city free of garbage and trash by carrying such items to the city dump for disposal and then supervising the maintenance to operate the city incinerator.

The Health Department has enough of an assignment keeping our citizenry healthy . . . and it shall be given a thorough review of its policies and practices.

These are matters of municipal housekeeping.

On another level, I have asked the Law Department to look into the feasibility of restructuring some of the Municipal departments, possibly combining some of their functions. I want to review with the people involved, for instance, whether it is advisable to retain the Park Department and the Recreation Department separately, or whether I can initiate action to improve cooperation and the sharing of facilities between the two departments. The city must provide the maximum use of its parks and playground facilities in all sections of New Bedford.

A more immediate goal, however, is the creation of a Department of Veterans Affairs. I shall propose that the City Council approve the formation of such a department, to be headed by a Commissioner and two Deputy Commissioners — one responsible for Veterans Benefits and the other for Veterans Services. We owe our veterans the best services the City, State and National Governments can offer.

Thus, the new administration will examine the operation of each department and will revise and strengthen those which need change after consultation with experts.

Within the next few days a new organization I have formed will meet for the first time, and this is the Mayor's Council of Economic and Industrial Advisors. It will not have a fixed and permanent membership, but certain city departments and public goals and philosophies will be represented at all the meetings of the council so that a true cross section of the city will be heard. I want to combine the views of men who can contribute practical and expert knowledge with the desires of New Bedford citizens who do not have an official capacity in the city administration.

The Council will include representatives of various City Departments and Agencies. I have in mind such dedicated public servants as the City Auditor, the Execu-

tive Director of the Redevelopment Authority, a member of the School Committee, Planning Department, Housing Authority, Division of Employment Security, Director of Vocational Education and various private citizens who have expressed an interest in the Council.

These people are aware of Aesop's Challenge that "it is easy to be brave from a safe distance," and are willing to devote their talents for the public weal.

The administration wants to see in which direction the city is heading, to chart its course more precisely, and to establish new priorities for capital improvements, and otherwise determine if the city is making full use of local, state and federal funds. I am not convinced we are doing so — particularly in such areas as housing, job training, vocational education and recreation.

Let's focus on vocational education for a few moments, a subject which the Standard-Times has repeatedly cited in its Platform for Progress as one of the greatest needs confronting New Bedford. The history of vocational education is one of achievement and measurable success despite obstacles to growth never experienced by the city's other public schools. Along with great accomplishments, Voke also has recorded a history of frustration and deprivation for too many of our young people.

This deprivation is reflected in federal expenditures of \$4 for Remedial Vocational Education for every \$1 spent for Preventative Vocational Education. Had this ratio been reversed years ago by the government, we would today have little need for the various and competing agencies associated with manpower training and retraining.

Vocational education in New Bedford was launched in a building in 1908 on North Water and Elm Streets, but has been moved repeatedly because of growth, and even a fire, to its present location on Hillman Street in what was

then the Old City Yard. Indeed, the present Academic Department at Voke is housed in a former city stable.

Clearly, the Directors of Voke and their staff have been dedicated and able men. This is reflected in the well-adjusted and occupationally competent citizens they have produced for our community. However, the time has come to put an end to this patchwork growth. We must consider the alternatives of adding to the present ancient structure, or designing a new, modern, efficient plant. I have chosen the latter.

Future students of New Bedford High School will be attending a complex that will cost approximately \$17,000,000. Can we any longer deny vocational students an equal opportunity — that of attending a new and carefully planned Vocational High School? Most assuredly not!

I have, therefore, asked Howard Baptista, the city's Redevelopment Authority Director, to seek to amend the boundaries of the West End Urban Renewal Area to include the present Vocational High School and land adjacent to it owned by the school. Federal acquisition of the school should yield a sum sufficient to enable the city to get a good start on constructing a new Vocational High School. The present Voke site would then be available for a multitude of projects, including needed new housing, expanded facilities for work-training programs and Hammond Auditorium itself could be adapted for community programs.

However, even if the effort fails to convince the Department of Housing and Urban Development to acquire the Voke site, there is another potential source of funds available. I have again filed a bill in the Legislature this year providing for a 75 per cent reimbursement by the state for the construction of Vocational Schools. If this bill is passed, and I shall work assiduously for such legis-

lative approval, and I'm certain Greater New Bedford legislators will join me in this effort, it would mean that the City could conceivably gain a brand new facility for a lesser expenditure than the cost of adding to the present Vocational High School. This is particularly pertinent because there are presently no state funds available to expand existing vocational facilities.

If the expansion plans are approved by the school's trustees, the City Council and the state, I'm certain we will have sufficient space available to meet at least some of the demands of our neighboring towns for vocational facilities, while providing city coffers with reimbursements for the instruction of their vocationally inclined to aid us in our educational budget. Development of a Regional Vocational High School, while initially envisioned by me as a possible approach to our long range goal, is probably not practical because of anticipated difficulty, based on recent history, which area towns would have in gaining Town Meeting approval of increased expenditures for school construction. And I'm not certain that the regional concept would, in fact, meet the needs of New Bedford students. This, after all, is our primary concern. We shall explore both approaches, to be certain that we do what is in the best interests of our people.

I have been evaluating some of the possible sites for the new Vocational High School, and they all have certain advantages and disadvantages because New Bedford no longer has a great deal of unused land available for a major Vocational School complex. However, the financing, the site and the range of subjects that will be available at the new Voke will be carefully studied before any final decisions are taken.

The previous administration and the School Committee have made irrevocable decisions leading to the creation of a new academic high school off Parker Street. We all are optimistic that this massive undertaking will

serve to reduce the dropout rate in New Bedford. However, potential dropouts develop a disinterest in school and the learning process when they are six and seven years old, if not sooner. I already have met several times with some members of the School Committee to consider ways to reverse this trend by assigning more counselors and guidance officers to this area of instruction, thereby offering youngsters more personalized attention.

There is another aspect to this problem, and that is the effective use of day-care centers. Part of the 42 per cent dropout rate which the city has experienced in its public schools between kindergarten and the 12th grade is attributable to the number of working parents we have. The children of the very poor and the underprivileged start out in life under obstacles of poverty, ill health, hunger and poorly educated parents. To help overcome some of these handicaps, the administration is going to introduce the most modern and efficient day-care centers available, providing minimum needs in education, diet and psychological therapy. We want to do away with the effects of a closed environment.

On the other end of the educational spectrum, I already have moved toward the establishment of a scholarship foundation, starting with the donation of my legislative salary this year. Youngsters who have the desire and the potential to benefit from a college education should not be deprived of this opportunity. It is my hope that the education foundation will serve to alleviate this problem. I am certain the city's leaders in industry and retailing, as well as the community-at-large, will join me in this effort.

An avenue of aid to students already exists, however, and that is through the "Help" program. This is the "Higher Education Loan Plan", under which banks make loans available to students at a reduced rate to enable them to attend college. I am sure ALL the banks in our city are

prepared to extend the maximum assistance possible to make **HELP** work. In return for this financial support, I know students in Greater New Bedford are prepared to participate in a tutorial program to teach some of the underprivileged boys and girls in our community to help them reach college in four or five years, or even less. Finally, I am certain Southeastern Massachusetts University is prepared to send its students to practice-teach in Greater New Bedford so that they gain experience and youngsters benefit from the knowledge these students have gained at SMU.

Cooperation shall be the byword of the new administration . . . because it is necessary if we are to achieve the goals which all of us have set for the city.

Of equal concern to the new administration is housing, and the failure of the city to provide more adequate living space . . . not only to meet the demands of the elderly and those of low and modest income, but also those of middle income brackets who find their rents rising constantly because of the housing shortage, and because of a "miscalculated tax increase" as 1969 began. Our record in housing is sordid! We are the laughing stock of the Commonwealth in housing. The machinations of the previous administration with respect to the staffing of our Housing Authority, the handing out of jobs and contracts to undeserving administrators is disgusting! Just as disgusting are the tactics employed by that administration in blaming the City Council for the administration's failure to show leadership in this area of really human concern. Concern for certain slumlords and owners of dilapidated rental property in the West End and South End and parts of the North End always seemed of paramount importance in the administration just now departing. As a result, large numbers of our citizens have been victimized. I am referring to immigrants recently arrived in our city as well as city residents who are culturally and economically disenfranchised. We serve

notice, now, on these slumlords that if we learn that rents are again raised precipitously without justification, legislation which has been filed for consideration by the 1970 session of the State Legislature will get very careful attention from this member of the General Court . . . that legislation calls for flexible rent controls.

In order to end the victimizing of our people, I shall announce, very shortly, after consultation with Police Chief Durfee, the assignment of an official of the Police Department to my office who will work with the Division of Minimum Housing Standards and my staff as we seek to put an end to this practice. The city's investment in good will and decency will more than balance out the cost of assigning a police official for this, and related work in my office.

Our citizens have the right to feel secure in their homes and their places of business. As part of this endeavor, I shall confer with the Police Department about the establishment of a minimum manpower system, so that all sections of the city are covered with a minimum number of policemen while permitting maximum coverage in the high-crime areas of New Bedford. This will involve the use of foot patrolmen where possible. In conjunction with this, the Police Department will be expanded when qualified applicants become available. Finally, the city will review the recent contracts with the Police and Fire Departments to erase any inequities that may exist. While doing so, the pay levels of **ALL** City Employees will be reviewed to make certain our municipal workers are paid a decent wage.

Part of the problems facing the police are brought on by the high use of drugs in the city. New Bedford has merely touched first base in attempting to combat this abuse, which robs sons and daughters of the fullness of their faculties, and destroys family relationships virtually overnight. Drug control facilities will be made available at an early date.

Of course I shall continue my close ties to the New Bedford Mental Health Clinic, through my service on the Board of Directors and involvement with the operation of that facility. Just this past year, during the 1969 session of the State Legislature, I was able to secure \$60,000 for staffing of our center. As a matter of fact, I received word only last week that the Department of Mental Health, through its commissioner had agreed with the Governor's Office and the leaders in both House and Senate Ways and Means to allocate a sufficient amount of this money, already appropriated, so that commencing this month, the team made available by this appropriation can be hired for the second half of this fiscal year. We expect that, once hired, they will remain in the state's employ at our clinic. This was a herculean task, and one in which we take great pride, for the need has been an acute one. We feel confident that the resolution of this problem means that our clinic, at long last, is fully staffed with competent, qualified professionals who will be able to render the kind of service we need and which our people deserve. Your Legislative Delegation also succeeded in having an appropriation of \$150,000 made to commence work on our Mental Health Center. This will be a long-range effort because of the shortage of trained personnel, but some trained mental health workers already are available to the community, and I shall devote maximum attention to this long-neglected problem . . . attention which I shall be in a position to give in my dual role as Mayor-Representative.

During the last administration, the tax rate went up about 25 per cent, but services to the city have not shown such measurable improvement. Therefore, with the assistance of the Department of Public Works a schedule will be established to provide sewage facilities in the North End, as well as new off-street parking facilities. This will involve the ultimate expenditure of millions of dollars, but all of our citizens have the right to expect capital improvements, and this shall be provided on a gradual basis.

Nor will the downtown be neglected. Aside from reviewing progress on the North Terminal Project, I have filed legislation to enable the city to impose a Betterment Assessment on those taxpayers in the center who would benefit most from a Mall. This Mall has been stalled for more than a year in City Hall, but the time has arrived to carry out this imaginative program. The core of New Bedford cannot be allowed to deteriorate, and the \$285,000 program envisioned through the efforts of downtown businessmen and the Chamber of Commerce will do much to spark a renaissance in the heart of New Bedford.

The situation on the waterfront is very depressing. Boat owners, captains, crews, lumpers, and fillet houses seem to be further apart than ever before in an industry that is known for its independence. I hope to instill a new spirit of cooperation and understanding among our fleet. Thievery, distrust, and short weights must be stopped. This should not be a police matter. All these interests can live together amicably once more, as they have in the past.

Now a few words about Recreation. This aspect of the city's development has been woefully neglected. There has been excessive delay in moving ahead on the various fronts open to us — vest pocket parks, keeping school gymnasiums open in the evening and on weekends, particularly during the winter, and otherwise meeting the requirements of young men and women, and young adults for increased recreational opportunities. I'm certain that all of you were as pleased and as proud as I was to learn that Commissioner of Natural Resources Arthur Brownell has chosen New Bedford as site for a \$750,000 skating rink. This rink was made possible through legislation of a \$10,000,000 bond issue which I was pleased to co-sponsor as your State Representative. The Standard-Times reported my involvement with the Governor when it seemed very likely he would veto the measure because of a technical problem in the language of the final draft of that bill. And I'd

like to publicly thank the Standard-Times Boston Bureau for alerting me to the problem. Even though Governor Sargent was in Colorado at the time, I was able to work closely with his Boston staff, as well as with the Commissioner of Natural Resources to bring about the satisfactory resolution of the problem. As a result of that cooperation, New Bedford will soon have a most modern skating rink — a welcome, long overdue adjunct to our recreational facilities. At the same time that we were involved in the skating rink situation, I was concerned and remain concerned that we do not have adequate recreational facilities for our senior citizens. In conjunction with the North End Community Center, of which my aunt is the president, and I am on the Board of Directors, I expect to be able to announce the establishment of a recreational area in the Coggeshall Street area, again through cooperation with the Commonwealth, this time the Department of Public Works.

Most recently, I have been exploring the possibility of the city's taking over the present North End Guild as a community center, recreational facility for youngsters in that same section of the city. I shall discuss this possibility with the Guild's Board of Directors soon and should have recommendations for the Recreation Commission and/or the Park Board shortly thereafter.

My campaign pledge to provide Recreational Facilities in the far North End will be implemented as soon as practicable, with the establishment of such an area near Pine Hill Acres. We shall also move ahead with plans to fully equip Pulaski Park for the residents of that section of the North End as well; nor will the South End be neglected. I intend to provide, in the budget for the coming year, sufficient sums to renew the long-abused green at Hazelwood Park for our citizens who enjoy the highly skilled sport of Bowling on the Green. In addition, we shall develop other available areas in the South End for recreation, including another attempt to procure Fort

Rodman or part of that neglected facility for purposes of tourism and recreation.

I hope you, the Citizens of New Bedford, come forward with your views on these programs, for we want to return control of the city to the inhabitants. I intend to extend City Hall office hours to include Thursday nights and Saturday afternoons when residents may have more opportunity to express themselves on municipal as well as personal problems in which the city might be of assistance. And this invitation is not reserved for voting citizens alone! It is meant for all of our residents, and I might say, particularly our young people, our students, those of you sitting in this auditorium this morning, those of you listening in your classrooms, and those of you who are not present here in the high school building but who will read accounts of these ceremonies in the local newspaper.

I would like you to commit yourselves now, as I did when I sat in this high school auditorium in the 1950's, to help shape the New Tomorrow, by involving yourselves in your government, starting with city government, with the knowledge that your involvement in this government is welcomed, encouraged, appreciated, indeed **SOLICITED** by your Chief Executive.

I have already indicated I shall ask you to involve yourselves with your fellow students as tutors, and I intend to bring this request to you at a later time with the specifics of the challenge, just as I intend to speak with you later on the specifics of the Loan Program we are going to inaugurate with the assistance of the city's banking interests.

The cost may come high, but the burden will be spread equally, for we all are going to share in the rebirth of New Bedford.

23rd Annual Report

of the

AIRPORT MANAGER

of the

NEW BEDFORD MUNICIPAL AIRPORT

For the Year Ending December 31, 1969

Reynolds-DeWalt Printing, Inc.
New Bedford, Mass.

1970

December 31, 1969

To the Honorable George Rogers, Mayor, and the Gentlemen
of the City Council of the City of New Bedford.

Gentlemen:

Presented herewith is the twenty-third Annual Report of
the Airport Manager of the New Bedford Municipal Airport.

It is hoped that this report will reflect the untiring efforts
of the Airport Manager and the Commission to provide New
Bedford and the surrounding area with a continually improving
facility at a minimal cost to the taxpayer. Visible results such
as the excellent income situation, the forthcoming uniquely
designed and financed crash truck, jet service availability, atten-
tion-attracting air shows, and aid to local educational endeavors
are only surface indicators of time and energy expended by
these men in their dedication to the Airport and to their City.

With such idealistic zeal and realistic application to the
task as has been most evident to observers, the future of the
New Bedford Municipal Airport looks bright, indeed.

Respectfully submitted,

NEW BEDFORD AIRPORT COMMISSION

FRANK GOLEN, JR.,

Chairman

NEW BEDFORD AIRPORT COMMISSION

Year Ending December 31, 1969

NAME	TERM EXPIRES
<i>Chairman</i>	
Frank Golen, Jr.	January 1971
<i>Vice-Chairman</i>	
Raymond J. Thomaset	January 1970
<i>Members</i>	
Fred N. Darwell	January 1972
Isidore Eisner	January 1972
C. Eric Lindell	January 1970

William A. Silveira	January 1972
Robert L. Xifaras	January 1971

December 31, 1969

The New Bedford Airport Commission:

Gentlemen:

December 31, 1969 marks the end of the twenty-third full year during which the City of New Bedford has operated its Municipal Airport.

The number of takeoffs and landings recorded by the Federal Aviation Administration Control Tower during 1969 totaled 65,471 compared to 62,632 during 1968, an increase of 2,839.

The following percentages, based on the total number of takeoffs and landings of the past two years, show clearly the type of aircraft now using the field:

Type	1968	1969
Air Carrier	3.44%	3.94%

Itinerant Aircraft:

Military	2.21%	1.75%
Civil	<u>60.29%</u>	<u>60.93%</u>
	62.50%	62.68%

Local Aircraft:

Military	6.57%	5.00%
Civil	<u>27.49%</u>	<u>28.38%</u>
	34.06%	33.38%

The following chart shows the number of takeoffs and landings recorded during the years 1968 and 1969 and the number of days they were recorded:

Number of takeoffs and landings	Number of days during the year	
	1968	1969
200 or more	139	160
100 — 199	142	115
75 — 99	22	28
50 — 74	21	13
25 — 49	18	27
15 — 24	7	8
10 — 14	6	7
5 — 9	6	2
1 — 4	3	1
0	2	4

YEAR'S ACTIVITIES:

A contract was awarded to the Maxim Motor Company in the amount of \$27,860 for the construction of a new foam crash truck. This long needed piece of equipment is expected to be completed and accepted during the early part of the year 1970. This unit will have a number of unusual features, the most important one being the fact that it can be operated by one man with a high degree of efficiency. It should be noted here that had it not been for the efforts of the members of the airport commission over the past few years the acquisition of this vehicle would never have become a reality.

In March the airport commission entered into a two year contract with the Perini Corporation for the sale of approximately 50,000 yards of fill. During the balance of the year the corporation removed less than 2,000 yards. However, it is hoped that they will use a much larger quantity during the coming year.

In April the Commonwealth of Massachusetts, Department of Public Works, notified us that approximately twelve acres of Airport property was being taken for the extension of new Route 140. Although we don't especially like to lose property that was gained not too many years ago for airport purposes,

I do feel that the completion of the connecting links of Route 140 with Route 195 will be a tremendous asset to the airport and far out-weigh any disadvantages that might result from the loss of the property involved.

New Bedford Aviation, one of our fixed base operators whose primary function was a flying school operation, had to cease business in February due to circumstances beyond their control, mainly financial. Although their leaving left a void from the standpoint of flight instruction, I am pleased to say that Mass Air ably filled the gap within a very short period of time.

The new commuter service established by Mass Air connecting New Bedford and the Islands with Boston is apparently taking hold very nicely. One thing I am sure that has helped this Boston service has been the fact that Northeast Airline's schedule was not consistent with the needs of the people flying in and out of this community.

This year, as well as the past two years, we received no aid under the Federal and State Aid to Airports Program. A project application was submitted to the agencies for several needed improvements but again turned down because of lack of funds. However, I am pleased to say that we expect the necessary funds to be released in 1970.

A number of surplus items were acquired through Federal and State agencies. Although the acquisition of this equipment on a donation basis was not as fruitful as in past years, we did obtain some very useful equipment in excellent condition. I would like to add that since 1962 we have located and received over \$150,000 worth of government surplus material on a donation basis.

Offices numbered one and two, formerly occupied by New Bedford Aviation, Inc., were leased to the Carney Maintenance System on a tenant-at-will basis. Also, a two year lease was negotiated with Northeast Airlines, the major change being the enplaned passenger charge was established at a flat rate of fifty cents per person.

Also during the year, the commission negotiated a new ten year lease with Air Service Caravan Company, Inc. based on two cents per square foot of property per year and an escalating users fee. In addition, a thirty year lease with a thirty year renewal option was agreed upon between the commission and Local 644 Steamfitter Apprentice Trust. This lease involves 50,000 square feet of airport land on which the trustees plan to erect a school to train apprentices in the steamfitting trade.

The second annual air show of the Civil Air Patrol which was a repeat of last year's performance by Bill Sweet's National Air Shows, was scheduled to be held in July but due to inclement weather the show had to be cancelled at the last minute and rescheduled for September. Although the September date turned out to be a fine day weatherwise, the event was a financial loss. Many of us feel that the next show should stress local participation which I feel would help to make this event a money-making proposition for the Civil Air Patrol.

The graphic, or symbol signing, of our new highway system has been slowly making progress. That section of Route 140 and 195 already completed has been signed. The section now under construction will also be signed when finished. This leaves Route 195 at the junction of Route 140 as the missing link. However, we hope to have this section adequately marked within the next year.

Our seagull problem this year reached such proportions that they became a daily hazard to flying aircraft which made it necessary that we rid ourselves of them once and for all. Through a certain amount of luck and coincidence it was discovered that by simply flying a black, three-foot in diameter weather balloon, inflated with helium attached to a fifty foot line, the seagulls immediately left the airport. This method has proved 100% effective to the satisfaction of everyone.

In December, Northeast Airlines announced that New Bedford Municipal Airport would be served, commencing February 1, 1970, by DC-9 jet aircraft. This finally brings us into the jet age and only thirty-five minutes from New York. How long this

service will last will depend entirely upon the Greater New Bedford community using this service to a much greater extent than they have in the past. I believe that it has been made very clear to us by both the airline and the Civil Aeronautics Board that we either use it or lose it.

Progress on our proposed Industrial Air Park is slowly making headway and it is my hope that in a very short period of time the Commonwealth of Massachusetts, Department of Commerce, will look favorably on our application for funds with which to start the initial development.

Recommendations for the year 1970:

1. Accomplish the following improvements when Federal and State funds are available:
 - a) Overlay taxiways to Runways 14 and 23.
 - b) Install taxiway lighting to Runways 14-32.
 - c) Extend apron area between administration building and Mass Air.
2. Make an all out effort to obtain funds for the initial development of the Industrial Air Park.
3. Attempt to have the Downey Street-Dreisbach Drive entrance to the airport resurfaced under the City DPW street maintenance program. If not the entire length, at least the area called Downey Street.

In conclusion I wish to thank everyone who helped to make this a successful year.

Respectfully submitted,

JASON G. TAYLOR,

Airport Manager

CITY OF NEW BEDFORD

NEW BEDFORD MUNICIPAL AIRPORT

New Bedford, Massachusetts

Polaroid Corp. 100 Duchaine Blvd. Erect two buildings	3,097,000.00

Milhench Inc.
W. S. Church Street
Erect manufacturing plant 120,000.00

In January of 1969, D. W. White Construction, Inc., started demolition of the wood frame, former Cedar Street School building. This work, under a contract signed on December 31, 1968 in the amount of \$2,895.00, was completed in February of 1969. Purpose of the demolition of this obsolete, dilapidated building was to clear the site for erection of the West End Neighborhood Center Facility. This building will house the West End Day Nursery and other community services.

Plans for the West End Neighborhood Center were prepared by Halevy H. Simmons, Architect, E. Orange, N. J. Bids for the general contract were opened on June 25, 1969 and the work was awarded to the lowest bidder, Fairhaven Construction Company. A contract, in the amount of \$153,025.00, was signed on July 14, 1969. This work had progressed to approximately 75% completion by December 31, 1969.

The Kidd Construction Co., Tiverton, R. I., commenced demolition of dilapidated buildings on March 7, 1969 in accordance with a contract signed on December 30, 1968, under the Federal Demolition Grant Project No. Mass. M-4, Contract 3. This grant expired as of October 31, 1969, and as of that date Kidd Construction Co., had demolished a total of twenty-nine buildings. Final amount of the contract was \$35,250.00.

In co-operation with the Sycamore St.-West Improvement Area project, the Building Department prepared specifications and sought bids for the demolition of a two and a half story dwelling. The work was awarded to Gracia Bros., Inc., Fairhaven, Mass., for his low bid of \$2,000.00.

On August 19, 1969 the School Department accepted a proposal by, and signed a contract with, Transport Engineering Company Inc., Weymouth, Mass., to furnish and locate

three relocatable classrooms. Cost was \$46,389.00, one unit being located at the Ottiwell School area and two were located at the Campbell School area.

The Building Department prepared specifications and received bids for the Free Public Library to replace water-cooled condensers with air-cooled condensers at the Wilks Branch (North End) Library. An emergency contract for the work in the amount of \$2,374.00 was undertaken by Anderson & Olsen, Inc., Heating and Air Conditioning Contractors. These water cooled condensers had corroded to the point where the air conditioning system had become inoperable.

In accordance with plans and specifications prepared by Owen F. Hackett, Jr. & Associates, and Haley & Aldrich, Consulting Soils Engineers, preparation of the site for the new high school was started. The scope of the work performed under this contract included the furnishing and placing of clean fill, to a height of approximately eight feet (8'-0"), in areas that will eventually be paved for roadways, driveways and parking areas. Preloading of these areas will serve two purposes. First, preloading will produce compaction of those areas to be paved, and secondly the clean fill will be used at a later date to replace deleterious dump fill and peat that will be removed from the actual building locations. Low bidder for this work was D. W. White Construction, Inc. A contract, for \$124,950.00, was signed on March 21, 1969. Work was substantially completed May 19, 1969, though final payment was not made until September 2, 1969.

Bid proposals, from the general contractors, for the construction of the new high school were opened on December 4, 1969. Bids were received from the Dimeo Construction Company, Providence, R. I. and the Perini Corporation, Framingham, Massachusetts. Dimeo's bid was \$15,976,000.00, Perini's bid was \$15,547,000.00. The job was awarded to Perini shortly after December 4, 1969 but the contract was still not signed as of December 31, 1969.

SUMMARY OF NEW BUILDING PERMITS

1969

	Permits	Estimated Cost
*NEW CONSTRUCTION		
Dwellings	153	\$4,547,000.00
Stores, Bus., Mfg.	33	4,536,800.00
Filling Stations	8	207,000.00
Garages	25	33,389.00
Hospitals, Schools, Institutions	4	533,000.00
Swimming Pools	21	67,600.00
	<hr/> 244	<hr/> \$9,924,789.00
**ALTERATIONS AND ADDITIONS		
Dwellings	345	553,060.00
Stores, Bus., Mfg.	68	1,128,665.00
Hospitals, Schools, Churches	3	139,500.00
Misc.	10	5,740.00
	<hr/> 426	<hr/> \$1,826,965.00
*New Construction	244	9,924,789.00
**Alterations and Additions	426	1,826,965.00
Heating	70	164,200.00
Demolitions	75
Foundations	1
	<hr/> 816	<hr/> \$11,915,954.00

The One Hundred and Fifty-three (153) Dwellings consisted of One Hundred Forty-seven (147) One Family Dwellings and Six (6) Apartment Buildings having Two Hundred Twenty-four (224) apartments, making a total of Three Hundred Seventy-one (371) units.

There were also 30 new apartments added by conversion; a total of 53 tenements were eliminated by demolitions.

**COMPARATIVE SUMMARY OF CONSTRUCTION
FOR THE LAST FIVE YEARS**

Year	No. of Permits	Estimated Cost
1965	713	\$9,204,241.00
1966	705	7,095,749.00
1967	684	5,297,094.00
1968	633	5,138,369.00
1969	816	11,915,954.00

Special investigations are made as a result of a complaint by a tenant or a neighbor relative to a violation of zoning or building code. A total of 17 special investigations were made in 1969.

There were 17 sign applications during 1969 which were forwarded by the City Clerk to be approved by this Department as to construction, site of location, and method of erection and maintenance.

A total of 33 appeals from the ruling of the Inspector of Buildings were forwarded to the Board of Appeals.

Granted	25
Denied	4
Withdrawn	3
Tabled	1
	33

Appeals that are granted are reversals of the rulings of the Inspector of Buildings; while appeals that were denied upheld the Inspector's ruling.

Places of assembly must be carefully examined according to Chapter 143 of the General Laws, as amended, before a license for their use can be obtained. This includes every building or part thereof, used as a place of public assembly and capable of accommodating 50 or more people; where 10 or more people are employed; rooming houses and apartment houses having eight rooms or 10 people above the second floor.

The following places of assembly were checked and issued certificates during 1969.

	Renewal
Cafes, Clubs, Halls, etc.	36
Industrials	11
Mercantile	2
Funeral home	18
Office Buildings	2

During the year 1969, 20 Rooming Houses having 499 rooms, were inspected. A report of each inspection was forwarded to the State Department of Public Safety.

Inspections were made on Boarding Houses, Convalescent Homes, and Nurseries providing day care services for children.

Under the Subdivision Regulations, as adopted in 1964, the Superintendent of Buildings was empowered to endorse subdivision plans not requiring Board of Survey approval. During the year of 1969, Fifty-nine plans submitted for endorsement were so endorsed.

BUILDING MAINTENANCE

Employees of this division of the Building Department have been actively engaged in maintenance work on all city owned buildings except public school buildings, and have erected speaker's stands and bandstands for various public functions and civic organizations. They have also been engaged in miscellaneous jobbing and trucking for other departments.

All fire stations required some maintenance. At #11 station extensive interior painting was necessary.

Heavy accumulation of snow and ice on the roof of the Municipal building during January and February of 1969, caused anchors holding an ornamental copper ballustrade to break away. This caused extensive damage to the slate roofs and to the ballustrade. In danger of falling on the lawns and entrance ways to the building, it was necessary for the Building Maintenance employees, with an assist from the Forestry Division, Dept. of Public Works, to tie ropes to hold the ballustrade temporarily. After some of the snow and ice had been removed by hand, it was decided to remove the ballustrade completely. The ballustrade was lowered to the ground in sections by our Building Maintenance mechanics and Forestry Division, using their telescopic hoist. Repairs to the slate roof were made by Universal Roofing and Sheet Metal Co. for \$1,737.67. The copper salvaged, was sold to the highest bidder, Samuel Mirsky and Co., for \$1,527.76.

In addition, plumbing, electrical and carpentry repairs were made in the Municipal Building, North and South End Comfort Stations, Library buildings, Police Stations, Airport and the Refuse Incinerator Plant.

FINANCIAL STATEMENT**BUILDING MAINTENANCE****APPROPRIATIONS:**

New Bedford, Massachusetts

Gentlemen:

The Cemetery Board herewith presents its seventy-fifth Annual Report for the year ending, December 31, 1969.

A new schedule of prices was put into effect, March 1, 1969, which included increased prices of lots to be sold in multiples of one hundred twenty dollars, (\$120.) per grave; seventy-five percent (75%) of the price being deposited in the perpetual care fund and twenty-five percent (25%) in the sales of lots fund. The new grave opening charges were increased to sixty dollars (\$60.) and the crypt prices for 26", 28" and 30" sizes were increased to thirty-four dollars (\$34.) with the exception of old age assistance cases; prices of which were increased to forty dollars (\$40.) for opening a grave for a crypt and crypt charge was raised to twenty-eight dollars (\$28.)

Five new signs were erected at the entrances of our cemeteries in compliance with a new State Law, under Chapter 268, An Act Relative to the Visitation Hours in Certain Cemeteries.

Our department was awarded first prize for the display which we entered into the Annual Kiwanis Club Spring Flower Show which was held at the Lincoln Park Pavilion, March 27 through March 30, 1969. It consisted of low plants with a white wrought iron settee, and the display was located in the center of the main floor.

The following new rulings were made by the board, this year:

- January 22 - Voted to allow the interment of any Vietnam serviceman, in our Veteran's Plot provided that he has at least ninety (90) days in the service.
- February 21 - Voted not to allow pictures on flush markers in the future.

Mrs. Marguerite S. McCuen received her Notary Public commission, effective May 2, 1969, to replace Mrs. Doris E. Parker who had been one of the notaries for the department prior to her retirement last year.

After several board meetings, with many interested citizens being present representing different groups and being heard by the board pro and con, relative to the use of a portion of Pine Grove Cemetery land for public housing, the board voted of its willingness to convey said portion of the Pine Grove Cemetery land, located on the west side of Ashley Boulevard; lying to the south of the roadway through the cemetery approximating eighteen (18) to nineteen (19) acres, to the Housing Authority or its designee for public housing purposes.

The following New Equipment was purchased in 1969:

One (1) Gun Type Oil Burner for the Oak Grove Cemetery
Six (6) Jacobsen Rotary Power Mowers
One (1) 1970 Chevrolet Dump Truck
Lowering Device Straps
One (1) 1970 Chevrolet Station Wagon
One (1) Olivetti-Underwood Multisumma #20 Adding and Multiplying Machine

Two of our permanent employees resigned this year; Mr. Leonard F. Sylvia, who had been employed for ten years, to accept a position with the State Department of Public Works and Mr. Gabriel B. Pimental after three years, due to ill health.

Temporary laborers Mr. Peter Edge and Mr. Gerald F. Bourassa were selected for appointment on a permanent basis starting November 24, 1969.

Securities were purchased with funds deposited for the perpetual care of lots, and they are as follows:

10M Virginia Electric and Power Company AA 7-1/8% Bonds, Series W,
due January 1, 1999

10M Gulf Power Company First Mortgage Bonds 7-3/4%, due March 1, 1999

20M Central Illinois Public Service Company 5-7/8% First Mortgage Series L
Registered Bonds, due May 1, 1997

10M Interstate Power Company First Mortgage Registered Bonds 7-3/4%,
due May 1, 1999

15M Southwestern Bell Telephone Company, Thirty-Six (36) Year 8-1/4%
Registered Debentures, due September 1, 2005

10M Commonwealth Edison Company First Mortgage 6-1/4% Series Z
Registered Bonds, due February 1, 1998

CEMETERY BOARD

Recording fees amounting to one hundred eighty-nine dollars (\$189.) were turned over to the City Clerk's office, representing payments for the following transactions:

<u>Cemetery</u>	<u>Graves Sold</u>	<u>Lots Sold</u>	<u>Transfers of Lots and Graves</u>	<u>Burial Right Assignments</u>	<u>Total</u>
Rural	20	39	10	21	90
Oak Grove	00	4	9	8	21
Pine Grove	<u>26</u>	<u>36</u>	<u>11</u>	<u>5</u>	<u>78</u>
Totals	46	79	30	34	189

The need of new mowers and trimmers cannot be too strongly stressed, as we cut grass on approximately five thousand lots, each year. In order to fulfill our contract with the lot owners and keep our own property in satisfactory condition, we must replace the equipment annually.

We take this opportunity to express our sincere thanks and appreciation for the kindness, assistance and cooperation received from His Honor, the Mayor, Members of the City Council, Department Heads and our own department personnel.

Respectfully submitted,

Lionel J. Souza, CHAIRMAN

John E. Medeiros, SECRETARY

Ralph E. Saltus

J. Tunstall Parham

James E. Ferry

SUPERINTENDENT'S REPORT

To the Board of Cemetery Commissioners

Gentlemen:

I herewith submit the annual report of the work done under my supervision during the year 1969, and recommendations for 1970.

RURAL CEMETERY

During the past year, approximately two thousand (2,000) cubic yards of excess dirtfill was removed by the Park Department and the Department of Public Works. This fill was a backlog of dirt which had accumulated over the last twenty-five (25) years. We still have about one thousand (1,000) cubic yards of fill left, and I hope to have it removed in 1970.

Vandalism continues to be a problem. In 1969, we had twenty-one (21) panes of glass broken in the toolhouse, the gasoline pump was broken, seventy-six (76) stones were turned over, eight (8) faucets were broken and the old Public Receiving Tomb door had to be bricked and sealed due to acts of vandalism.

OAK GROVE CEMETERY

The exhibit we entered in the Kiwanis Club Flower Show was arranged by our greenhouse employees. We were awarded a Blue Ribbon for the fine display, and the men are to be congratulated for their good work.

We had the greatest number of stones turned over at this cemetery, amounting to one hundred twenty one (121), all due to vandalism, and also six (6) faucets were broken, three (3) greenhouse windows were broken and a large urn was stolen from in front of the office building.

A new oil burner was purchased for the greenhouse, to replace one which was beyond repair.

We painted about one half of the exterior of the greenhouse, and plan to complete it in 1970.

PINE GROVE CEMETERY

At the request of Councillor Paul J. Mathieu, a layout was made of vacant grave spaces. The result of this layout shows that we have approximately fifteen thousand (15,000) grave spaces remaining on the east side of Ashley Boulevard.

The Department of Public Works graded a portion of the Single Grave Section 21, and I hope to have this section completed in 1970.

Sixty-eight (68) stones were turned over, by vandals, the week before Memorial Day. With the help of Mr. Donald Rex of Rex Monumental Works, we were able to reset them prior to the holiday, and he did not charge for his services.

A portion of our land on the south end of the cemetery has started to erode, therefore, I recommend that a fence be installed in this part of the cemetery to stop the erosion.

A new motor was installed in the 1958 Ford Ranch Wagon which is in use at this cemetery.

GENERAL

In 1970, I hope that we will be able to blacktop the sidewalk in front of the Peckham West Cemetery, due to a washout on the sidewalk.

Five (5) new signs, made by the Department of Public Works, were put up at the entrances to the Rural, Oak Grove and Pine Grove Cemeteries stating the hours the cemeteries are to be open to the general public.

We granted a request from the Garden Club of New Bedford, relative to geraniums for the window boxes at the Main Branch of the Free Public Library.

A lot, fifty (50) feet by one hundred (100) feet, adjacent to the Point Road Cemetery was graded and seeded. We also removed a tree and repaired the cast stone fence around the cemetery.

On November 11, 1969, the Superintendent gave a talk to the Last Man Organization of the American Legion Post #1, relative to cemeteries owned and operated by the City of New Bedford. Some of the Rules and Regulations of the Cemetery Board were stressed, pertaining to veteran's rights in our cemeteries.

I express my thanks for the assistance I have received from your Honorable Board, His Honor the Mayor, Members of the City Council, Department Heads and their personnel and to the employees of the Cemetery Department for their cooperation during the year 1969.

SUMMARY OF WORK DONE IN 1969

CEMETERY BOARD

REPORT OF CARETAKER
of
SOLDIERS' AND SAILORS' GRAVES

New Bedford, Massachusetts
January 1, 1970

To the Honorable City Council of the
City of New Bedford

Gentlemen:

I, hereby, submit the following report of the work done, during 1969, on neglected lots and graves where soldiers and sailors are interred, as authorized in Chapter 218, Acts of Legislature, 1920:

	<u>Care of Lots and Graves</u>
Rural Cemetery	178
Oak Grove Cemetery	145
Pine Grove Cemetery	22
Peckham West Cemetery	24
Congregational Church Cemetery	2
Griffin Street Cemetery	<u>9</u>
	380

The amount appropriated for this work was \$2,500.00, and this amount was expended for cutting grass.

Respectfully submitted,

John Thornhill
CARETAKER OF SOLDIERS' AND
SAILORS' GRAVES

CEMETERY BOARD

15F

ANNUAL REPORT

BOARD OF CEMETERY COMMISSIONERS,

for the year ending December 31, 1969

IN CITY COUNCIL

October 8, 1970

Received, placed on file and ordered printed
in the City Documents.

Ellen M. Gaughan,
CITY CLERK

Attest:

Signed by Ellen M. Gaughan
CITY CLERK

ANNUAL REPORT

OF THE

CITY AUDITOR

OF THE

CITY OF NEW BEDFORD

MASSACHUSETTS

FOR THE YEAR 1969

REYNOLDS-DEWALT PRINTING, INC.
NEW BEDFORD, MASS.

1970

CITY OF NEW BEDFORD

Office of the City Auditor

To His Honor George Rogers, Mayor of New Bedford, and the Honorable City Council:

Submitted herewith are the following statements and schedules showing the receipts and expenditures for the City of New Bedford for the calendar year ending December 31, 1969 and the financial conditions.

Exhibit A—Balance Sheet as of December 31, 1969.

Exhibit B—Statement of Receipts for the year ending December 31, 1969.

Exhibit C—Statement of Expenditures for the year ending December 31, 1969.

Exhibit D—Summary of Receipts and Expenditures for the year ending December 31, 1969.

Exhibit E—Schedule of Indebtedness Payable at the close of the calendar years 1946 through 1969.

Exhibit F—Schedule of Bonded Debts and Sinking Funds as of December 31, 1969.

Exhibit G—Summary of Bonded Debt and Sinking Funds as of December 31, 1969.

The City of New Bedford closed the calendar year 1969 with a balance of \$236,467.09 in the Excess and Deficiency Account.

I certify that in the course of the audit of the books and records of the City of New Bedford the cash on deposit and several trust funds in the custody of the trustees and city treasurer were verified and found that the same were in agreement with reports and records rendered by said trustees and city treasurer to the City Council.

Respectfully submitted,

CARL M. PEREIRA,

City Auditor

CITY COUNCIL

The New Bedford City Council began its busy year on January 9, 1969 at which time Councillor Albert L. McMullen, Councillor from Ward Three, was elected President, an office which he administered with a judicious fairness, tact and patience. Councillor McMullen won not only the respect of his fellow councillors, but also their support of his appointment on December 23, 1969 to membership on the New Bedford Housing Authority. In order to avoid any possible conflict of interest, Mr. McMullen resigned from the City Council on December 31, 1969, in order to assume his duties with the Housing Authority on January 2, 1970.

Several matters of community-wide interest were considered by the City Council in the 20 regular and 19 special meetings held during the year 1969. Among the highlights, was a hearing February 19th, at the request of the Division of Minimum Housing, at which a list of sub-standard properties was studied by the Council and the owners thereof directed to either renovate or demolish same. On February 24, 1969, Mayor Harrington submitted his 1969 budget in the amount of \$23,279,895.40. On April 10, 1969, after having held 5 meetings as a quasi committee of the whole for con-

sideration of the Mayor's budget, the City Council reduced the budget by various cuts totalling \$16,401.20, and adopted the order as amended to the figure \$23,263,494.20.

The City of New Bedford is involved in several federally-subsidized programs, and the year 1969 saw some of these come to fruition and other advance toward materialization, as follows:

July 17, 1969: Grant of \$15,000 accepted for Police Community Relations and Riot Control Program

August 21, 1969: Planning Documents for Sewage Treatment Plant approved

August 26, 1969: Grant in the amount of \$517,000 accepted from Economic Development Administration — for expansion of the Industrial Park

October 23, 1969: Mayor authorized to submit proposal for Municipal Information System

December 1, 1969: Grand Agreement in the amount of \$2,109,000.00 accepted for Comprehensive City Demonstration Program (Model Cities)

December 15, 1969: Loan order in the amount of \$18,000,000.00, for new senior high school, adopted.

Other action of the City Council, of community-wide interest, was the adoption on March 13, 1969, of an order accepting the provisions of General Laws Chapter 90, Sec. 20C, relative to tagging automobiles and imposing fines. The Council tempered its action by a vote recommending that one warning be given before fines are imposed.

The long-awaited ordinance providing for the restraint of dogs was reported out of Ordinance Committee, but was tabled by the City Council due to lack of facilities for implementing the provisions thereof.

On June 26, 1969, an Historic District Study Committee was established and members were appointed and confirmed.

Of widespread interest among local veterans' organizations was the adoption on October 23, 1969, of an order transferring \$200,000 from Soldiers and Sailors Memorial Fund to New Construction — Buttonwood Park. This action fol-

lowed a public hearing on two nights (October 2nd and October 23rd) and was conditioned upon (1) renaming Buttonwood Park "Veterans Memorial Park at Buttonwood" (2) naming the proposed zoo building for World War I Veterans, and (3) building the World War I veterans a one-story building for their quarters.

On October 13th, the City Council passed an Ordinance Establishing the pay of City Councillors at \$2500 per year; and on October 16, 1969, an ordinance was passed establishing the salary of the Mayor at \$20,000 per year.

On November 25, 1969, after months of investigation, the Special Committee relative to Expenditures at the Industrial Park reported its recommendations to the City Council, as a result of which, an audit is being made by the State of the expenditures from the two Development Loans of 1956.

On December 31, 1969, Charles W. Deasy concluded an illustrious career as City Clerk, which began in 1938. His efficient and co-operative service to the City Council, the administrations and the public during this span of better than thirty years will long be remembered; and his knowledge of municipal affairs, which extended far beyond the requirements of his office, will be missed by all who had the pleasure of working with him. His staff and members of the municipal government all join in wishing many happy, productive years of retirement to one who is most deserving of them.

Respectfully submitted,

ELLEN M. GAUGHAN,
City Clerk

ANNUAL REPORT

City Clerk of the City of New Bedford, for the year 1969.

IN CITY COUNCIL,

ANNUAL REPORT
OF THE
CITY SOLICITOR
OF THE
CITY OF NEW BEDFORD
MASSACHUSETTS

FOR THE YEAR 1969

GEORGE JACOBS
City Solicitor

Edwin Livingstone, Jr.

Arthur J. Caron, Jr.

Daniel P. David

Assistant City Solicitors

December 31, 1969

To the Honorable
The City Council

Gentlemen:

In compliance with Section 1-208 of the City Code, I hereby submit the annual report of the City Solicitor's office for the year ending December 31, 1969.

74 legal opinions were rendered to the Mayor, City Council, Committees and Commissions of the City government and to heads of departments. In addition to the foregoing written opinions, this office was constantly called upon to give advice and oral opinions to department heads and city officials.

267 claims were filed and processed under the Workmen's Compensation Act, resulting in several conferences and hearings before Industrial Accident Board members.

165 claims for personal injuries and property damage were filed against the City during the year. These claims were mostly the result of accidents due to defective streets and sidewalks, and automobile collisions involving city-owned vehicles.

123 claims were honored and paid, the total sum of all disbursements being \$14,314.72.

19 cases in which court action was instituted against the city for personal injuries or property damage were resolved in the total sum of \$19,735.83.

266 contracts were submitted to this office for review and approval as to legality and form.

This office prepared numerous legal documents such as deeds, leases, easements, agreements, and contracts, as

well as numerous City Council orders for land takings, street layouts and street discontinuances.

\$4,976.05 was collected by this office on accounts due the city for damage to city property, and for work performed and services rendered by city departments.

During 1969, one of the unusual matters handled by this office was the strike by teacher members of the New Bedford Educators' Association from September 2 through September 12, 1969. This case involved the obtaining of a temporary restraining order and a preliminary injunction against the teachers involved prohibiting them from withholding their services, and resulted in a representative group of the striking teachers being found to be in contempt of court and fined a total of \$50,000.00. The New Bedford Educators' Association has appealed the fines of the Superior Court judge in this matter and it is anticipated that the appeal will be filed in the Supreme Judicial Court.

In 1969, the City received an adverse finding in the Petition for Declaratory Judgment in which the City joined with other affected towns and in which the Woods Hole, Martha's Vineyard and Nantucket Steamship Authority was the defendant, and the City has joined with several of the towns in filing an appeal before the Supreme Judicial Court.

During 1969, this office represented the City in collective bargaining negotiations with organizations representing municipal employees and city police and firefighters. The negotiations culminated in the entering into of collective bargaining agreements which were approved by the City Council and executed by the Mayor.

As of December 31, 1969, the following cases in which suit was brought against the City prior to January 1, 1970, were still unsettled and pending further court action:

A. Personal injury and property damage cases arising out of defects in public ways and auto accidents involving city vehicles:

<i>Name of Plaintiff</i>	<i>Nature of Suit</i>	<i>Ad Damnum</i>
Hilda Baptista	Personal injury — defect	\$30,000.00

FIFTH ANNUAL REPORT
OF THE
CONSERVATION COMMISSION
OF THE
CITY OF NEW BEDFORD
MASSACHUSETTS
FOR THE YEAR 1969

CONSERVATION COMMISSION

3k

January 1, 1970

To The Honorable Mayor

and members of the City Council of New Bedford, Mass.

Gentlemen :

The Conservation Commission presents its Annual Report for 1969.

Respectfully submitted,

Wilfred Valliere, Jr., Chairman

Richard F. Bailey, Jr.

Earle M. Carter, Sr.

Adra J. Cook

Flora B. Peirce

David C. Thoen

Samuel S. Wagstaff

REPORT OF THE CONSERVATION COMMISSION

The annual report of 1969, fifth of the Conservation Commission, completes five and one half years of organization. The New Bedford commission was authorized June 6, 1963 by vote of the City Council accepting the permissive act of the General Court, Acts of 1957, Chapter 40, Section 8C, amended. The seven appointed members were called to organize June 1, 1964. The term of appointed members is three years.

During 1969 there were several changes in membership of the commission. Mr. William Tavares, 43 Calumet Street, served from January to June to replace a resignation. He, in turn, was replaced by Mrs. Adra J. Cook for the full three year term. Mr. Allen C. Haskell, due to pressure of his business, became an associate member. Mr. Richard F. Bailey, Jr. was appointed to fulfill Mr. Haskell's unexpired term. Reappointments to the three year term were Miss Flora B. Peirce, Mr. David C. Thoen, and Lieutenant Colonel Samuel S. Wagstaff.

At the reorganization meeting in June, Mr. Wilfred Valliere, Jr. and Miss Peirce were re-elected chairman and secretary respectively. Lieut. Colonel Wagstaff became vice-chairman. Miss Huldah Hathaway continued as associate member.

The regular meetings of the year were scheduled for the third Wednesday of the month omitting July and August. The official meeting place of the commission for 1969 was the Park Board Office.

The Conservation Commission continued membership in the Massachusetts Association of Conservation Commissions and the Massachusetts Forest and Park Association.

A Conservation Fund was established. A transfer of \$100.00 from the Reserve Fund and appropriated to a Conservation Fund was adopted by the City Council August 21,

1969 and approved by the Mayor August 25, 1969 in accordance to General Laws, Chapter 40, Section 5. Monies in a Conservation Fund are available from year to year for the purposes of a Conservation Commission until spent. The proceeds may be invested by the City Treasurer and income realized shall be credited to the fund. It is a vital tool for commissions. The \$100.00 establishing the Conservation Fund for the New Bedford commission is a token amount - additional monies are needed if the commission is to progress in its objectives and in implementation of its proposed programs.

The purposes of the commission are, namely, to promote and develop natural resources, protect watersheds, carry out a program for the preservation and proper utilization of open spaces and wetlands. Two functions alone — acquisition of land and maintenance of property under its jurisdiction — require a substantial Conservation Fund in order to function adequately and efficiently.

The New Bedford commission solicited gifts of open land and other bequests by estates, persons and organizations. Notices were inserted November 12, 14, 17 in the newspaper, The Standard-Times, in the commission's approach for such requests. If desired, any donated acreage would be administered by the commission in the name of the donor as a Natural Living Memorial.

This report acknowledges under jurisdiction of the commission 36 acres acquired by purchase, 26 and 7 acres licensed from the Airport Commission and the Board of Park Commissioners respectively, 12 acres acquired by the device of easement, making a total of 81 acres upon which the commission blazed the Apponagansett Nature Trail. The trail runs along the banks of the Paskamansett River across Turners Pond on Plainville Road. A sign marks the entrance. Ownership of 1 acre of land for proper entrance should be acquired and is being pursued by the commission. The commission controls 25 acres, a Wildlife Refuge, north

of the Whaling City Golf course, of which 23 acres are licensed from the Board of Park Commissioners and 2 acres by transfer of tax title property. A sign designates another Conservation Area of the commission, a 3 acre plat at the northwestern corner of Shawmut Avenue and Plainville Road, a tax title transfer. The plat is in the complex of open space long-range plans for purposes of conservation-recreation development.

The commission continues toward its goal of a three-fold plan.

1. Paskamansett River Project

Further development of the Apponagansett Nature Trail, pond sites, plant succession plots, management practices of woodland and wildlife and conservation education.

2. Turners Pond Project

Development of multi-purpose conservation-recreation program.

3. Acushnet Cedar Swamp Project

Preservation of the area for a Bird and a Game Sanctuary and preservation of the stand of extraordinary Atlantic White Cedars.

The headquarters of the Boy Scouts, the Girl Scouts and a 4-H club, Heads and Trails Club, received copies of pamphlets issued by the commission describing the Paskamansett-Turners Pond area and its potentials. Accompanying correspondence invited the groups to make use of the Apponagansett Nature Trail for their programs of conservation and recreation. Copies of the pamphlet were distributed to the Free Public Library and its branches and to the Chamber of Commerce.

"No Hunting" signs were issued for the Apponagansett Nature Trail to insure safety for those using the trail. Due notices were forwarded to the Law Department and the Chief of Police.

"Go-Slow" signs were erected on Plainville Road approaching the entrance of the trail by courtesy of the New Bedford Traffic Commission and the Dartmouth officials.

St. Joseph Boy Scouts, Troop 24, have assisted during the year in the development of the nature trail. The troop, participating in the Boy Scout fair at the State Armory, adopted the theme "Conservation" for display. Concepts from the Apponagansett Nature Trail were adopted by the troop. The commission extends its appreciation to the troop of St. Joseph Church for assistance at the trail and for the interest shown in the project.

In January an invitation was extended to Mr. Robert A. Taylor, Park Naturalist of the Cape Cod Seashore, to explore the established nature trail and the area. He accepted, toured the area, and issued a report to the commission. He found the site valuable for interpretative potential, a part of a larger potential unit that would be of great value to the city of New Bedford for conservation-recreation purposes. He emphasized the necessity of control by the Conservation Commission for the entire watershed area. Mr. Taylor stated that it is imperative to include the upstream area in the commission's conservation plans if its programs are to be successful. The commission extends its thanks to Mr. Taylor for his time, interest, and valued report.

The Conservation Commission requested the Bristol Conservation District in December 1965 for a natural resource survey and the following January assistance was granted with the Natural Resources Technical Team (NRTT) approach. In October, 1968 the Board of Supervisors of the Bristol Conservation District reviewed the request and approved it for action. The NRTT is composed of professional employees of different disciplines from state and federal resource agencies. In the Middleboro Work Unit which covers New Bedford, Mr. Warren Archey, Resource Planner, coordinates the New Bedford survey and the program that is in process. He is in the Soil Con-

servation Service of the U. S. Department of Agriculture. Correspondence and discussion with Mr. Archey established priorities for resource development. The commission determined the first three priorities, Paskamansett River Trail System, Turners Pond and the Wildlife Refuge west of the Whaling City Golf course. The preliminary draft of the report on the natural resource program was submitted to the commission by Mr. Archey for review. The purpose of the report offers potentials, opportunities, and alternatives for natural resource development. It supplements the city's Master Plan for 1980 and the Recreation-Open Space Plan of the city. The next step will be the findings on the report by the NRTT and the Southeast Regional Planning Commission.

The commission for its continued education programs in conservation guided walks in the Apponagansett Nature Trail area. The sixth grade from St. Joseph School participated. Another guided tour was conducted in the Spring for the Girl Scout Troop 329 from St. Mary Church.

Two meetings of the year were held in conjunction with other Conservation Commissions. The first meeting in city hall was with a representative from the Dartmouth commission. Financing and acquisition problems were discussed. The second joint meeting was held in Dartmouth Town Hall. Representatives from Dartmouth, Fairhaven, Freetown and New Bedford commissions attended. The purpose of the meeting was to explore the possibilities of organizing a Bristol County Conservation Association. Mr. John Fiske, Land Use Administrator for Conservation Commissions, from the Division of Conservation Services in the Department of Natural Resources, spoke to the representatives. He pointed out that one advantage of a regional conservation organization would be the protection and the development of a watershed. The group was receptive to a conservation association. Other meetings for further discussion were indicated.

A special meeting with agents of the Polaroid Corporation was held in the Mayor's office March 4, 1969 to discuss building by the corporation in the Industrial Park. A parcel of the property in question is wetlands. An amicable discussion assured the commission there would be safeguards pertaining to wetlands and protection against pollution. The commission voted unanimously,

1. In favor of the Polaroid Corporation developing the 25 acre tract under ownership of the corporation.
2. In favor of developing the 400 acre tract under option.

The commission investigated Order of Conditions issued by the Department of Natural Resources involving wetlands and proposed land fill in the harbor.

Among several bills before the General Court concerning conservation and acted upon by the commission was one opposed, a bill providing for election rather than appointment of members to Conservation Commissions. The commission opposed the bill on the principle that qualified people may be by-passed. The commission supported full funding of the Self-Help Fund, a reimbursement program, (General Laws, Chapter 132A, Section 11) for the fiscal year 1970.

The commission was represented at the dedication service of the Community Beautification Program of Marine Park. The 1965 through 1967 sub-committee on beautification of the Conservation Commission cooperated with the sponsor of the project, the YWCA, Y-Teen Service Corps.

Two members attended sessions on October 1 and 29 of the Conservation Commission School at Waltham Field Station, Waltham, Massachusetts. The school was sponsored by the Resource Development Programs, Department of Environmental Services, University of Massachusetts, the Northeast Regional Extension Service, and the Massachusetts Association of Conservation Commissions. The re-

spective subjects were "Reaching the Next Generation" and "Planning for Open Space".

The New Bedford Conservation Commission received notice in two 1969 publications. The conservation school programs of the commission for the fourth and sixth grades are indexed in a publication of the National Audubon Society. A book titled "Conservation Commissions in Massachusetts" written by Dr. Andrew J. W. Schaeffey and published by The Conservation Foundation describes in Part III case studies based upon a questionnaire survey. The New Bedford commission is one of several case histories covered by the 215-page paperback book.

The Conservation Commission extends thanks to Mayor Edward F. Harrington and the members of the City Council for their interest during the year. The commission expresses appreciation to the city departments for their assistance and is most grateful to the personnel of the Planning Department for their continued cooperation throughout the year.

Respectively submitted,

FLORA B. PEIRCE

Secretary

ANNUAL REPORT

OF THE

CHIEF

OF THE

FIRE DEPARTMENT

NEW BEDFORD, MASSACHUSETTS

FOR THE YEAR ENDING DECEMBER 31, 1969

Richard T. Gaughan, Chief of Department

FIRE DEPARTMENT REPORT

3L

Mayor of the City of New Bedford —

Dear Mr. Mayor:

I respectfully submit the Annual Report of the operations and functional status of the Fire Department for the year 1969 together with the recommendations that I consider necessary for maintaining and increasing the efficiency of the Department.

The total alarms received for "Fires" and "Non-Fires" for the year 1969 is 2,936.

SUMMARY OF ALARMS RECEIVED

Fires	1,116
Emergency Calls, other than fires	1,032
No Fire Found, Sprinkler Trouble, Etc.	193
False Box Alarms	530
Out of City Responses	9
False Telephone Alarms	<u>56</u>
Total	2,936

Of the actual 1,116 fires, 820 originated as "Still Alarms" and in 377 cases were followed by "Box Alarms" for the same fire. Of the actual 1,116 fires, 296 originated as "Box Alarms" and in 6 cases, calls for additional apparatus were sent out by "Still Alarms" for the same fire.

Total "Still or Telephone Alarms" transmitted from Headquarters	1,087
Total "Box Alarms" transmitted from Headquarters	<u>1,050</u>
Total	2,137

Of the total alarms transmitted, there were 1,116 actual fires. There was one Second Alarm during the year.

The total fire loss for 1969 is \$372,291.86, of which the loss in buildings is \$221,435.79; the loss of contents of buildings is \$134,260.45; the loss on auto fires is \$13,490.62; the loss on boats is \$3,105.00. The per capita loss of \$3.69 compares most favorable with the national average of \$9.70.

The Department responded to 1,032 emergency services which include resuscitator efforts, pumping out of flooded cellars and boats, removal of refrigerators that were leaking sulphur dioxide gas, and numerous other types of services which this department classes as emergency Public Service. May I state that the above calls were made as a part of the emergency service this Department provides the citizens of our City.

As authorized by Section 19 of Chapter 148, General Laws, I granted 8 permits for Blasting.

The capable staff of Chief Officers who are responsible for administrative and firefighting efficiency in their respective Districts, in addition to a myriad of other duties related to the Fire Service, are to be congratulated for their unquestioned dedication and support to this office.

Deputy Chief Frank H. Cleveland, District Chiefs Charles J. Armanetti, Edward J. Jablonski, Daniel L. Piekut, Alphonse Piekut, Fred Osuch, Oreste A. Savino, William H. Barney, Manuel Almeida, Joseph P. Silva, Ernest Laviolette and Matthew R. Dobyna made approximately 430 inspections during the year to check out complaints and remedy hazardous fire conditions. They granted 870 open air permits after visitation for assurance of fire-safe conditions.

The Home Inspection Program was continued under direction of Deputy Chief Frank H. Cleveland. I wish to compliment our personnel in this phase of fire prevention. The diplomatic and efficient manner in which Company personnel conducted these inspections is highly commendable. A total of approximately 2,989 occupancy and 2,096 building inspections were made. In addition to the Home Inspection, schools, hospitals, theatres, and convalescent homes were inspected quarterly. A continuing phase of this most important fire prevention measure also included every church in the City. If we may prevent the loss of just one life through the efforts of our Fire Prevention measures, then I would say the program is justifiable.

The Fire Alarm Division, our communications center, which services both telegraphic and radio transmission and reception continues to operate in a most efficient and progressive manner under the direction of Assistant Superintendent of Fire Alarms Clifford J. Snell.

Four new Fire Alarm boxes were installed and approximately 2,000 feet of aerial line and associated equipment installed to service these boxes. 10,000 feet of underground and approximately 1,100 feet of old overhead line wire was replaced. This includes South Terminal area.

As in the past, assistance was given the Wire Department relative to the Christmas Display at the Common Park.

Routine maintenance work was done by the fire alarm crew which included tree trimming, line inspection, change over to new poles, ground testing, and painting outside equipment.

All fire alarm boxes were tested and inspected and the interior circuit from master boxes were tested.

At the close of 1969 the number of fire alarm boxes throughout the City totalled 491; of this total 276 are Public and 215 are Private Boxes, 104 of the latter being the master type connected to sprinklers, heat detectors, or auxiliary pull stations.

The Repair and Maintenance Division under Master Mechanic Kenneth M. Haddock is charged with the upkeep and repair of all mobile units, many of which are specialized requiring service uncommon to most motor vehicles. The Repair Shop also maintains, repairs, and many times fabricates the special equipment and accessories peculiar to firefighting.

Care of the eleven (11) buildings under the fire department jurisdiction, requires that our repair division perform carpenter, plumbing, and heating repairs which otherwise would require the services of an outside contractor.

Fire Prevention Division is headed by Capt. Abel F. Moinheiro assisted by two Lieutenants and two clerks. This division is responsible for administering one of the most important phases of Fire Department functions, namely Fire Prevention and Investigation.

Their duties embrace the entire field of Fire Prevention and Investigation including issuing of relative permits as required by law, inspection duties, fire prevention lectures to schools and public service organizations, and investigative work in relation to suspicious fires.

Permits issued by the Division are as follows:

Power Oil Burners	229
Range, Cabinet and Space Heaters	6
Fuel Oil Storage	15
Liquified Petroleum Gas Storage	18
Underground Tank Removals	<u>10</u>
Total	278

The Drill and Training Program is directed by Captain Raymond W. Cobb. Its function is to maintain efficiency in all phases of firefighting through classroom instruction and fire ground training at the Drill Tower and various other locations.

Captain Cobb, through his attendance at the Massachusetts Institute of Fire Department Instructors monthly meetings is able to keep astride of the most modern techniques of firefighting.

FIRE DEPARTMENT

Annual Underwriter service tests for all pumping engines, first aid instructions and lectures to the Military, Civil Defense, and Industrial fire brigades are all a part of the duties of our Drillmaster.

Refresher courses in radiological monitoring were given to all members of the department. The various instruments employed in detection of radioactivity are provided by the Civil Defense Agency and are kept operational and in readiness at all Fire Stations throughout the City.

The New Bedford Protecting Society Officers and Personnel constitute a most dedicated and capable body of citizens who, with a most modern salvage vehicle provide invaluable assistance to the Public and Fire Department. Serving without remuneration, the members of the Society avail themselves at any hour, day or night, in their effort to help keep the City's fire losses low. The Public should be more aware of their excellent service.

APPARATUS IN COMMISSION

- 11 - Motor Pumping Engines, 6-1,000 G. P. M. and 5-750 G. P. M. Engines, all with booster hose and water tanks. Four have built-in liquid foam tanks used for flammable liquid fires. Six carry large deluge guns for use on large fires.
- 4 - Aerial Ladder Trucks, 2-85 Ft. tractor type and 2-75 Ft. non-tractor type, all equipped with ladder pipes.
- 1 - City Service Ladder Truck.
- 1 - Rescue and Fire Boat, on trailer - available on call.
- 1 - Hose Wagon with Booster and Water Tank, equipped with forestry hose, wet-water device, flammable liquid fire fighting appliances - on call.
- 1 - Automobile for the Chief.
- 1 - Automobile for the Deputy Chief.
- 4 - Automobiles for the District Chiefs.
- 1 - Automobile for the Drillmaster.
- 2 - Fire Alarm Trucks.
- 1 - Repair Division Trucks.
- 3 - Automobiles for Fire Prevention Division.
- 1 - Van for towing of Rescue SCUBA and Fire Boat.
- 1 - N. B. Protecting Society Salvage Truck.

APPARATUS IN RESERVE

- 1 - Motor Pumping Engine, 200 G. P. M. with power take-off pump and water tank.
- 1 - Motor Pumping Engine, 500 G. P. M.
- 1 - High Pressure Fog Truck with 435 Gallon Water Tank.

FIRE DEPARTMENT

7L

FIRE HOSE

800 feet of 3-inch hose
29,800 feet of 2 1/2-inch hose
19,400 feet of 1 1/2-inch hose
1,000 feet of 1-inch hose
4,500 feet of 3/4-inch hose
800 feet of 5/8-inch garden hose
127 Waterproof salvage covers carried on apparatus
10 Waterproof salvage covers carried on Protective Truck

NEW EQUIPMENT ACQUIRED DURING THE YEAR

One New Automobile
Two New Fire Alarm Boxes
Fire Alarm C & D Batteries
One Slow Time Transmitter
4,200 feet of new 2 1/2-inch hose
Hose Coupling Expander
Shop Hydraulic Lift
Fire Alarm Cable and Associated Equipment
Fire Alarm Line Wire and Associated Equipment

My sincere thanks to the Mayor and City Council for the continuation of their excellent cooperation and good relationships with this Department.

Inter-Department cooperation is on the highest level. I extend my thanks to the Building, Wire, Water, and Public Works Departments.

Our news media including the Standard-Times, radio stations WNBH and WBSM are outstanding in the presentation of fire ground activity and various other newsworthy items related to the functions of the Fire Department. Without their fine support our Educational and Fire Prevention programs would be impossible to achieve their objective -- namely, "reaching the people."

The Salvation Army, Volunteers of America, and American Red Cross who faithfully dispense hot coffee and refreshments to our men at multiple alarm fires, deserve and receive our special thanks. May our fine relationship continue.

Many thanks to Civil Defense Director Mrs. Anne Fitch and her personnel, for invaluable assistance in the fields of traffic, lighting, and availability of their Rescue Truck at multiple alarm fires.

Special recognition and many thanks are extended to the Company Officers and Firefighters who on many occasions have demonstrated their ability to fulfill their duties in the highest tradition of our service. Their participation in the many civic endeavors of our City is worthy of admiration.

FIRE DEPARTMENT

RECOMMENDATIONS

ONE (1) NEW 1,000 G.P.M. PUMPING ENGINE: The efficiency of a fire department is, to a large degree, predicated on the dependability and capacity of its' pumping engines both active and reserve. Our pumping engine posture is rapidly becoming acute. Reserve status is for all practical purposes negative, which means if an active piece of apparatus breaks down and requires extensive repairs, there is no dependable replacement -- some area of the City will be exposed to inadequate protection.

Engine #2, a 1947 Ahrens-Fox Pumper, located at Station #2 is one of the engines charged with the protection of our high value district. This pumper is over 22 years old and because of its design is extremely difficult to maneuver through our narrow streets. It shows signs of needing extensive motor repair. If replaced, it would be placed in reserve and help to improve our situation in this area. It is extremely difficult to obtain parts for an Ahrens - Fox.

Our present active pumping engine age is as follows:

1947 --- one	1948 --- one
1952 --- one	1953 --- one
1954 --- three	1955 --- one
1956 --- one	1965 --- one
1968 --- one	

It is obvious from the above that a long range plan for gradual replacement should be instituted. I sincerely hope serious and forthright consideration be given to the above request.

REQUEST: \$35,000.00

ONE (1) NEW 100 Ft. TRACTOR DRAWN AERIAL LADDER TRUCK: At the present time the department has two (2) 85 ft. tractor drawn aerial ladder trucks and two (2) 75 ft. straight ladder trucks. All of these trucks are showing signs of wear and age and require frequent repairs. New buildings are being constructed that require aerial ladders of at least 100 ft. If this request is granted, the City Service Ladder Truck at Station #5 would be replaced with a 75 ft. aerial truck which would become a valuable asset in responding to the Industrial Park where Polaroid will have at least one building 6 stories high.

Our present active aerial ladder truck age is as follows:

1947 --- one	1948 --- one
1950 --- one	1952 --- one

REQUEST: \$75,000.00

FIRE DEPARTMENT

9L

THREE (3) NEW AUTOMOBILES: Passenger type vehicles, of which we have eight, are used by the Chief, Deputy Chief, District Chiefs, Fire Prevention Inspectors, Drillmaster and Master Mechanic.

The above vehicles are necessary in the performance of the day and night duties of the aforementioned. In the move toward economy, the practice of this department is, through the "hand-down" process, get the most out of each vehicle.

The new automobiles would be used to replace a District Chief's car demolished in an accident and two for Fire Prevention where two members are using their own cars to perform the duties required of them.

REQUEST: \$12,000.00

TWO (2) NEW FIRE ALARM BOXES: With increased new construction in residential areas it becomes imperative that such areas be protected by adequate distribution of fire alarm boxes. Our citizens need and deserve such protection for the notification of fire.

REQUEST: \$ 600.00

FIRE ALARM LINE WIRE, UNDERGROUND AND OVERHEAD CABLE, AND RELATED EQUIPMENT: Fire alarm wire, underground and overhead cable and related equipment are integral units of our telegraphic Fire Alarm System. They serve as the carriers of a fire alarm signal from the various fire alarm boxes throughout the City to our Central Station at Headquarters. Much of the wire and cable has deteriorated through age and weather and must be replaced. Failure to replace such wire and cable could very well result in serious consequences, for a breakdown would negate the receipt of a signal from a fire alarm box that was pulled on that particular circuit. The following locations of underground cable needs replacing; Purchase Street, Kempton Street, Acushnet Avenue, Aerial line to be replaced in area of Clark Street, Mt. Pleasant Street, Durfee Street and Richmond Street.

REQUEST: \$ 3,300.00

FIRE ALARM CABLE FOR INDUSTRIAL PARK AND ADJACENT AREAS: Eight Thousand feet (8,000) of six (6) conductor aerial cable to run from the existing fire alarm cable at Acushnet Avenue and Phillips Road. West and north on Phillips Road to the vicinity of Pine Hill Acres. Two conductors in this contemplated cable will connect to a circuit servicing the Polaroid Corp., the other four conductors will be used for existing and contemplated fire alarm box locations in the area west of Route 140 and from the Pine Hill area south to a point near Phillips Road.

REQUEST: \$ 3,000.00

FIRE DEPARTMENT

FIRE ALARM C & D BATTERIES: Batteries on fast time circuits to the stations need replacing. These batteries were purchased in 1956 and have a life expectancy of 14 years.

REQUEST: \$ 460.00

FOUR (4) BELLS: These bells are to replace old bells in stations that are over 50 years old and badly worn.

REQUEST: \$ 600.00

ONE TYPEWRITER: Considerable clerical work is processed in our main office and Fire Prevention Bureau. Due to the age and constant use, I recommend a replacement for the typewriter in the Fire Prevention Bureau. The older unit would then be handed down for use in one of the stations that presently does not have one.

REQUEST: \$ 250.00

FIRE STATION REPAIRS AND PAINTING: We have tried with the aid of the Building Department, to effect certain minor repairs and painting of certain stations. However, major repairs are urgently needed in several stations. At Station #9 water enters through the porous bricks on the south wall of the station and runs down the brick and plaster inside of bedrooms, severely damaging walls on the second floor. This condition has persisted for several years and should be corrected. We should begin a long range program of station repair to eliminate further damage to the interior of the station.

REQUEST: \$3,000.00

NEW 2 1/2 INCH HOSE: All of the 2 1/2 inch hose that was purchased in 1969 has been utilized by taking care of the acute shortage that existed. All engine companies now have a complete body change, but there is no hose in reserve to replace any hose that may need replacing during the next year.

REQUEST: \$1,200.00

FIRE ALARM TRUCK & RADIO: Half Ton pickup truck and radio for Fire Alarm Bureau to replace a truck that is 16 years old and is used for general fire alarm maintenance work on the fire alarm systems, fire alarm box testing, and other transportation for fire alarm use. Truck is also used on night calls by the man on call for trouble involving the fire alarm system.

REQUEST: \$3,300.00

FIRE DEPARTMENT

11L

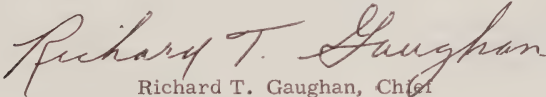

JET X FOAM NOZZLE AND FOAM SOLUTION: This device would be of immeasurable value in handling fires in fishing vessels, inflammable fluids, etc.

REQUEST: \$ 600.00

SIX WALKIE-TALKIES: These devices increase the efficiency of the department when working at fires covering large areas such as hospitals, factories, woods, etc. With walkie-talkie, information can be sent back to a command post or fire headquarters directly from anywhere on the fire grounds without having to come back to the apparatus radio.

REQUEST: \$ 3,800.00

Respectfully submitted,

A handwritten signature in cursive script that reads "Richard T. Gaughan". The signature is written in dark ink and is positioned above the printed name.

CAUSES OF FIRE - 1969

- 7 Accidental Ignition
- 12 Acetylene and blow torch carelessness
- 7 Arching wire
- 40 Burning food
- 6 Burning with a permit
- 42 Burning without a permit
- 15 Carburetor backfire
- 4 Careless use of candle
- 4 Careless use of inflammables
- 2 Careless use of matches
- 205 Careless smoking
- 178 Children with matches
- 14 Combustibles in contact with stoves, etc.
- 28 Defective and faulty carburetors
- 14 Defective wiring
- 2 Exposures
- 1 Fumes ignited by sparks
- 8 Hot ashes
- 1 Leaking gas pipes
- 9 Leaking gasoline, oil or kerosene
- 3 Overheated brake bands
- 3 Overheated drying machines
- 1 Overheated bulb
- 3 Overheated clutch
- 12 Overheated gasoline or electric motors
- 5 Overheated flatiron, electrical appliances
- 19 Overheated grease
- 11 Overheated stoves, ovens or fireplaces
- 6 Overheated stacks, pipes or chimneys
- 1 Overheated fluorescent transformers
- 24 Overturned street flares
- 17 Oil burners
- 14 Rekindles
- 4 Set by unknown persons
- 50 Short circuits
- 4 Sparks from incinerators
- 8 Sparks from stoves and fireplaces
- 2 Sparks from grinder
- 2 Sparks from trains
- 4 Spontaneous combustion
- 3 Undetermined
- 3 Under investigation
- 5 Wilful and malicious burning of property
- 2 Explosions
- 1 Suspicious origin
- 3 Broken hydraulic fuel line and duct in manufacturing plant

REPORT OF THE DIRECTOR OF PUBLIC HEALTH

In the annual report of the Board of Health for 1968 I touched upon many aspects pertaining to the unification of health facilities not only throughout the country but in the various states and, also, the regions within Massachusetts.

During the year 1969 a great deal of discussion has taken place but we seem to be rowing against the tides and winds. Everybody talks but nobody listens. A great many funds are being provided for the various programs within the city of New Bedford many of which contain outlines for providing health services outside the purview of the Board of Health. In spite of all the talk of unification for all public health programs we are still constantly fragmenting them throughout the community and placing these in the hands of people who know very little about public health.

Most of these programs are supposed to help the underprivileged and the poor and it seems that rather than helping them we are only confusing them and they know not in which direction to go after listening to all the agencies that are supposed to provide them with the myriad of services that we are constantly talking about.

I am reiterating, there is only one place from which public health programs should emanate and that is from the health department. If we wish to provide medical programs then the hospitals and the medical profession should join with us in making these services available. Instead of doing this we have organizations that are springing up overnight, all being promised a slice of the federal pie in the form of money to take care of some little segment of the public health and by the time the money gets down to where it might do some good it is all gone. How long is it going to take for us as a city, a state, a nation to stop vacillating about services that all the people need in this wealthy country of ours? A country that can well afford to give these services to everyone and yet not efficiently plan to provide these services so that they may reach the needy.

This department is constantly besieged by various federal and state agencies to establish new services in the field of public health without providing us with sufficient funds for continuing programs which will attract competent people who are willing to stake their future in this particular field. Instead, we are offered grants of one, two or three years in diminishing proportions with diminishing results.

At the present time, New Bedford is faced with a very serious problem because of the large influx of immigrants who come from countries or communities with a very high incidence of tuberculosis. The Board of Health is extremely hard pressed to convince these unfortunate non-English speaking people that they must abide by our instructions in order to protect the health and welfare of their families. This takes not only time and money but patience and personnel. Personnel which must be properly suited to meet these individuals who do not understand the ways of a new country. There are many nutritional problems that in many instances are due to intestinal parasites which infest the greater portion of our immigrant population.

I have tried to seek federal and state aid in relation to this serious matter and found no aid available. Yet we are running around helter skelter wanting to do everything in the field of air, land and water pollution when the very lives of these individuals are involved, not only the environment.

This city is sorely in need of a geriatric medical clinic for those elderly people who are unable to meet the expenses involved with their proper care and, therefore, are reluctant to seek both hospital and medical attention in time to carry on the last years of their lives in a decent fashion.

This department more than two years ago volunteered to set up a clinic facility in the Model Cities Area and provide nursing services since the Model Cities Program could obtain the money for a medical social worker who would administer this program. Nothing has been done in relation to this program except talk. It was my fond hope that once we started involving ourselves in the Model Cities Area we could soon start a geriatric clinic or perhaps an adult clinic, including our well child conferences and our vaccination and immunization clinics in this same locale. Try as we might we never seem to get off the ground because of the constant red tape in which we are involved when the federal government has a hand in such projects.

I am becoming bitter at the amount of money that is being expended perhaps I should say rather 'wasted' in so many directions in "supposed" public health programs without good direction and lasting results.

ALPHEGE LANDREVILLE,

Director of Public Health

Table 30

The Division of Minimum Housing Standards of the Board of Health is comprised of one Administrator, six Field Inspectors and two office Clerks.

Coding inspections and compliances with the provisions of Article II of the Sanitary Code of the Commonwealth of Massachusetts continues to progress at a reasonable level.

Investigations of referrals from other agencies and complaints from interested persons have continued at a very high level.

A breakdown of the activities of the Division are as follows:

Coding Inspections	
(a) Dwellings	2,830
(b) Dwelling units	6,062
Recalls and Rechecks	3,580
Violations	
(a) Dwellings	1,436
(b) Dwelling units	4,276
Compliances	
(a) Dwellings	1,218
(b) Dwelling units	3,635
Non-compliances Outstanding	
(a) Dwellings	218
(b) Dwelling units	641
Investigation of Complaints	434
Removal of Automobiles	77
Appeals	7
Court Cases	41
Condemned units and buildings	92
In process of rehabilitation	11
Rehabilitated	9

The work load is based on:

1. Systematic inspection to meet schedule established by the planning department.
2. Enforcement activity based on systematic inspections.
3. Investigation of referrals and complaints and special investigation of Leased Housing.
4. Enforcement activity and processing of inspections for Sycamore West project of Concentrated Code.
5. Court activity and Board of Health appeal hearings.
6. Participation on several committees.
7. Public relations, and Inspectors' training for Concentrated Code and Relocation.
8. Automobile removals.
9. Activity in relation to demolition.

GENERAL PROCEDURE

In order to comply with the systematic inspections time-table, it is essential that inspectors on systematic coding be assigned to this particular phase of the work exclusively.

Our operating procedures have been established based on the experience gained by actual operation and by organizing the office procedure. We have been successful in coordinating and blending the two into one very effective unit.

We continue to emphasize the need for personal contact with property owners and occupants as this operating procedure has increased the number of compliances and has reduced owner or tenant resistance.

INVESTIGATION OF COMPLAINTS

In addition to our regular systematic coding inspections, 434 complaints were investigated and acted upon. This figure represents an increase of 37 over that of last year. We can expect that this phase of our work will continue to increase based on past experience.

BOARD OF HEALTH

Referrals from other agencies continue to increase. Improvements and adjustments to meet the essential needs of the public are continually being made as more agencies which represent the poor are more frequently using the services of an effective Code Enforcement Program.

Several complaints were investigated and were referred to Legal Services of Onboard for rent withholding procedure.

The Welfare Department continues to work with us in placing clients in available standard units. Some of these clients create a special problem due to poor credit, undesirable habits and reluctance of some owners to rent due to previous experience with Welfare recipients.

Substandard vacant tenements continue to be placarded as unfit for human habitation to prevent occupancy by unscrupulous owners and tenants.

REMOVAL OF ABANDONED AUTOMOBILES

There were 77 abandoned automobiles removed this past year at no expense to the city. Several other abandoned automobiles were removed by the owners after our investigation. The number of abandoned autos does not seem to abate from year to year. The fact of this matter is that the number of abandoned autos seems to increase every year and our additional work toward the removal of these derelicts is well worth our efforts.

APPEALS TO THE BOARD OF HEALTH

The Board of Health heard and ruled on 7 appeals. Their decisions were carried out in every instance.

The Board is to be complimented and commended for their dedication to duty and desire to discharge their duties for the benefit of the Community.

COMPLIANCES

Compliances with the provisions of the Sanitary Code, Article II have continued at a reasonable level. Most of these compliances have involved extensive repair and installation which constitutes major work.

In spite of the shortage of tradesmen and the heavy schedule of those tradesmen available to do the work, inroads have been made and are continuing to be made into the backlog of work.

NON-COMPLIANCES

Our figure on non-compliances shows an increase which is understandable. This year we have coded the really bad areas of the city which caused an increase in the number of violations. Most of the corrections of these violations require major work and a very large percentage of the owners of these properties are now engaged in acquiring contractors who will do the work.

COURT CASES

There were 41 criminal complaints sworn out for violations of the Code. These complaints were filed only as a last resort and after all other efforts for compliances had been exhausted. There were 4 cases which involved renting of condemned units by owners who had been duly notified and condemnments placarded as unfit for human habitation.

CONDEMNED UNITS AND DWELLINGS

There were 92 units and dwellings which were condemned because they did not comply with the Minimum Standards of Fitness for Human Habitation. Of this number 9 were completely rehabilitated and 11 are in the process of rehabilitation.

MISCELLANEOUS

Basically our procedure in the implementation of the Sanitary Code, Article II continues as previously acknowledged after our re-organization. However, continuous adjustments are being made to meet the challenges as they present themselves.

Our rent withholding procedures, in cooperation with the Legal Services of Onboard, is well on the way to success. Pilot cases have been presented to the court and rulings made which were favorable to this approach for providing suitable housing for all our citizens.

The shortage of tradesmen to do work continues. Most tradesmen (painters - carpenters - plumbers - electricians) are booked for months in advance which hampers the progress of code compliances.

The quick sale of substandard property after notification to owners by this division continues at a brisk pace.

Our public relations have continued at about the same level as previously noted. Our speaking engagements with several interested groups coupled with department and agency relations have helped considerably in the success of the Code Enforcement program.

BOARD OF HEALTH

Regular participation in the functions of the Citizen's Committee on Urban Renewal and Development, Tenant Landlord Relations Sub-Committee and now the Committee on Hard-Core Family problems has been of mutual benefit in which some action is being taken to re-habilitate people and families in addition to housing.

In the past year, this division was involved in activities which were brought on by several groups and agencies concerned with better housing for minority groups. In this area, our work load was substantially increased. A coordinated effort by all agencies and groups to solve the many problems which arise from time to time is the ultimate goal which we strive for.

The Concentrated Code Enforcement program (Sycamore West Improvement) is accelerating so that a greater demand is being made on us in relation to enforcement of the code.

SPECIAL INVESTIGATION

The Division of Minimum Housing Standards conducted a special investigation of dwellings and dwelling units which are under the Leased Housing program in New Bedford during May of 1969 on orders from the Mayor.

CONCLUSION

In order to continue the effectiveness and efficiency of code enforcement by the Board of Health, Division of Minimum Housing Standards, I wish to make the following recommendations:

1. Civil service status for all our personnel through examination or experience under civil service rules.
2. Accelerate available programs through vocational training for the purpose of providing tradesmen to meet the housing demands.
3. Expand rent withholding procedures through Legal Services of Onboard and Municipal attorneys.
4. Provide more standard housing for larger families through re-habilitation, construction and rent subsidies.
5. The assignment of one City Solicitor to the office of Minimum Housing Standards for approximately one half day each week to assist in legal matters.

ANNUAL REPORT

First Annual Report of the

MODEL CITIES ADMINISTRATION

For the

Year Ending 31 December 1968

LETTER OF TRANSMITTAL

31 December 1968

To: Honorable Edward F. Harrington, Mayor
and Honorable Members of the City Council

Gentlemen:

Attached herewith is our Annual Report for the year 1968, during which time the City began its planning for the Model Cities Program, in competition with over seventy other cities, in an effort to vastly improve the quality of urban life.

Mandates from our constituents, and Federal guidelines, require that our planning be comprehensive, carried out in concert with citizens and agencies alike, and lead to more expeditious and innovative solutions to existing problems.

At the end of this year, the planning phase of the program is only approximately half completed, but we are pleased with the progress made. With your continued encouragement and support, the City's Comprehensive Demonstration Program will be one of high quality and will be completed on schedule.

We are grateful for your assistance and look forward to the year ahead.

Sincerely,
Richard A. Pline
Director

MODEL CITIES ADMINISTRATION

ANNUAL REPORT

Model Cities Administration

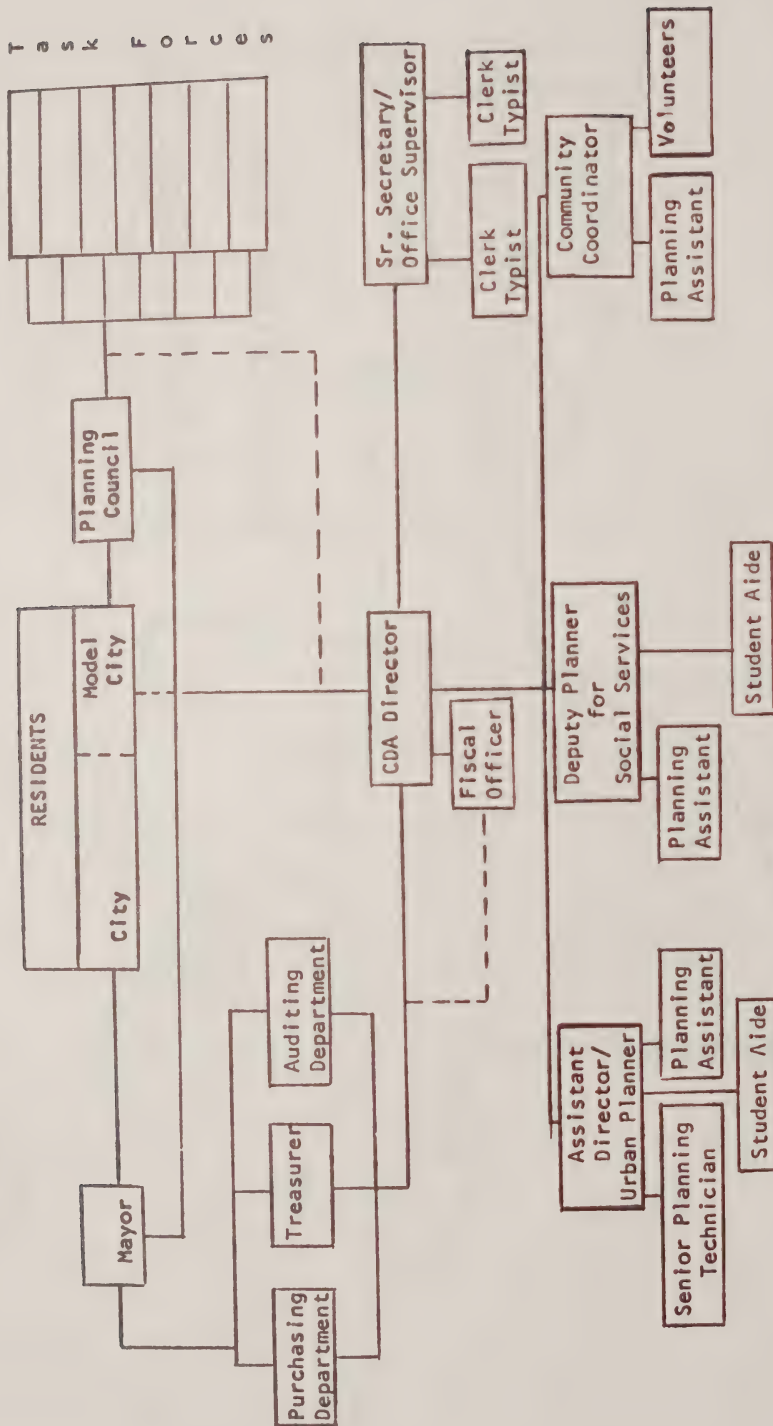

New Bedford, Massachusetts

For the Year Ending 31 December 1968

salary: \$14,000	
Benjamin B. Baker	Asst. Director and Urban Planner
salary: \$11,000	
M. Daniel Germano	Deputy Planner for Social Services
salary: \$11,000	
Joseph L. Valles	Community Coordinator
salary: \$8,500	
Norman E. Nichols	Fiscal Officer
salary: \$8,250	
Edith M. Mott	Senior Secretary/Office Manager
salary: \$5,200	
Beátrice Ramos	Clerk Typist
salary: \$3,640	
Candida J. Webb	Clerk Typist
salary: \$3,640	
Raymond A. Jenkins	Senior Planning Technician
salary: \$5,000	
Robert J. Alves	Planning Assistant
salary: \$5,000	
George A. Carmo	Planning Assistant
salary: \$5,000	
John E. LaBrode, Jr.	Planning Assistant
salary: \$5,000	
Dennis Cruz	Student Aide (Part-Time)
salary: \$1,040	
Barbara Lopes	Student Aide (Part-Time)
salary: \$1,040	
Margaret Lopes	Student Aide (Part-Time)
salary: \$1,040	

5. NARRATIVE REPORT

The City of New Bedford was approved for a Model Cities Planning Grant in March, 1968, several months after the majority of "first round cities". The original application for a Planning Grant was submitted by the City in April, 1967. The Model Cities Program is outlined in Federal Legislation called, "The Demonstration Cities and Metropolitan Development Act of 1966". The program is administered by the Federal Department of Housing and Urban Development (HUD).

The structure developed locally to administer the Model Cities Program is as follows:

The City recognized an elected Planning Council of twelve (12) members from the Model Neighborhood area (MNA) as the citizen's policy-making body. The Planning Council was elected in a "mini-election", supervised by the City Election Commission, on 27 February 1968.

The Planning Council prepared its own By-Laws, incorporated in the revised Work Program submitted to HUD in April, 1968, which gave the Planning Council final approval over all plans to be submitted to the City Council and the Mayor. It was decided during these actions by the City and the Planning Council, that new staff would work as the primary technical resource for the Planning Council. The Model Cities Administration is a branch of the Executive Department.

The purpose of the Model Cities Administration and the elected twelve member Planning Council, the Task Forces, and other citizen groups, is to respond to the problems of the Model Neighborhood Area by developing a Comprehensive Program which is scheduled to be executed over a five-year period to alleviate these problems by developing in-

notative solutions to them. While the Program is delegated to the City Government, there is a requirement for widespread citizen participation, and for dialogue between the City, its institutions, and the residents of the MNA.

The development of the Comprehensive Plan will be carried out over a number of months involving numerous meetings of Task Forces, Planning Council, neighborhood groups, and meetings with agencies and departments in the City. It is expected that the Comprehensive Plan will be completed and submitted to the New Bedford City Council during April, 1969.

The Model Neighborhood Area (MNA) contains approximately 15,850 people in the South Central and South portions of the City. It covers an area of 132 city blocks, or about 560 acres. It contains 5,614 dwelling units. The area is bounded roughly by School Street on the North, the South Terminal Renewal Area on the east to Potomska Street, then by the waterfront along the remainder of the eastern portion, to approximately the northern boundary of Hazelwood Park, then by the waterfront along Clarks Cove to Orchard Street, to Thompson Street, to County Street, back to School Street. The area is primarily residential in character, although it contains four strip commercial areas of neighborhood-oriented businesses. Industrial complexes are within the boundaries and are an integral part of the environment. Approximately one-third of the land area is used for residential and related purposes, with one-third developed for business and industrial purposes, and the remaining third being streets and highways or some undeveloped vacant land.

Some significant characteristics of the MNA are its ethnic mix and its increasing populations, mostly caused by immigration. Over half of MNA residents are of Portuguese descent, and represent a variety of Portuguese cultures. In addition, there are Cape Verdean and Puerto Rican

populations, and other recognizable ethnic groups are: French-Canadian, Polish, Afro-American, and English. There is generally a strong family structure and a good identity with the City and its institutions. The problems of the MNA have been well-documented in the City's initial application, and generally center on employment, housing, education, and recreation.

A Letter to Proceed was approved by the Department of Housing and Urban Development on 8 April, and the Planning Grant Contract on 21 June. In September the Planning Grant was amended, increasing the total program cost to \$160,812 including a \$32,162 local share. A total of \$25,000. in cash was supplied by the City toward the local share.

Other major steps were completed in stages as follows: April 1968; the Director began work. During June an office was established on West Rodney French Boulevard, and the Assistant Director and Urban Planner was hired. During June the Contract was signed with HUD and in July the Community Coordinator began work. In August the Social Planner was hired. Additional clerical staff was hired in the months between April and June. Additional staff consisting of a Fiscal Officer, three (3) Planning Assistants, and three (3) Student-Aides were hired during October and November, through an amendment to the Planning Grant which provided additional funds for these purposes.

To aid the Planning Council in involving more residents of the area and to develop plans for specific problem areas, several Task Forces were organized which will report their recommendations to the Planning Council for approval. The Task Forces are: Housing; Education; Recreation; Highway; Police-Community Relations; Youth; Health, Welfare, and Social Services; and Business, Manpower and Economic Development.

An additional form of assistance to the planning effort is a \$30,000.00 Federal share increase in the Community Renewal Program (CRP) which is being conducted by the City Planning Department. This amendment to the CRP will involve extensive survey work, both physical and social, which will further indicate problem areas in the MNA and compare such problems with other parts of the City.

One item of major concern to the Model Cities Program is a bill passed by the General Court, which exempts Model Cities Staffs in Massachusetts from the requirements of State Civil Service for a two year period ending 1 August 1970. Up to thirty (30) persons per staff will be exempt. Passage of this bill allowed greater freedom in hiring residents of the MNA and generally facilitated staffing of the program.

Assistance was provided to the Legislative Research Bureau in recommendations in areas relative to problems involved in conducting the Model Cities Program, and in outlining new legislation which would be helpful in developing new approaches to solving these problems.

A design contest was held to develop a symbol for use on all stationery, posters, and other printed information. Over seventy (70) entries were received and a three judge panel selected a winner and four honorable mentions. The contest attracted considerable interest. The winner, Mr. Philip Nichols, is an art student at the Swain School of Design.

The first of several planned briefings was held with the New Bedford City Council on 16 December. This was a joint meeting with the Planning Council and staff. The City Council was advised of progress of the planning effort to date, as well as objectives and general approaches in several areas of major concern.

Beginning in December, Issue Papers, prepared by the staff in cooperation with the Task Forces and Planning Council, were discussed in several workshops with the Planning Council. Issue Papers dealt with specific problem areas such as education and housing, and were drafted so as to develop detailed dialogue on basic problems in the MNA. When these Papers are fully discussed, they will be redrafted and combined with updated data to form the basis for Part I of the Comprehensive Plan, which is known as the Problem Analysis. From this will be developed goals and objectives and general program approaches. Part II of the Plan will then outline, for the stated goals and objectives, fiscal needs for the five-year execution period, Part III will detail the projects and activities proposed to meet the goals and objectives of Part II, and propose the cost and administrative structures to carry on this work for the first action year.

While the planning effort as of the date of this report, has only begun, several major areas have been identified for concentration, and brief statements concerning these areas are as follows:

1. The Model Cities Administration is participating in a broad interagency effort to deal with certain crisis situations which various families have had regarding finding adequate housing. Some of the problems encountered by such families have to do with lack of available housing and need for social services.
2. Discussions have been held regarding the coordination and concentration of certain social services in the MNA with a view toward developing a Multi-Service Center.
3. The extension of the JFK waterfront arterial highway has been discussed by reviewing the proposed route outlined in the Master Plan for 1980, and examining possible alternate routes which might assist

in the redevelopment of the South Water Street Area. The extension of the highway would not be a Model Cities activity, and probably would not occur for possibly five to ten years from the present date, but adequate planning must be done in order to coordinate other action programs.

4. The Housing Task Force has identified an area in the northern portion of the MNA, adjacent to the South Terminal Renewal Area, as a site for a limited renewal program where new housing could be constructed first without demolishing inhabited structures.
5. The Education Task Force has defined a number of areas of concern, including initial adjustment of children to school, a very high failure rate in the early grades, precipitating a high dropout rate at the secondary level, and curriculum development. Examination of the older physical facilities is continuing and will be related to a proposal to relieve racial imbalance which exists in three (3) of the six(6) elementary schools. A consultant has been selected to assist in the analysis of educational problems in the MNA, and to propose solutions and alternatives.
6. It has been found that MNA residents are in need of counselling services related to housing, which would include information on existing and future programs, as well as financing, housekeeping, budgeting, and access to information on rehabilitation. Consideration is being given to the establishment of a counselling and financial assistance center which could provide these services to all MNA residents.
7. The Recreation Task Force has focused attention on land known as the Standard-Times Field, where physical improvements and additional supervision would assist in completing efforts to make this a community recreation area.

8. Efforts are being made to study the needs of new and developing businesses in the Rivet and County Street areas, and to provide for the improvement and renovation of the South Water Street area. In addition, recent problems in the fishing industry have led the Business, Manpower, and Economic Development Task Force to consider what studies or programs might be of assistance in strengthening this industry.
9. The Police-Community Relations Task Force is planning a pilot program in police-community relations to develop dialogue between members of the Police Department and residents of the MNA.

The Department of Housing and Urban Development has notified the City that the original target figure of approximately \$1,205,000 for supplemental funds to execute the first year of the Program will be increased to \$2,109,000. This figure is not a reservation or a commitment, but is a planning figure so as to assist the City in developing projects and activities for the first year.

As of this time, analysis of the original planning schedule indicates that the planning efforts are on target and that good progress is being made.

6. COST CONTROL STATEMENT
As of December 31, 1968

Cost Control Account Number	COST CATEGORY (List each Project and Activity Separately) (For Planning Phase list each Budget Activity Classification)	BUDGET ESTIMATES		COSTS INCURRED

ANNUAL REPORT

OF THE

INSPECTOR OF WIRES POLICE SIGNAL SYSTEM STREET LIGHTS

To The City Council

For the Year 1969

BAKER PRINTING

1970

ANNUAL REPORT

New Bedford, Massachusetts

July 24, 1970

To the City Council of the City of New Bedford:

Gentlemen:

I respectfully submit the annual reports for the departments of Inspector of Wires, Police Signal System and Street Lights for the year 1969.

Pole and underground petitions from the New Bedford Gas and Edison Light Company and the New England Telephone and Telegraph Company numbering 84 were investigated and reported to the City Council.

During the year, 243 inspections were made after fires, a decrease of 55 under 1968. Electrical fire and potential fire hazards are found daily by our inspectors. 1983 reports of defective wiring were sent out and 22 red tags were applied to defective equipment and wiring, the use of which was denied. Defective wiring and hazards are being corrected every day. There is no doubt that through the work of the inspectors of this department there is a certain number of possible electrical fire causes that are eliminated.

The total number of inspections made were 5560, an increase of 293 over 1968. Inspections of new buildings were 60, requests for inspections 2352, and permits issued were 1983.

Among the larger installations that were inspected were:- Holiday Inn, Twin Cinema Theatres, Polaroid in the Industrial Park and the completion of St. Luke's Hospital.

Due to the increased work load it will be necessary for me to include in the 1971 budget the cost of two additional inspectors and one office clerk.

The annual Christmas Display was erected on the Harold H. J. Clasky Memorial Park (formerly the Common) and was visited by not only the residents of New Bedford but from the surrounding cities and towns. The following city departments contributed their help to make the display a success: Public Works, Water Department, Fire Department, Police Department, Park Department, Civil Defense, Police Signal System, Building Department and New Bedford Vocational High School.

Through the courtesy of New Bedford Vocational High School Director Walter Janiak, the students from both the Electrical and Carpentry Departments erected the buildings and installed the wiring for the many displays.

The display was opened on December 9th and on December 27th was closed due to the extensive damage done by vandals during the night of December 26th. The amount of damage was estimated to be over \$9,000.00. The pleasure of a few had spoiled the pleasure of all the adults and children who had planned to visit the Harold H. J. Clasky Memorial Park.

Mrs. Josephine Kosciukowicz was appointed Junior Clerk and Typist on February 10, 1969.

Two new 1970 Chevrolets were purchased in December. These cars replaced two older cars both in poor condition.

The following is a breakdown of the work completed this year :

2 W receptacles	3776
3 W receptacles	222
New buildings	60
110V motors	11
220V motors	42

POLICE SIGNAL SYSTEM

Plans are progressing for the installation of the following traffic signals early in 1970 as follows:

Allen St. and Cottage St.
 Belleville Ave. and Coggeshall St.
 Acushnet Ave. and Nash Rd.
 Brownell Ave. and Hawthorn St.
 Ashley Blvd. and Nash Rd.

Permits for the above installations were issued by the Massachusetts Department of Public Works on October 9, 1969.

The following traffic signals located in the South Terminal have been turned over to the City:

John F. Kennedy Memorial Highway and Conway St.
 John F. Kennedy Memorial Highway and South St.
 and First St.
 MacArthur Drive and South St.
 John F. Kennedy Memorial Highway and First St.,
 Water St. and Potomska St.

These signals are presently on flashing operation and will be operating as Stop and Go signals upon completion of the next phase of the South Terminal Project.

At the end of the year there were 33 intersections equipped with traffic signals.

The Police Signal System Repair Shop and Garage are still located at 213 North Water St. in the buildings vacated by the Water Department. The North Terminal Project and the City Connector construction will force us to find new quarters in 1970. A request to the City Council in December for \$50,000.00 for construction of new quarters was turned down due to a technicality as to use of certain funds.

The following is a breakdown of the work performed by the Police Signal Electricians :

Station No. 1 - Repairs	7
Inspections	10
Station No. 5 - Repairs	3
Inspections	8
Police Boxes - Repaired	23
Underground Cables - Repaired	20
Overhead Lines - Repaired	71
Inspections	16
Cross Arms - Changeovers	42
Traffic Lights - Repairs	75
Inspections	300
Painted	30
Police Boxes - Painted	30
Traffic Signal Lamps - Replaced	684

In addition to our regular work, installations and repairs to electrical systems for the following departments were made: School Department, Public Works, Police Department, Water Department, Park Department and Board of Election Commission.

The department also contributed to the erection of the Christmas Display at the Harold H. J. Clasky

Memorial Park. Malcolm Tripp performed an excellent job in his supervision of the laborers in the erection of many of the displays. Eugene Lorenzo and Ronald Yates are to be commended for their setting up and the lighting of several of the large displays.

Assistant Police Signal Electrician Ronald Yates was absent 4 months due to military service.

The operating expenses for the year were:

General Expenses	\$16,537.55
Salaries and Wages	17,318.81
Total	\$33,856.36

STREET LIGHTING

New Mercury lighting was installed on Rockdale Ave. from Cove Road to Allen St. A total of 44 new Mercury lights were installed during the year and 52 - 1000 lumen lights were increased to 2500 lumens.

It is hoped that in 1970 an additional expenditure of \$13,000.00 in the budget will be approved for increasing the remaining 1639 - 1000 lumen lights to 2500 lumens.

The Street Lights Committee approved my design and layout for new street lighting in phase #2 of the South Terminal. This new lighting will be installed in 1970.

Street lighting installations in the Pine Hill Acres development have been completed and new lighting is being installed in the Briarwood area.

Modern lighting should be installed on Acushnet Ave. north of Braley Road to the City line in 1970. This will depend on the limitations of the budget.

INSPECTOR OF WIRES

At the end of the year there were 6065 street lights in operation in the City of New Bedford as follows:

1639 - 1,000 lumen O.H. Open	@ 23.76 per year
2135 - 2,500 lumen O.H. Open	@ 31.32 per year
270 - 2,500 O.H. Enclosed	@ 34.02 per year
910 - 2,500 lumen Post Top	@ 34.02 per year

CITY OF NEW BEDFORD
BOARD OF PARK COMMISSIONERS

3 q

December 31, 1969

To the Honorable City Council:

Gentlemen:

The Seventy-Sixth Annual Report of the Board of Park Commissioners on Parks together with reports on Bath Houses, Playgrounds and Militia under the control of this Board is herewith presented in accordance with provisions of law for the fiscal year ending December 31, 1969.

The Board held twelve regular and four special meetings during the year. They had organized in May, 1968, for the ensuing year and had elected Manuel P. S. Macedo as chairman and Carl R. Anderson, secretary.

John W. Clauretie of 546 County Street was awarded the Buttonwood Park concession for one year, beginning June 1, 1969, and ending May 31, 1970, for his bid of Four Thousand Dollars, (\$4,000). The only other bidder was Lloyd B. Miller of 1598 Purchase Street who submitted a bid of \$3,515.00.

Mr. Miller was granted concession rights at Brooklawn Park for three months, from January 10, 1969, through April 30, 1969, for his bid of Fifty-Eight Dollars (\$58.00). He was the only bidder.

Another Brooklawn Park concession permit was awarded to Mr. Clauretie for one year beginning June 1, 1969, and ending May 31, 1970, for his bid of Four Hundred Dollars, (\$400.00). Mr. Miller submitted a bid of \$116.00, and the Whaling City Little Baseball League, \$1.00.

Permit for refreshment concession rights at Victory Park Warming House were awarded to Mr. Miller for the period of time from January 10, 1969, through April 30, 1969, for his bid of Eighty-five Dollars (\$85.00). Mr. Clauretie, the only other bidder submitted a bid of \$1.00.

The Whalers City Post 3196 Veterans of Foreign Wars erected a memorial near the gate of the former Job Corps at East Beach to P.F.C. Charles A. Gaudreau, a city veteran, killed in Vietnam, June 12, 1968. Samuel Weedall, Jr. chairman, and Commander Joseph Cardoza, of the organization made the formal request to Board members September 25, 1968.

The Common was renamed "The Harold H. J. Clasky Memorial Park" and dedicated on October 12, 1969, as a tribute to the former state senator and city councillor who died January 29, 1969. The name change was suggested by Mayor Edward F. Harrington as a "permanent memorial" to Mr. Clasky for 20 years of devoted public service.

PARK DEPARTMENT

The South End Youth Athletic Association, formerly known as the South End Little League Association, was granted a five-year (5) license for use of the land situated on the west side of Brock Avenue at the corner of Coral Street (said lot being known as Lot 12).

The City Property Committee transferred the old bridle path along the east side of Brownell Avenue adjacent to Buttonwood Park to the Park Board, during the year.

Plans covering a five-year period, were submitted by Model Cities Administration and endorsed. The City Planning Department is to have the responsibility for the design of specific projects and the Park Board is to be responsible for their implementation. The first areas to be redesigned are Monte Playground, Ashley and Beauregard Parks, and the Hurricane Dike area.

Plans and specifications for the improvement of Buttonwood Park, to be drawn up by the architectural firm of Owen F. Hackett Associates, were approved; and the New Bedford Planning Department was authorized to solicit bids for the project, to be paid by funds approved by the Bureau of Outdoor Recreation.

A contract totaling \$ 190,232 for the Buttonwood Park Redevelopment Project was awarded to Plantland Construction Co., of Riverside, R. I. The contract calls for completion of the work in one year. The cost of the project will be paid on a 50-50 basis by the City and Bureau of Outdoor Recreation of the U.S. Department of Interior.

Buttonwood Park was renamed "Veterans Memorial Park at Buttonwood" inasmuch as Two Hundred Thousand Dollars (\$200,000) from the Soldiers and Sailors Memorial Fund has been earmarked for the construction of an animal display house for the elephant, lions, kangaroos, and seals. The World War I Veterans were also being granted land space within Buttonwood Park to erect a memorial building.

The combined efforts of the Girl Scouts, the New Bedford Y-Teens YWCA Service Corp, other youth organizations and the Coca Cola Company, which donated \$500.00 toward the project, resulted in the beautification of Marine Park. A dedication service was held on October 18, 1970.

The Fairhaven Improvement Association pledged a \$800.00 donation to the Planning Department for the beautification of Marine Park. This grant was given with one stipulation, that cobblestones donated by Campanella Corp. be placed at the base of the flag pole at Marine Park and enclosed with a swinging wrought iron chain link fence, instead of the proposed chain link fence to be erected.

PARK DEPARTMENT

5 q

Stanley A. Brown d/b/a The Whaling City Country Club was granted approval to increase adult membership rates from \$100 to \$125 annually, effective January 1, 1970.

The Whaling City Little League absorbed all costs, and constructed a coop, two dugouts and installed a four-foot chain link fence 30' on each side of the backstop on the Brooklawn Park #4 diamond. An electric wire was also installed from Vernon Street to the coops by certified electricians.

Members of the Ricketson House Restoration Committee, Chairman Stephen C. L. Delano and Mrs. Delano, Mrs. Gertrude Tucker and Peter Grinnell, were granted one year to organize and get plans underway for the restoration of the house.

The New Bedford Zoological Society held its two-day Annual Field Day at Buttonwood Park over the Labor Day weekend and realized \$3,000.00 from the event.

The department participated in the 1969 Kiwanis Spring Flower Show held at the Lincoln Park pavilion with a display that included an "S" path through purple ageratum and brilliant red geraniums with six small yews adding height at key spots.

Buttonwood Park Zoo received a pair of gray kangaroos, a gift from the Lone Pine Koala Sanctuary, located at Indooroopilly, Brisbane, Queensland, Australia. The Rotary Club of New Bedford met the transportation costs for the two animals from Brisbane to New Bedford. Ralph Schmarsow, a director, of the New Bedford Zoological Society, was instrumental in the acquisition of the kangaroos.

A three-car single engine Children's Zoo Express train was purchased for \$8,000 from John D. DeSalvo of Ashland, Mass., and installed at Buttonwood Park. The gross receipts after its installation in June through November 25, 1969, were \$11,362.60.

The Pvt. A. Poirier Post VFW and other veteran organizations made use of Brooklawn Park for Operation Speakout from 1-4 p.m. November 30. The demonstration was in support of government policy and the fighting men in Vietnam.

The Wampanoag Chapter of the North American Family Campers Association made use of Marine Park for a camping exhibit June 20-22.

The Exchange Club of New Bedford held its Annual Seafood Festival at Marine Park, August 4-12.

"A Citation of Merit" was presented to Board members by Mrs. Hope Bean, assistant director of Progress of the North End Community Center of OnBoard, for the Boards assistance and cooperation for the sponsorship of the 1969 Summer Youth Happenings, at Brooklawn Park.

PARK DEPARTMENT

Leo J. Ciborowski, park keeper was appointed August 17, 1969, Assistant Superintendent of Parks after taking a qualifying exam for the post.

On August 7, 1969, Superintendent Henry J. Wareing was stricken in the office and was pronounced dead on arrival at St. Luke's Hospital. Mr. Wareing became park superintendent in August, 1968, filling a vacancy created by the death of Edward W. Barrett.

Appropriations and expenditures for the entire year are shown in the various tables incorporated in this report.

The Board of Park Commissioners thanks the Mayor and the City Council for their interest and encouragement and also thanks the heads of the city departments who contributed in any way to make the work of the Park Department a success.

Respectfully submitted,

MANUEL P.S. MACEDO, Chairman
CARL R. ANDERSON, Secretary
FRANK VIEIRA

RIFLE RANGE

Military utilization of the New Bedford Rifle Range in 1969 was at a minimum due to the induction of its prime tenant, the 211th Artillery, Army National Guard Battalion; to active duty. The 489th Engineer Battalion, U.S. Army Reserve; 2 U.S. Naval components, and 2 U.S. Coast Guard units were instructed in organized classes in the actual firing of small arms during the summer months.

Local Police Departments held classes on the offensive and defensive use of the weapons in their arsenals. Police recruits were introduced to the combat firing of equipment used by Law Enforcement Department. Veteran organizations, Boy Scout Units; Rifle and Pistol Clubs, with their instructors and permit holding civilians also used the range.

Maintenance involving brush and grass cutting plus minor repairs were carried out.

Respectfully submitted

ARTHUR LEE, SMC. USN, Retired
Range Control Officer

PARK DEPARTMENT

December 31, 1970

To the Honorable Board of Park Commissioners:

Gentlemen:

All of the improvements consummated in 1969, were instituted by Harry J. Wareing, park superintendent, at the time.

I would certainly be remiss not to mention the fact that several projects not completed should certainly be credited to his forethought and diligent work.

The fact, that the undersigned did not assume this position until April 1, 1970, makes it necessary to compile this report from notes submitted by the Park Keepers and Leo J. Ciborowski, assistant superintendent of parks.

In January, 1969, the Park Department was presented a pair of kangaroos and this called for extensive renovations to accommodate these acquisitions.

The interior of the Brooklawn, Buttonwood and Victory Park Warming Houses were painted.

The new Kiddee-Korral playground was installed at Brooklawn Park - a much needed facility to accommodate the pre-school children.

A flagpole and monument were erected at the newly named Harold H.J. Clasky Memorial Park.

Two new basketball courts were installed, one at Brooklawn and one at Buttonwood Park.

The new Miniature Train was installed at Buttonwood Park, zoo area, and became an instant "hit" with the public. Two cement block buildings were erected at Buttonwood Park to house aoudads and deer.

I would like to sincerely thank the Board members, Leo J. Ciborowski, assistant superintendent, the Park Keepers, Helen K. Aguiar, head administrative clerk, and the office staff for their help and kindness in all matters during my brief tenure with this department.

Respectfully submitted

EDWARD J. LONEY
Acting Supt. of Parks

PLANNING BOARD REPORT

City of New Bedford

March 17, 1970

To the City Council of the City of New Bedford.

Gentlemen:

The Planning Board submits its Annual Report for the year ending December 31, 1969.

Fifteen meetings were held during the past year for the purpose of holding hearings on changes on the zoning map. Eighteen petitions for proposed zoning changes and one ordinance and two amendments were received for consideration by the Planning Board.

A summary of the cases with the action of the Board therein is set forth in the following table.

EDMUND J. TOOMEY

Secretary

PETITIONS FOR ZONING CHANGES

<i>Location</i>	<i>From</i>	<i>To</i>	<i>Recommendation by Board</i>	<i>Date of Meeting</i>
10. Change in the zoning classification of a parcel of land located on the south side of Victoria Street, west of Ashley Boulevard being Lots 11, 13, 14, 15, 16, 17, 18, 19, on said Plot 130B.	Residence B	Business	Granted	September 22, 1969
11. Change in the zoning classification of property located on the south side of Campbell Street, numbered 18.	Residence B	Business	Denied	September 22, 1969
12. Change in the zoning classification of land situated on the westerly side of Ashley Boulevard beginning at a point approximately seventy-seven feet more or less from the north line of Menton, extending northerly five hundred forty-eight feet more or less, along the westerly line of Ashley Boulevard.	Residence A	Residence C	Denied	October 27, 1969
13. Change in the zoning classification of property located on the west side of County Street, between Robeson and Hazard Streets. (11 Robeson St.)	Residence B	Business	Tabled Denied	October 28, 1969 December 4, 1969
14. Change in the zoning classification of property located on the north side of Winsor Street, west of County Street. Plot 24 lot 86 and 106.	Residence C	Business	Granted	November 24, 1969
15. Change in the zoning classification of property located on the west side of Belleville Avenue, north of Howard Avenue. (789 Belleville Avenue)	Residence B	Business	Granted following amendment: That Plot 116 Lot 16 to be rezoned Business eighty feet (80') back or west of the west line of Belleville Avenue only.	November 24, 1969
16. RESOLUTION AMENDING THE STATE AIDED INDUSTRIAL PARK PROJECT. #121-3.				November 24, 1969

Whereas, the New Bedford Redevelopment Authority has found that this area is a blighted open area within the meaning of Chapter 121B of the General Laws of the Commonwealth of Massachusetts;

Whereas, the proposed redevelopment of said area consists of the clearing, filling of land, road construction, water and sewer installations, and other site improvements, the cost of which is estimated to be a minimum of \$2,208,104.36 together with other necessary work;

Now therefore be it resolved by the Planning Board of the city of New Bedford that the Amendatory Redevelopment Plan as attached hereto is based upon a local survey and that such amendatory plan is consistent with the Comprehensive Plan for the City of New Bedford as a whole within the meaning of Chapter 121B Section 48 of the General Laws of the Commonwealth of Massachusetts.

17. Change in the zoning classification of a parcel of land west of Church Street and south of Tacoma Street.

18. Change in the zoning classification of property on the east side of Phillips Road, north of Pembroke Street.

Industrial A	Residence C	Granted to acres only.	10.8	November 28, 1969
Residence B	Residence C	Granted		December 4, 1969

REPORT OF THE CHIEF OF POLICE

REMARKS

The foregoing report is self-explanatory with relation to the recording in numerical form the routine activities of those who comprised the New Bedford Police Department during the year 1969.

It is next to impossible to establish or record in arabic numerals the tensions, heartache, pathos, and justifiable punishments; or the enlightenment, joy and relief from human suffering that comprise the actual accomplishments of a department so closely associated with those citizens it exists but for to serve.

So be it for the year 1969 and in looking forward to the year 1970 we will hope and strive toward an up-dating of equipment, personnel, morale and, above all else, the public image of the New Bedford Police Department.

There is nothing more vital to the well being of a community than the protection of the lives of its people, and nothing more important to the people of the community than their security in the use of their property, and their safety in moving from place to place at all hours of the day and night. This we will try to achieve.

New programs, education, planning, procedures, equipment and approaches to problems confronting the community and the department will find the answers as to success or failure in the yearly report for 1970.

OF THE

CITY PURCHASING

DEPARTMENT

CITY OF NEW BEDFORD

MASSACHUSETTS

For the Year 1969

December 31, 1969

The Honorable Mayor and City Council
City of New Bedford
New Bedford, Massachusetts

Gentlemen:

We have the pleasure of submitting to you our report for year 1969.

All City departments have been most cooperative in our efforts to give all qualified bidders an equal opportunity to bid in order to obtain for the City the maximum value for money expended.

Your support and cooperation in our efforts to conduct all purchasing activities in accordance with the laws and ordinances of the City has been invaluable and most gratifying.

Respectfully submitted,

FERNANDO P. CRUZ

Purchasing Agent

VOTED: That the Secretary be directed to prepare and edit the annual report of the School Committee for the year 1969 and that 800 copies of the same be printed.

The following report for 1969 is respectfully submitted:

Office of
Superintendent of Schools
New Bedford, Mass.

December 26, 1969

Honorable School Committee
New Bedford, Massachusetts

Mrs. Ferreira and Gentlemen:

In accordance with the laws of the Commonwealth and the adopted policy of the New Bedford School Committee, I have the honor of submitting my ninth annual report as Superintendent and the one hundred and ninth annual report of the New Bedford Public Schools.

Controversy, curriculum developments, culmination of long hours of hard work in planning a new high school, new personnel, these and many more events can be related to characterize the past year as another year of change but especially one of accelerating change.

This was the year when in January authority was granted to preload the site for future development of a senior high school and it was on December 4th that the bids were opened for the General Contract with the low bid at \$15,547,000. This was the year when three more relocatables were purchased to help with the space problems in the elementary grades especially at the Campbell School (two relocatables) and at the Ottiwell School where we added one to the four already installed but more space problems are forecast.

Again, this year all directors, coordinators and principals participated in a self-evaluation of their duties and responsibilities. As a result, we now have current job descriptions at each level.

This was perhaps the first time in history that we closed the schools for storm conditions for three days in a row and for the first time in history we closed the majority of the schools for a teachers' strike beginning on September 2nd and not ending until September 15th.

The Model Cities Educational Component as part of the total application was submitted this year and approved by federal authorities. While two schools are envisaged in the educational component, two other elementary schools were placed on the priority list for construction, one in the North End off Braley Road and one in the South End on property reserved from the former so-called "Poor Farm" area. The architect for the Braley Road School has been appointed and background material necessary to writing educational specifications is being collected. The work on the Model Cities Schools is awaiting the arrival of the letter of credit from the federal government.

Two leaders in the New Bedford Public School System for years, leaders who were revered and valued, were lost to us when on April 21, 1969, Dr. John T. Barrows died and on April 23, 1969 John F. Gracia died.

Dr. John T. Barrows was a member of the New Bedford School Committee serving from 1941 to the time of his death. He had been Vice-Chairman of the Committee in 1944, 1951, 1955, 1960 and 1965.

Dr. Barrows, a dentist with office on Thompson Street, was well known in the entire community, participated in many community activities, especially those contributing to the educational and civic betterment of the youth. His work on the School Committee and his work in the community will long be remembered.

Mr. John F. Gracia was principal of New Bedford High School at the time of his death. This is the school from which he was graduated and the school to which he returned as a teacher and was promoted to principal in December, 1955. Previously, Mr. Gracia had taught in the junior high schools and had been an assistant principal at Roosevelt Junior High School. During World War II, he served with the U. S. Navy and saw most of his duty in command of a mine sweeper in both the Atlantic and Pacific areas. He was separated from service with the rank of Lt. Commander. Mr. Gracia was the type of educator who expected much but gave more. The full extent of his influence on the lives of literally thousands of young men and women will never be known because his energies and interests in helping young people never stopped on the date of graduation. If there ever was a person who devoted his life to New Bedford High School and died in the line of duty, it was John F. Gracia.

One of the major sources of difficulty in the new set of relationships established by Chapter 763 of the Acts of 1965 giving Public School employees the right to bargain is that on the one hand the employees claim they must have final and binding arbitration since they have not the right to strike. On the other hand, the School Committees sincerely claim that since they are elected to the responsibilities of their office as defined by the General Laws, they cannot delegate that responsibility to a third party other than the courts of the Commonwealth. To this end the New Bedford School Committee has requested the City Solicitor to initiate action through the Superior Court of the County of Bristol so as to obtain a declaratory judgment defining how much authority School Committees can release to a third party for the purposes of arbitration.

This judgment should eliminate some of the misunderstandings but in the event this judgment is not satisfactory to both parties and with the realization that such judgments usually are not, it is suggested that a parallel study be made, i.e., continuing at the same time, for the purpose of giving serious consideration to the Massachusetts Board of Education or its delegate to serve in the capacity of a third party between School Committees and their employees if and only if they have exhausted all other means of negotiations. In this manner, the School Committee would be deferring only to the Board of Education to which they defer for minimum standards of educational procedures and the employees would be deferring to a Board or its delegate which has for its main purpose the reason for which they are employed, namely, education. Undoubtedly, some legislation would be necessary to accomplish this end and even if adopted, it would never supplant the one necessary ingredient in all such relationships, i.e., responsible leadership on both sides of the bargaining table.

Because of negotiations and related problems the budget was not only presented after the first of the year but also two supplementary budgets were submitted, one in June to cover salary raises for Civil Service Personnel and one in August to cover professional certified personnel. However, it is well to note that in the main budget these additional personnel were authorized and subsequently appointed:

- 2 Elementary School Adjustment Counselors
- 1 Psychometrist

- 2 Senior High Teachers (1 Distributive Education)
- 3 Junior High School Teachers
- 3 Elementary Teachers
- 1 Vocal Music Teacher
- 13 Elementary Science Coordinators
- 4 Mechanics
- 4 Mechanics Helpers
- 2 Custodians

The appropriation for this calendar year, 1969, amounted to \$8,321,012 as compared with \$7,442,684 for 1968, approximately an 11% raise.

On the other hand, with the immigration still continuing at the same level of approximately 400 non-English speaking children entering our school system each year, with the closing of St. Kilian's parochial school, with the threat of more private schools closing plus the rising cost of materials, supplies and salaries . . . the size of the present budget shrinks in comparison with the size of next year's problems.

Here are some of the trends and facts which pose inescapable problems even though the solutions may be elusive and expensive:

1. Enrollment as of October 1, 1960 — 14,190
Enrollment as of October 1, 1969 — 16,292
2. Seven school buildings still in use were built before 1900. Sixteen school buildings in use were built on or before 1922.
3. The administration building was built in 1851 and is not only functionally inadequate but incapable of modification from an economy viewpoint.
4. Enrollments will continue to rise as long as immigration continues, and no end is in sight.
5. Parochial schools are due for a major re-structuring which will inevitably increase our enrollment.
6. Racial balance in the Cook School district will not be aided by the Model City project.
7. Increased housing developments in the north end, in the Brooks School district, in the south end require school construction.
8. Junior high school enrollments are now being affected by immigration, parochial school trans-

fers and in-city migration. Space allotments have reached the critical stage.

9. Curriculum developments, increased specialization, state requirements, and pressures from citizen groups for specialized programs have added to the space allotment problems on the elementary level, placing this area in the critical stage.
10. The structural pattern or table of organization now used to administer the school system is not adapted to a fast moving and growing school system of the 1970's and hence, it should be changed.

This is not the place for a long-range, in-depth solution to the problems posed. However, this is exactly what is needed, namely a long range, in-depth study and proposals submitted to the School Committee for action. The proposals for necessary steps to be taken to meet 1970 problems now because of the inability to wait any length of time will be submitted as budget proposals.

The most commonly used word today in discussing educational problems, especially in the field of curriculum development, is "relevant." Yet with the accelerating change in our pluralistic society, very seldom can our critics or our advocates agree and say "relevant to what?" The ancient Persians taught their youth to ride, to shoot and to speak the truth. Upon that "relevant" curriculum they built a substantial empire. These are hardly the skills we need today but the virtue of telling the truth should still be "relevant" — but is it?

Never before have so many forces . . . for so many diverse reasons . . . tried to shape what is taught in the public schools. Voices from every corner of the nation are calling for revision, reform and relevance. To these imminent difficult problems, no quick, easy answers will be found. There are no answers found on the placards carried in anger, nor are they in the back of the book. The only true answers must come from the back of the head.

A Superintendent of Schools can never say nor should he say that he alone has accomplished a particular goal. This year with its many accomplishments and its trials involved many hours of labor on the part of many individuals. To the many who have labored with me, I express my sincere appreciation. To the School Committee I wish to express my thanks for the courtesies they have extend-

ed to me. To those members who are terminating their service with the Committee, I want them to know their years of service are valued and the record will ever show the excellent quality of their contributions as citizens of the community.

Respectfully submitted,

JAMES R. HAYDEN

Superintendent of Schools

THE NEW BEDFORD HIGH SCHOOL

ANNUAL REPORT

DEPARTMENT OF SECONDARY EDUCATION

Nostalgia summons up memories of days when the challenge of educating the young could be met with a one-room building, a teacher, simple furnishings and meager supplies. Nostalgia fails to reckon with the changes in the world school children face once they leave the classroom. To meet the challenge of educating the young in the City of New Bedford demands a new \$18,000,000 high school, extensive alterations and additions to existing schools, new and revamped programs of study, additional teachers and expanded in-service training of teachers now in service.

The challenge posed by the unparalleled teachers' strike is behind us. But the challenges posed by the need to create schools and a curriculum capable of meeting the variety of needs of New Bedford school children still lie ahead.

Our new high school, for which the School Committee awarded a construction contract on December 4, will give New Bedford a physical plant of which any city could be proud. It will, hopefully, offer a curriculum to match its physical excellence and to meet the needs of every secondary school student in New Bedford. But the new high school will not satisfy other needs in other schools. At Normandin Junior High School, enrollment has reached 1,300 pupils. There is not one unoccupied classroom in the school and two newly-named teachers must meet their classes in such rooms as are temporarily available. Projections suggest the enrollment will increase by at least 50 students and perhaps more; with the city's growth largely centered in the North End, increases will be inevitable every school year in the foreseeable future.

The only wholly satisfactory solution to the space problems at Normandin is the erection of a ten-room addition. With a prospective enrollment of 1,400 to 1,500 pupils by 1975, such an addition is imperative. The changing of school boundary lines is no answer; it shifts, but does not alleviate, space shortages. The use of portable classrooms must be viewed as a temporary stopgap, not as a permanent solution.

At Roosevelt Junior High School, a new cafeteria is needed. When our long-range construction plans for secondary schools were advanced in 1962, this particular project had a low priority. Today, it must have a priority of the first order. The cost of construction and of remodeling the existing cafeteria into useful space will be quite expensive. Add to this figure the price of bringing maintenance to a desirable level still leaves us a structure whose facilities are suitable more to a curriculum of 1927 rather than 1977 and will probably approach three-quarters of a million dollars. It may well be wise to consider whether it is sound fiscal policy to invest this sum in a building constructed in 1927 or to put that sum and more into a new building adequate for the needs of students in the second half of this century. A new school is the proper recommendation, we believe.

As important as adequate schools is an adequate curriculum. We must meet the needs of students who will be going on to college, to other institutions of higher learning, to jobs in the world of business and trade, or who are less able academically than their fellow students. To regard the matter of adequate curricula or curriculum development as the neat addition of a few courses to a program is to oversimplify a complex and difficult challenge. We must improve the pre-service training of teachers and their in-service training in curriculum development as in other areas.

Much spade work in curriculum development was accomplished by members of our Secondary Curriculum Council with the strong assistance of the staff of Project COD. Discussed in leadership sessions were the philosophies that should underlie our curriculum; our general and specific objectives; possible subjects to be offered. Visiting consultants briefed council members on new approaches as did travel to other schools by department heads to talk to their counterparts there. Typical of the work accomplished in these meetings is a new in-service course in developmental reading for teachers of English, destined to bring immediate and future benefits in the general curriculum. Another example: Close co-operation with consultants by personnel from the Industrial Arts and Home Economics Departments has made certain these departments will have the important place they deserve in our new comprehensive high school. Arrangements have been made with the State Department of Education's

regional office in Wareham to supply supervisory personnel to work closely with us in further developing our curriculum. Among the avenues we propose to explore are the open concept of curriculum . . . not subject-oriented, but rather, offering a variety of educational opportunities to meet the different needs and interests of our students and offer them a flexibility of choice within the framework of a strong over-all educational program.

To our junior high school curriculum, we expect to add a course in health education emphasizing drug abuse, smoking, alcoholism and nutritional defects. Teachers specially qualified to give such a course, will be added to the faculties of our three junior high schools. The course will be planned and shaped on the basis of such factors as the experiences of department personnel, their consultations with conference leaders and a workshop scheduled for next summer.

In curriculum development, we cannot forget the individual student. What we are doing, what we must do, is, in the final analysis, for the benefit of each individual student, not for the benefit of a faceless, anonymous mass of young people. We must work toward the dual goals of helping every individual student develop, not only as an individual, but as a member of a co-operative society. Such goals, and the work needed to attain them, can do much to free us of the charge of insensitivity to the students' needs, of the charge we are indifferent to the individual and concerned only with students en bloc.

Another aspect of our curriculum development is the need to change the attitude of teachers and administrators toward the slow learners, the terminal students whose formal education ends with the completion of his or her secondary schooling. To help these slow learners, we must inaugurate in-service training programs and seek personnel with a commitment toward bettering our offerings for such children.

A different sort of challenge is posed by the pupils now moving into Normandin and Roosevelt Junior High Schools from the non-English speaking program. Fifty students have been assigned to Normandin, another fifty to Roosevelt. These numbers will be repeated next year. We must make a special effort to help these children integrate to American education and the American way of life without erasing some of the distinctive features

of their own culture in the process. The dropout rate is far too high in this group, largely the result of parental wishes these children leave school at 16 and begin working in order to make a contribution to the family income. To offset this understandable, but tragically shortsighted outlook, we need liaison between the home and the school, franker discussion with these parents and more co-operation in planning and initiating work-study programs for these students.

In terms of departmental personnel, a number of important appointments have been made in administrative and supervisory positions this fall. The death of Principal John F. Gracia of New Bedford High School saddened his colleagues throughout the system. His years of service as principal of the high school were marked by sincerity, devotion and a genuine interest in the students of his school. Named as his successor was Paul Rodrigues, formerly principal of Keith Junior High School. Constantine T. Nanopoulos, assistant principal at Roosevelt Junior High School, is now principal of Keith while Alwyn T. Griffith has been named assistant principal at Roosevelt Junior High School. William Chapman has been named director of guidance with the responsibility of supervising all counselors in the junior high schools as well as New Bedford High School. Mrs. Roberta Sawyer has been appointed dean of students at New Bedford High School while Roger Lemenager is now head of the foreign language department in the secondary schools. Robert McCarthy is now establishing a new program of distributive education at New Bedford High School. This program, designed to offer students a co-ordinated program of work in local retail businesses combined with academic work at the high school, has resulted in interested and enthusiastic students who will be already trained for the business world when they receive their diplomas.

Needed next year is the appointment of additional teacher-aides. The addition of a teacher of English or mathematics to the faculty of a school does not cope with the increase in class size in the shops, music and physical education. Part-time teacher-aides provided very worthwhile relief in gym classes this year, and more such aides will be needed. Scheduling changes are also being considered in our three junior high schools.

Our summer school enrollment remained stable and the results were, as usual, most valuable. Special program for 7th and 8th grade repeaters at Roosevelt Junior High School was supported with ESEA Title I funds as was the summer camp program. Tutorial centers were not operated because Title I funds were cut back. Approval of the Model Cities plan means that some phases of its educational component may be implemented with the work-study program of particular interest to us.

There may be a dramatic change in secondary education in New Bedford, if an extensive application submitted to the State Department of Education is favorably received; this request for funds was made in accordance with the Vocational Education Amendments Act of 1968, which places increased emphasis on pre-vocational and occupational education programs.

Other changes to be mentioned would include the re-scheduling of junior high class days to match the senior high schedule and the change of the junior high rotating omission schedule to a regular six-period day. A successful program of volunteer teacher-aides and tutors comprised of SMU students was begun to help pupils in some elementary and junior high schools. Recognizing the need to inform parents as well as the community at large of school activities, planned programs and the personnel responsible, the School Committee authorized the publishing of a public school system newsletter. An issue for the parents of elementary school students was published in March and an issue for the parents of secondary school students was issued in May. An Educational Enrichment program this fall brought conservation and pollution problems to the attention of junior and senior high school students.

In meetings with New Bedford High School Student Council and with PTSA members from that school, a number of sincere and serious questions were raised concerning conditions, practices and procedures at the school. Practical suggestions were made and some have already been implemented. One suggestion made by these groups was to hold double sessions to relieve crowded conditions at the school. A staff member of Brockton High School pointed out the many disadvantages of double-session schedules as proven during the past six years at that school. In addition, a visiting team of State Department

of Education officials surveyed New Bedford High School facilities and programs and came to the conclusion approval for double sessions would not be granted because we would not meet the requirement of a 5½ hour school day and because a new high school is, happily, only two years away.

It has been said of the United States that, unlike the nations of the Old World, we have never reached the point at which we can cry "Done!" and rest from our work. America is a country whose citizens never regard their business or their nation as finished. We are a perpetually discontented people who view the present even as we scan the blueprints of tomorrow . . . and when that tomorrow comes, we still look far beyond. In keeping with this restless nature of our country, there will never be a time when we can say of the public schools of New Bedford that they are complete, finished, impossible to perfect further. It is well for us today and for our children tomorrow that this is so; tradition's strait jacket will never thwart tomorrow's dreams. We have discussed here our current challenges and our plans to meet those challenges. Let no one imagine the day is coming when all challenges will be answered, all work done. It is our goal here in the city of New Bedford to meet challenges, today and tomorrow, that our children may receive the education they must have.

Educational events are moving at such a rapid rate that to move ahead with the times will take a special effort, but this we are committed to continue. We have taken some important steps in many directions. But we are concerned not so much with what we have done as with what we have yet to do.

1969 ANNUAL REPORT
DEPARTMENT OF ELEMENTARY EDUCATION

INTRODUCTION

The public schools in America have certainly been subjected to heavy attack, both by the teachers and the general public, this past year for real and imagined deficiencies in their operation. Everyone seems to demand that we get MORE money, MORE personnel and MORE instructional materials! It is not realistic to assume that measurable progress can be made without a big financial investment in education for the children in our New Bedford Public Schools during 1970-1971.

SPACE PROBLEMS—BOUNDARY LINE CHANGES

Thirty (30) classrooms, each with thirty-three or more pupils presents the picture of the overcrowded situation currently plaguing our elementary schools. The 1970-71 school year with many over-sized classes appears even more deplorable. A minimum of ten relocatables will have to be purchased in order to house ten classrooms sorely needed if we are to minimize overcrowding.

The entrance of the Pre-School Program and the Perceptual Learning Center into our school buildings has resulted in their occupation of nine (9) classrooms, and one (1) auditorium.

The Transfer Program which buses children from the four (4) originally racially imbalanced schools, however, has created a somewhat different situation.

Enrollment in the Acushnet Avenue, Thomas Donaghy, Thomas A. Greene and Clarence A. Cook Schools has decreased to such an extent that overcrowded buildings in their respective vicinity could definitely be relieved by a change in school boundary lines for the coming year.

BUILDINGS—MODERNIZATION

During the year 1970 we are hopefully planning to engage in the building of a new elementary school in the extreme north end of our city, and at the same time a sec-

ond building in the Model Cities area. Without doubt they will be as innovative and modern as any structure of their type. We must have buildings without interior walls, or walls that are flexible in order to have the free, open space requisite for the self-help, independent kind of study now advocated by educators.

Many of the classrooms in our twenty-seven elementary schools still have desks and chairs screwed to the floor, set in neat rows in small square rooms. Living in the 1970's, our children can no longer be confined to such antiquated learning centers. A big stride in the right direction would be the replacing of as much of this outmoded furniture as possible, on a larger scale than has been possible to date.

RELEASED TIME FOR TEACHERS

For many years the request by administrators for an opportunity to release teachers for one afternoon per month for the purpose of conducting in-service courses has met with failure.

Principals of two session schools state over and over again that the one hour and one-half noon break should be shortened. Pupils return to the school grounds very early and it is during this period that many accidents and fights ensue. By lessening this noon break by fifteen minutes and having classes start at one o'clock, there would be seventy-five minutes gained which could be applied to the released afternoon session. Morning sessions begun at 8:30 instead of 8:45 a.m., would provide another possible 75 minutes.

REPORT CARDS

Revised report cards were issued to all elementary schools this fall. A committee of teachers worked diligently for two years making a study of cards from many communities, and then incorporated the best features found, with the curriculum needs of our own New Bedford Schools. The grading system (A-E) now coincides with that of the secondary schools and thus provides for better parental understanding. At the close of the year, recommendations by teachers for any changes in the format of the report cards will be given consideration.

ADDITIONAL PERSONNEL

In 1968, thirteen SCIENCE COORDINATORS were elected to serve the teaching personnel in our large elementary schools. All schools are presently well equipped with modern science materials, but many teachers are insecure in this area of education. An additional thirteen science coordinators would provide every school with a resource person versed in science, upon whom teachers could depend for assistance.

At the opening of school each year there are always inexperienced teachers who would receive inestimable benefits by having an experienced teacher in their classroom for a few days to aid in the organization of the class and to offer suggestions in the planning of lessons and activities. Such assistance would prevent the chaos that sometimes arises when new teachers lack the skills that come with experience.

The services of ten recently retired teachers for the first two weeks of school would provide aid for twenty newly elected personnel at a cost of eighteen hundred dollars (\$1800.00) and would without question prove a sound investment.

TEACHER-AIDES

Teacher-aides are more often than not as effective as many educators have long suspected. They not only perform useful chores, but elevate the profession of teaching by giving it a managerial status.

Large class size often means that certain children invariably fail to get the needed help they deserve to receive. The availability of a teacher-aide at such times can prevent failure by the child. The frustrations encountered by the teachers of large classes will also be diminished when they can be assured of the help that a teacher-aide can provide. It is recommended that a teacher-aide be assigned to any classroom of thirty-two or more children.

The presence of teacher-aides on the four school buses which transport large numbers of children to and from school daily are a necessity today, as conduct of unsupervised youngsters invite personal injuries and damages.

LOOKING TO THE FUTURE

As we search in our continuous study for suitable curriculum ideas for the children living in this decade, we must feel concerned for the needs of all children by the development of new and better educational programs.

The world — its scientific discoveries — its space travel — its medical advances, etc. has so far surpassed our wildest dreams that education in our schools has failed to provide our children with the knowledge and skills that will be necessities in the years ahead.

The curriculum in the elementary schools must be revised and made more meaningful, and something that the students will embrace as a joy to learning. A school in which exciting things are happening is enticing to children. A school in which each child is receiving a superior educational program AND a challenge to his particular ability or interest has an allure that equals his after-school life. Suggested for inclusion in the future curriculum of our elementary schools would be:

1—Economics

Educators throughout the country agree that there is a need for economics in the ELEMENTARY school curriculum. It plays a big part in children's lives, but they have little or no understanding of why people work or what money represents. Children should be introduced to basic economic concepts as they relate to family and community life. Daily experiences would be used to illustrate major concepts. Attractive instructional media and textbooks are now available for such teaching.

2—Conservation

The natural curiosity of children should be prodded and promoted by placing conservation in its proper setting, and by promoting the needed respect for living things in their natural environment.

Children would participate wholeheartedly in activities such as soil and water analysis, wildlife and plant identification, good forestry practices and outdoor safety programs. A limited number of field days to demonstrate conservation practices could be arranged with the state or local Conservation Commission.

3—Vocational Education

Elementary principals and elementary teachers in the intermediate grades join with the elementary administrator in voicing the great need for some modern type shops for the large, overage boys and girls who are clearly not attracted to the academic work, but who could possibly be prevented from becoming future dropouts by offering them an opportunity to attend attractive shop classes.

Several of our elementary buildings are presently equipped for some shop classes, while all three junior high schools have workshop rooms which could be utilized *temporarily* for use by elementary pupils. In New York City they are using a mobile industrial arts learning center to service 22 elementary schools. It contains metal and woodworking machinery, printing, electrical and ceramics. It visits five selected schools per week and provides instruction for groups of 12 children. This program enhances the curriculum and motivates the pupils tremendously.

4—Oceanography

The unbounded pleasure afforded students in our 1969 summer Oceanography Class proved beyond any doubt that this is a subject that should be placed in our elementary school curriculum as soon as possible. Students studied the habits and cycles of marine organisms indigenous to the area, and the effects of tides and currents. They took field trips to examine the shoreline, and worked on individual projects at home. Parents became tremendously interested as the enthusiastic pupils related their experiences at home. We cannot begin to accommodate the youngsters battling to get into this course.

Although up to this time the New Bedford Public Schools have been able to "make do" and still improve the quality of education and services available to students, there is a limit to what even the most ingenious administrators can accomplish when schools are literally bursting at the seams. The one essential of education in the Space Age is space, and New Bedford must tackle this crisis in the immediate future if standards are to continue high. The need for more schools has been made known and it is hoped that action will result and resolve a big problem.

NEW BEDFORD HIGH SCHOOL ANNUAL REPORT

1969

Tragedy struck in April with the death of Principal John F. Gracia. In his unexpected passing New Bedford High School lost a truly dedicated leader and a particularly loyal friend.

The manner and proficiency with which the staff members carried out the administrative duties to finalize the school year was a tribute to themselves and to Mr. Gracia's inspirational leadership.

As in recent years, student enrollment has remained quite stable, namely 2492, a slight decrease from last year. Projected figures from the junior high schools indicate that a steady increase will build up at the high school within a few years. Hopefully, the peak enrollment of the immediate years will coincide with the availability of the new building.

The overcrowded condition of the school with the resulting study hall assignments is recognized as the most pronounced problem which defies solution. Steps to alleviate some of the study hall pressures have been undertaken.

An informal study hall in the cafeteria has been established for seniors throughout the day.

Faculty members have voluntarily opened their classes to "auditing" by students ordinarily assigned to study halls. More than 140 pupils are provided extra help, enrichment, review, or preview of a full range of offerings. In many instances faculty members are willingly tutoring pupils during their otherwise "free" time.

Despite the restrictions imposed by the physical plant, the educational program continues to be expanded. New programs introduced included Distributive Education and Clinical Chemistry.

Plans for next year include an inter-disciplinary offering of Afro-American History and Literature, personal typing, Biology II for Seniors, and special math programs for low-ability students.

Considerable maintenance work is needed throughout the building. The detractions have not been in the

area of aesthetics only, but have begun to influence the educational programs. The limited time during which the building is vacant in the summer months does not provide sufficient opportunity for adequate maintenance. A concentrated program of maintenance should be undertaken.

DEPARTMENT REPORTS

English Department

The principal focus and concentration of the Department of English during the 1968-69 school year was upon the development of a new and more relevant curriculum in the Language Arts. With the C. O. D. organization furnishing direction and leadership for the secondary school faculty, beginning steps were made in preparation for the full commitment to curriculum changes implied by the new over-all philosophy . . . with particular stress upon such concepts as relevance, flexibility and freedom of choice. In response to certain foibles of the curriculum development process, and in response to temporary apathies noted in teachers, progress during the year was slow. However, there were many meetings — with COD representatives, with public citizens, with students, with experts in the English field — which had practical and favorable outcomes. These meetings assisted English teachers to redefine their educational objectives and to formulate a clearer vision of the tasks ahead.

On the more prosaic side, the general objectives of the Language Arts program were conceived, discussed and written down, to serve as an integral part of the student-oriented English curriculum of the future. A start was made in listing the activities and materials needed to implement the educational objectives. As a result of this involvement, a broader view of the scope and sequence of the future English program developed. On a few occasions, English teachers on the high school and junior high school levels met together in order to form their plans as one block, rather than two blocks, of teachers. The most encouraging element of this action was the accelerating commitment of the majority of English teachers to the job at hand.

As a natural result of the growing concern with minority groups and their educational needs and interests,

recommendations were made by English teachers for including so-called black literature in the English curriculum as well as literature which reflected the experience of those ethnic groups which make up the American community most populously. A number of these books were placed in the April book order to ascertain their use in the following school year. A tentative philosophy and perspective toward these books was developed in order that they might fit logically into the already-existing curriculum arrangement without undue fanfare.

This was another year when the Department of English profited from the use of Title III funds. There was an addition of more audio-visual equipment and materials, further augmenting the existing supply of these items and assuring teachers of greater facility in using them. A new sound projector and a number of sound films in color were principal items in question.

The summer reading program, the commitment to the TAB literature series and the literature book rotation system remained as features of the year. A generous supply of books continued to pass into the hands of English teachers in the attempt to make teaching materials more directly available to students (and teachers).

Restatement of Department Objectives:

The Department of English attempts to provide educational experiences which will inspire the development of those skills, knowledges and appreciations which are necessary for students to be able to use and listen to their native language with discrimination and facility. It is the common aim to make of our students better readers, writers, speakers, listeners and thinkers. As an auxiliary aim, we hope to make better citizens.

Recommendations:

1. That more in-service courses be presented in order to provide instruction for the Department teachers in the weaker areas of English pedagogy.
2. That more freedom be given to English teachers to visit other school systems and to attend conferences of an educational nature.
3. That English teachers that are presently and directly engaged in curriculum writing be given the opportu-

ity to meet in school time, at intervals, in order to support more rapid progress in curriculum development.

4. That the teaching load of the Head of the Department of English be reduced to one class per day in order to provide him with the time to carry out, more efficiently, his extra-instructional functions.

Mathematics Department

In the technical society of today, there is evident need for each member to be "mathematically literate". The degree to which he attains this literacy is obviously governed by his innate ability to learn, his motivation to use this capacity and the goal he has selected to afford himself the opportunity to be a productive and responsive adult.

Mathematics, by nature being discipline in which one grows in ability to understand it and to use it, must be taught so that the pupil can progress at his own pace. The teacher of mathematics recognizing these facts realized that instruction in this subject today must move away from the self-contained classroom and rigid curriculum control to more individualized offerings.

For several years now the curriculum has endeavored to meet the needs of the fast moving, highly motivated youngster. It always has served the so-called "average" student, the one who needs to be knowledgeable of the subject but will not necessarily pursue it at higher levels. Now it is the slower learner who is demanding our attention. We cannot allow accumulated ignorance to frustrate youngsters and start them on the road to becoming dropouts.

This past year has seen the beginning of curriculum innovations to serve this group. Plans are now being worked out by which these youngsters can be successful at their rate of learning. Specifically, a course is now scheduled whereby a pupil can take two years rather than the usual one to become proficient in the abstract concepts of first year algebra. If this experiment proves successful, it is hoped that similar curriculum offerings can be made on other grade levels.

Recommendations:

1. Continued study be made to fit the curriculum offerings to the learning rate of the pupils.
2. Consideration be given to accepting "quality points" to determine position in class and eligibility to Honor Society.

History Department

The department participated in the Massachusetts Schools "Get-Out-The-Vote" Campaign and the Annual Massachusetts Student Government Exchange Program sponsored by the Civic Bureau of Education.

The organization of the Afro-American Historical Society for students interested in the study of Black History was completed. The First place scholarship award for the Afro-American History Essay Contest, Southeastern Ministerial Alliance, was won by one of our Grade 11 students.

The society sponsored an illustrated lecture, "From Africa to America" for the American History Month and Negro History Week Auditorium which was held on Friday, February 14, 1969.

The department received 497 American History 400 35mm slides cartridges with the Kodak carousel projector under Stage Three of the Title III N. D. E. A. History Project.

At a meeting with interested faculty members on March 28, 1969, Professor Maier, Chairman, Department of Earth Science and Geography, Bridgewater State College, proposed a federally funded 1970 High School Geography Project Summer Institute. If the institute is approved by the federal government, participating high school teachers would be expected to institute an experimental course at their respective schools for the 1970-1971 school year.

Each high school teacher has been provided with *Teacher's Guide to American Negro History* and *Teacher's Guide: Eyewitness: The Negro in American History* in order to commence the integration of the American History curriculum. Faculty members have also been provided with reference books on multi-ethnic history. Students of the Afro-American Historical Society are compiling lists

of books that are available in the public library, high school library and Afro-American Historical Society Library. The list of books will be included in a department guideline booklet that will include all available instructional materials in the schools and community.

Three teachers from the high school and teachers representing each of the three junior high schools participated in a five day May-June Social Studies Curriculum Revision Task Force Workshop conducted by the State Department of Education. Orientation was provided in instructional objectives, curriculum analysis, and teaching strategies and methods to aid in further curriculum revision study and experimentation.

Teachers were also introduced to several of the major national projects such as the Carnegie-Mellon Social Studies Project and the Harvard Social Studies Project.

In April 1969, the following programs were recommended for experimental study during the 1969-1970 school year:

The Shaping of Western Society, Tradition and Change in Four Societies; Edwin Fenton, Carnegie-Mellon University, Holt-Rinehart & Winston, Inc. (Grade 10)

Discovering American History; Holt-Rinehart & Winston, Inc. (Grade 11)

One of our seniors won one of the two \$200 Freedom Shrine Awards Contest Scholarships, Exchange Club of New Bedford.

Goals:

A continuous, varied, up-to-date Social Studies program for all levels from Grade 7 through Grade 12.

Recommendations:

1. Offer an elective one-half year course in Afro-American History.
2. Provide additional supplementary reading materials for all grade levels.
3. Provide a Social Studies Curriculum Workshop for teachers of the department. Continue Curriculum Revision Task Force study of Grades 7-12 curriculum.

4. Consider replacing the Grade 11 English History College 3 Curriculum Course.
5. Consider the possibility of offering Sociology, Anthropology and Psychology as elective one-half year courses.
6. Change the title of the "Problems of Democracy" Course to "Contemporary Problems of Society".

Science Department

Accomplishments:

1. All science teachers were given the opportunity to actively participate in planning the science facilities and curriculum for the new high school. Numerous meetings were held. Teachers were given the opportunity to evaluate the schematic drawings of the physical plant and to make recommendations. A careful and detailed study involving future science course offerings was undertaken by the secondary school science teachers. Committees are actively involved in curriculum development.
2. A comprehensive and progressive environmental science task was submitted to COD for the 1969 Summer Workshop. The final product was very disappointing.
3. Clinical Chemistry was adopted as part of our regular science curriculum. This course is designed especially for those students interested in nursing and clinical medicine. A pre-requisite for Clinical Chemistry is 2C Biology. Students successfully completing this course will be encouraged to take 4C Physiology.
4. The department members attended numerous conferences on "Drug Dependency". A "Drug Use and Abuse Workshop" was held on March 20. This conference was attended by eight members of the science department.
5. Two thousand, two hundred dollars worth of new science equipment was purchased under the provisions of the National Defense Act, Title III. To keep pace with the rapid advances in both subject matter and methods of teaching, it is imperative that "new" and "more" equipment be added "yearly".

Recommendations:

1. After a careful study and detailed survey, I recommend that a second year biology course be introduced as part of our regular science curriculum. This course could be designed for those students who (1) have a background in both chemistry and biology and (2) have a desire to become actively involved with scientific research on the high school level. *One hundred fifty-four* members of the class of 1971 have indicated a *desire and need* for a second year biology course.
2. I recommend that an additional teacher be appointed as a permanent member of the New Bedford High School Science Department.
3. I recommend that an environmental science curriculum be developed for the high school curriculum. This course could be offered as an elective two periods per week and involve the much needed instruction in such areas as drugs and sex education. The success of this program will center around a *qualified classroom practitioner*.

Foreign Language Department

The foreign language department has worked very closely with the Center of Organization and Development (Project C. O. D.) in an effort to identify problems which exist in our school system in the teaching of foreign languages. We have attempted to establish a philosophy, and educational objectives which will follow this philosophy. One step toward this goal is the organization of all foreign languages into one department. The foreign language department now includes French, German, Latin, Portuguese, and Russian. All teachers of foreign languages have agreed that cooperation, dedication, and commitment are all necessary if we are to improve our curriculum. Our method of teaching foreign languages is now under careful study, and the foreign language department should be ready to make any necessary recommendations by the end of the 1969-1970 academic year.

Business Education Department

One of the goals of the Business Education Department — to meet the constantly changing needs of the busi-

nessmen in the community — is near attainment with the addition of a Model Office which is being constructed in the Business Machines laboratory. It will make available to the Business Practice, Bookkeeping, Secretarial and Clerical Training pupils a realistic office procedure set-up. Equipped with glass partitions, counter-height filing cabinets, Switchboard, and Cash Register, it will present to these students office training in a meaningful environment.

Again this year, New Bedford High School Typewriting students participated in an area-wide Typing Contest. We were pleased to have one of our girls take first place in a field of over one hundred; and due to her achievement, our school was presented a silver Paul Revere bowl.

The Business Education Advisory Committee is in the process of developing guidelines for the Commonwealth. We take pride in noting that two of our faculty members were chairmen of committees in two separate areas in this revision.

Conclusion

As the reality of the new school becomes a certainty, the excitement and enthusiasm of students, faculty and administration will become more and more pronounced.

Departments and staff members have been involved in curriculum planning for the past year and will increase the tempo and commitment to the preparation for the educational experiences to be implemented.

It is recommended that the administrative structure of the high school be studied with a view toward realignment in order to effect a more efficient and comprehensive arrangement.

PAUL RODRIGUES
Principal

Report of the School Committee

STATISTICS

POPULATION AND VALUATION

The population of the city (census of 1969)	104,261
Valuation of taxable property was	\$138,883,975
Schoolhouses and lots	11,490,625
Other school property (furnishings, etc.)	1,638,872

APPROPRIATIONS

Rate of taxation (per \$1,000.00)	\$102.80
Amount for general school purposes, not including new buildings	\$8,640,937.44

SCHOOL CENSUS

Number of children between five and sixteen years of age, and illiterates (not having completed Grade 6) between sixteen and eighteen years of age, reported by the Attendance Department in accordance with the census taken October 1, 1969:

Between 5 and 7 years	3,212
Between 7 and 16 years	15,904
Between 16 and 18 years	240

SCHOOL ORGANIZATION, SEPTEMBER 1, 1969

ANNUAL REPORT
of the
COMMISSIONER
of
PUBLIC WORKS
of the
CITY OF NEW BEDFORD, MASS.
to the
CITY COUNCIL
1969

THE BAKER MANUFACTURING CO.
PRINTERS
NEW BEDFORD, MASS.

COMMISSIONER'S REPORT

April 3, 1970

Honorable Mayor and City Council
New Bedford, Massachusetts

Gentlemen:

In compliance with Chapter 3, Section 58 of the City Code, I herewith submit the annual report of the Department of Public Works for the year ending December 31, 1969.

Appropriations and expenditures are shown in the various tables, together with a chart indicating the comparative Highway expenditures for the period from 1921 through 1969.

I wish to express my appreciation for the cooperation that I have received from His Honor, Mayor Edward F. Harrington, the members of the City Council, the various department heads, and my own capable assistants in carrying on the work of the department.

Respectfully submitted,

EDMUND J. TOOMEY,

Acting Commissioner

DEPARTMENT OF PUBLIC WORKS

3w

ENGINEERING DIVISION — 1969

AIRPORT COMMISSION — Plans were drawn and surveys made in connection with airport boundaries and leases.

ASSESSORS — Real Estate transactions and transfers were filed at the Registry of Deeds. Such transfers were changed on city plots and indexed. Five sets of 208 plots are kept up to date and blueprints made of the same.

BOARD OF APPEALS — Thirty-five surveys and plans were drawn and records kept.

BUILDING DEPARTMENT — Lines and grades were given for 33 new buildings. The buildings were numbered and records kept.

CITY SOLICITOR — Plans and blueprints were made and descriptions were written on request of City Solicitor for the sale of City owned land and acquisition by Eminent Domain.

CURBING — Lines and grades were given for setting 3369 lineal feet of curbing. Inspection and measurement was made of the same.

HOUSE DRAINS — One hundred and Eleven (5176 feet) new house drains and eight relays were laid connecting house sewer and surface pipes with the main sewer. Locations of these drains were measured, records were made of the same and drawn on drain plots.

PLANNING BOARD — Zoning Eighteen plans for zoning changes were made and lists of abutters made and reported.

SEWERS — Surveys, plans, lists of abutters, assessments, and specifications were made for two new sewers and three new surface drains. Construction costs, inspection, lines, and grades, were given for 6505 feet of sewers and 5983 feet of surface drains. Records of construction, final plans, and final assessments were made and reported.

SIDEWALKS — Surveys, Plans and estimates were made for twenty-six projects under the Betterment Act. Measurements, records, final plans, and assessments were made and reported. Plans and estimates were made for 96 projects laid by bonded private contractors for property owners.

STREETS — Surveys were made and plans drawn for the acceptance of 4 new streets. Lines and grades were given for all

street construction and public utilities construction. Surveys were made and points set for the installation of new street bounds.

TRAFFIC COMMISSION — Surveys were made and plans drawn. Traffic counts were made at 19 intersections.

ROUTE 140 — The Engineering Division cooperated with State and Federal District Engineers, private engineers, and also with private contractors on the proposed projects.

WATER BOARD — Lines, grades, engineering and survey information as required were given for all water main extensions.

MISCELLANEOUS — Lines and grades were given for fences, street lines, and sidewalks. Forty-four accident or damage sites were surveyed. Plans were drawn and photos taken to prepare for possible court action. Numerous plans were drawn and descriptions prepared for study by the City Council Committees and the City Solicitor.

Weather records were kept daily on rainfall, snowfall, wind velocity, temperature, and tides. This weather information was reported to State and Federal agencies and was made available to the public. Records were kept of Street sweeping and ash collections. The area of cuts in pavements and walks were measured and recorded. City maps and plans were kept up to date, blueprinted and indexed.

GENERAL STATISTICS

January 1, 1970

Set off from Dartmouth	1787
Incorporated as a City	1847
Length of City	10.73 miles
Breadth of City (Maximum)	3.10 miles
Highest point	1250 feet north of Rockdale Ave. and Hathaway Road. Elevation 181.50 feet.
City Datum	Based on 0.85 feet above mean high water
State Datum	Based on mean sea level 2.55 feet below City Datum
Geometrical Center of City	Nash Road and Mt. Pleasant Street
Area — Land	12,281.9 acres
Ponds	193 acres
Land-Ponds	12,474.9 acres — 19.46 sq. miles
Tidal Water	8,429 acres — 13.15 sq. miles
Length of frontage on tidal waters	9.81 miles
Depth of main channel	30 ft. at low water
Average rise and fall of tide	3.55 ft.
Population — Registrar of Voters estimate	104,261
Assessed valuation	\$163,876.550
Assessed valuation per capita	\$1,571.79
Accepted streets — Area 1,445,823 acres	249.95 miles
Bridges (3)	0.796 miles in New Bedford
Sewers	267.914 miles
Length of Intercepting Sewer:	
Outfall	0.626 miles
Intercepting	9.188 miles
16 Public Parks	288.80 acres
14 Public Playgrounds	31.72 acres
1 Rifle Range	230.35 acres
7 Parking Lots	6.32 acres
30 School Buildings — Area of Ground	116.60 acres
1 Airport — Area of Ground	829.93 acres
Area of Easement	118.67 acres
5 Wharves — and other waterfront land (Harbor Development Comm.)	93.9 acres

WATER BOARD REPORT

April 3, 1970

To the Mayor and City Council
of the City of New Bedford:

Gentlemen:

In accordance with the provisions of Chapter 23, Section 3-2312 of the City Code of New Bedford, the Water Board herewith respectfully presents this, its 100th Annual Report, covering its operation for the calendar year 1969, and including the reports of the Superintendent, Water Registrar and Engineer.

No appointments or reappointments were made.

The average daily consumption for the past year was 21,096,113 gallons, which was approximately 1,135,454 gallons more than 1968.

The total consumption for 1969 was 7,700,081,500 gallons, approximately 394,480,100 gallons more than 1968.

The Water Board voted to request the transfer of \$367,584.35 surplus from Water Department receipts to Water Department New Construction and Improvement Account.

The following abstracts from the Water Registrar's report shows in condensed form the financial operation of this department during the year. Full details will be found in his report which accompanies this.

REPORT OF THE WATER REGISTRAR

City of New Bedford
Water Registrar's Office
January 1, 1970

To the New Bedford Water Board:

Gentlemen:

I herewith present to you a detailed statement of the receipts and expenditures of the Water Works Department for the year ending December 31, 1969.

The report is based on Budget vs. Expenditures and also on Receipts and Expenditures as previously.

RECEIPTS

FIRST, Based on the Budget system

Budget Appropriation	\$ 590,198.67	
Refunds	434.92	
1968 Encumbrances	2,770.05	
Transfers to General Expense	30,000.00	
Transfers to Salaries, wages	3,150.00	
Transfers to New Construction, 1969	294,296.32	
Balance—New Construction—1968	150,609.89	\$1,071,459.85

EXPENDITURES

Payrolls	479,905.59	
Bills	137,606.05	
New Construction	275,319.35	
Unexpended balances, reverting to City Funds	9,042.00	
Balance—New Construction account carried over to 1970	169,586.86	1,071,459.85

SECOND, Based on Receipts and Expenditures as previously

RECEIPTS

RATES

Town of Acushnet, Special Rate	19,702.51
Town of Dartmouth, Special Rate—Allen St.	9,031.82
Under 10,000 Cu. Ft. per quarter	432,549.02
Over 10,000 Cu. Ft. and less than 100,000 Cu. Ft. per quarter	85,634.50
Over 100,000 Cu. Ft. and less than 1,000,000 Cu. Ft. per quarter	144,700.75
Over 1,000,000 Cu. Ft. and less than 2,000,000 Cu. Ft. per quarter	43,241.50
Over 2,000,000 Cu. Ft. per quarter	292,876.95
Estimated and building purposes	995.00

REPORT OF THE SUPERINTENDENT

April 3, 1970

To the New Bedford Water Board:

Gentlemen:

The annual report of the Superintendent of operation of the department for the past year 1969 and on general condition of the works is respectfully submitted:

The financial report of the Water Registrar — Rainfall — and usual tables showing in detail the work of the Department are incorporated as part of this report:

RAINFALL

Total rainfall for the calendar year, 1969, was recorded at Quittacas Pumping Station, Rochester, Massachusetts at 53.22 inches.

POND LEVELS

The water levels in the Lakeville Ponds reached the following elevations during the year 1969:

	HIGH LEVEL	LOW LEVEL
Pocksha Pond	52.32 Mar. 26	49.17 Oct. 29
Little Quittacas Pond	48.85 Dec. 31	47.30 Mar. 19
Big Quittacas Pond	52.42 Mar. 26	48.88 Oct. 29

WATER TREATMENT

All water used through the year was sterilized with the addition of liquid chlorine at the Quittacas Pumping Station, North Rochester, Mass., and all the water traveling through the High Hill Chlorination Station, North Dartmouth, Mass., was again treated. All water leaving Quittacas Pumping Station is also treated with Soda Ash.

Over 1,482 water samples were taken from the system and its sources.

Mayor Harrington and the Water Board were informed on February 20, 1968, that due to the marginal physical quality of the water, during the year 1968, the U. S. Department of Public Health, recommend consideration be given for an engineering study pertaining to the construction of a complete water treatment facility.

A meeting was held in April with two officials of the U. S. Department of Public Health Services, Mr. Harry Smith and Mr. Lloyd Taylor.

On May 1-2, 1969, Mr. Harry Smith, U. S. Department of Public Health, Mr. Paul Anderson, State Department of Public Health, Mr. Edward Begin, Assistant Superintendent Quittacas Station and the Superintendent made a joint sanitary survey of the New Bedford Water System, for the purpose of obtaining information to aid in the certification of the water supply for use aboard interstate carriers.

On August 7, 1969 at a meeting held by the New Bedford Water Board with various Health officials the following was recommended:

1. Booster chlorination station locations selected and all equipment installed.
2. High Hill Chlorination Station be equipped with Standby Generator. One Ton Scales for One Ton cylinders. Standby Chlorinator with capacity to feed both lines.
3. Proceedings initiated for preliminary planning of complete water treatment facilities.

On September 16, 1969 at Special Board meeting held jointly with the Taunton Water Board and the problems pertaining to the needs of a Treatment Plant and if it should be a joint affair or if Taunton preferred to build its own was thoroughly discussed. The Taunton officials informed Mayor Harrington that they would meet with Mayor Freedman and then notify him of what action they would take.

On September 30, 1969 it was voted to retain Tibbetts Engineering Corporation for the Feasibility Study of a Treatment Plant and covering of High Hill Reservoir for the sum of \$47,000.

EASEMENTS

On January 28, 1969 the Board voted to authorize the Atlantic Richfield Company, through its Legal Department and subject to the approval of the City Solicitor and the Superintendent the granting of an Easement pertaining to the property on the northwest corner of Sawyer and Ashley Blvd.

On September 17, 1969 the Board voted to authorize the Shell Oil Company the use of a portion of the Old Water Works Easement at 1304 Acushnet Avenue, subject to the approval of the City Solicitor and the Superintendent.

WATER REPORT

29 y

On March 25, 1969, Mr. George Klocck, representative from the Algonquin Gas Transmission Company appeared before the Water Board requesting permission to install a sleeve with a 20" Gas Pipe in it, beneath the two 48" Transmission Mains. He stated they now have a 6" and 8" Gas pipe under both 48" mains.

On April 29, 1969 the City of New Bedford Water Board hereby unanimously ratified the agreement entered into with the Algonquin Gas Transmission Company for the construction of an additional transmission line thirty-five (35) feet north of its present easement and authorizes and consents to the execution of a grant of easement by its members, for three (3) parcels of land located in Freetown and Rochester, for the sum of seven hundred and seventy dollars (\$770) subject to the conditions agreed to by said Algonquin Gas Transmission Company.

The work of installing the 26" steel sleeve by hydraulic methods was completed October 30, 1969.

WATERSHED AREA

The Water Board voted to issue boating and fishing permits again this year on parts of Great Quittacas and Pocksha Ponds for the same fee, terms and conditions as last year.

Mr. Edward Begin, Assistant Superintendent stated on February 9, 1969 all ponds had reached their maximum height and large volumes of water were going over the Nemasket River Dam.

On March 25, 1969, the Board voted to request a meeting with the Taunton Water Board to discuss the issuing of boating permits to those with motors not exceeding ten (10) horsepower.

On June 24, 1969, the Superintendent informed the Water Board that he had met with the Regional Planner's Engineers and the City Planner and stated his recommendations for additional water were:

- A. Additional Storage for Great Quittacas and Pocksha Pond.
- B. Development of the Taunton River Project.

On May 27, 1969, Mr. Begin reported the department planted some 9,000 pine trees received from the State Nursery.

The Water Board sent a notice to the Property Committee requesting that they dispose of the old Negus House, located at Box 192 — R. F. D. #1, East Freetown, Mass. on Middleborough Road, Route 18. The property Committee was unable to dispose of the building and returned it to the Water Department, who in turn sold it to Mrs. Levine, Middleboro, Mass. with the understanding she was to have it removed.

The department installed 3,500 ft. of telephone cable beneath the surface from Middleboro Road to the Pumping Station in the Force Main Way.

The employees at the Station installed a large number of treated posts around the Ponds and in the vicinity of High Hill Reservoir from material obtained from our own woods. They also took a number of pine logs to the sawmill and Mr. Frank Almeida, Supervisor of Carpentry at Vocational School (New Bedford) made a large number of cross bars and wooden legs, which increased the supply of wooden horses for the Maintenance Department.

A new 8" cylinder Chrysler engine wood chipper was also purchased this year.

NEW REGULATIONS

It was voted by the Water Board, effective December 1, 1969 thru March 1, 1970 and here after, that between these dates no new service excavations would be made, unless a real emergency exists.

The meter installations were updated to read as follows:

- A. Water services 1½" or larger shall require the water meter to be installed on the service pipe and not the By Pass.
- B. No connection of any type shall be made off the By Pass.
- C. All new or relocated installations inside the buildings shall be above the floor and meters shall not be installed in shower rooms, rest rooms or lubritoriums in garages or gas stations.

SOUTH TERMINAL AREA

The Redevelopment Authority awarded the bid to Campanella Construction Company, Rhode Island, and they laid pipe in the following areas:

- A. 16" Class 25 (Tyton) from Pine Street to Union St. on (old) Water Street.
- B. 12" Class 25 (Tyton) from Water St. to Acushnet Ave. on Walnut St.
- C. 16" Class 25 (Tyton) from Water St. to Front St. on Commercial St.
- D. 12" Class 25 (Tyton) from Water St. to Acushnet Ave. on Union St. (Pipe supplied by City) (600')
- E. 12" Class 25 (Tyton) from Cannon St. to Coffin St. on Second St. (Supplied by City) (300')

WATER REPORT

31 y

Thousands of feet of old cast iron pipes and a large number of water services were abandoned in place in this area.

During 1970 we hope that the entire area south from the New Bedford-Fairhaven Bridge to South Street along the waterfront will be completed.

NORTH TERMINAL BULKHEAD

Under the direction of the Harbor Development Commission, Project F01-00063 was awarded to Perini Corp., Boston, Mass., and up to date they have installed approximately 1,000' of 16" Tyton Pipe (Class 25) with appurtenances in the Bulkhead Area itself. On Wamsutta Street a 16" Tap was made into the 30" water main at Acushnet Ave., and approximately 900' of new 16" pipe was laid to connect to the bulkhead pipe. The old 10" cast iron line was abandoned in place.

STATE DEPARTMENT OF PUBLIC WORKS

It was voted by the Board to include the extension of a proposed 12" water main in Nash Rd. from the new overpass to Shawmut Ave. for approximately Forty-One Thousand dollars (\$41,000). This includes the original voted Eleven Thousand dollars (\$11,000) for the overpass work of September 12, 1968. These are all estimated costs and the City shall pay whatever the actual cost is.

DISTRIBUTION SYSTEM

The Department employees under the direction of Assistant Superintendent, Mr. Edward Peters have been kept busy throughout the year with new construction, new extensions, relocations, hydrants and valve installations. Some of the projects included or proposed are:

- A. Cement Lining Program in part of Sycamore West Area. Contract was awarded to Pipe Lining Co., New Jersey, for \$143,501.10.
- B. \$20,000 to install 5-16" Insertion valves.
- C. Westfield Development Area just west of Shawmut Ave.
- D. New Development in the Poor Farm Area on City owned land.
- E. North Terminal Renewal Area (Middle Street to Wamsutta St.)
- F. Downtown Interchange (Fairhaven Bridge to Pleasant St.)
- G. Replacement of 30" Gate Valve at Union and Second St.

ROCKDALE SYSTEM

Tibbetts Engineering Corp., New Bedford, Mass. completed its study for a new layout for an underground Pumping Station at the base of the tank and submitted the proposal to the Board.

The Water Board authorized the contractor (painting the Hathaway Road tank) to proceed with the necessary repairs at an additional cost of \$1,000.

This included:

Interior Work

Replacement of defective bolts on carriage of Boom Ladder.
Replace heavy swivel of Boom Ladder.

Remove 22 feet of ladder running down inside wall to floor of tank. It was twisted out of shape and in poor condition.

Exterior of Tank

Replacement of defective bolts on carriage ladder, on railings of catwalk and necessary repairs to ladder from catwalk to ground level.

WATER REGISTRAR'S OFFICE

On April 29, 1969 the Water Board voted the following: to add stiffer penalty fines to overdue water bills. Notices are to be sent to water users when a bill becomes 30 days overdue with a penalty of charge of one dollar (\$1.00) per day for every day over the thirty (30) it remains unpaid. The Minimum Housing Division will be notified and on the forty-fifth (45th) day water will be shut off.

DARTMOUTH AGREEMENT

The Water Board, March 25, 1969 met with Dartmouth's Water Superintendent, Mr. Roger Wilbur and Mr. Cliff Mansfield, Fay, Spofford & Thorndike, Boston, Mass. The Engineering firm recommended a new connection for the Town at the Reservoir and Mr. Wilbur requested permission to meet with the Water Registrar to discuss a new proposed rate.

Another meeting was held on October 30, 1969, in which the Commissioner Mr. McKenna attended. No action has been taken at this time on any proposals.

FORCE MAINS

Employees of the Quittacas Pumping Station have cleared a large portion of the Private Way which had become overgrown with brush.

WATER REPORT

33 y

PUMPING STATION

A new 8" water line was completed in Negus Way as replacement for the old 4" cast iron pipe which fed water to the Pleasantville Association on Route 18.

A new 2000 gallon gas tank was installed to replace the present 500 gallon tank.

A new chipper was purchased as well as a new Spray Rig.

50,000 feet of (B) service wire for underground use was purchased (to replace the present overhead wire to the Reservoir).

In 1969 we expect to purchase 2 new Chlorinators and Chlorine Evaporator.

Mr. Begin, Assistant Superintendent took a 10-week course at the Lawrence Lab, held by the Massachusetts Dept. of Public Health.

METER MAINTENANCE

The Meter Department employees have done an excellent job in spite of the limited help and a very excessive work load. Mr. Sousa was sent to the Hersey Meter School, Dedham, Mass.

ACUSHNET SYSTEM

This system is still feeding water to the Revere Copper Works and has been subject to considerable vandalism.

BOND ISSUES

A Meter Loan for \$150,000 was appropriated and also an Equipment Loan for \$50,000 was approved.

MISCELLANEOUS

Horseback Riding:

The City Solicitor stated it was illegal to authorize permits for horseback riding on Water Department property.

Smithsonian Institution:

A visit by a representative of this organization came to New Bedford and requested permission to take any historical documents and place them in the archival collections of this museum, for permanent preservation. He said that the department had many. The City

WATER REPORT

Council, Free Public Library, and the Water Board agreed, provided the City retained ownership rights.

FREETOWN

On June 29, 1969, the Franklin Corporation represented by Mr. Chuck Franklin discussed with the Board a possibility of setting up a Private Water Company for the Town of Freetown. He was informed to come back when he had secured the necessary Legislative approval.

POLAROID CORP.

The officials of this firm and its engineers from the firm of Metcalf and Eddy, Boston, Mass., held numerous meetings to iron out their problem.

The Water Board agreed to lay approximately 1,500' of 16" water main and appurtenances in the Easement between the Railroad Track and Polaroid Corporation's west property line, with the understanding the line would not be looped in until Anderson-Nichols Engineering firm, Boston, Mass., had not let out to bid the work under its contract.

INDUSTRIAL PARK

The Industrial Foundation employed Anderson-Nichols, Boston, Mass., engineering firm to develop a portion of the Industrial Park through an E. D. A. Federal Grant and a portion picked up by the city.

The Water Department will receive approximately \$80,000 worth of Labor and materials free.

FAIRHAVEN

Mr. Glover, Fay, Spofford & Thorndike met with the New Bedford Water Board and after a lengthy meeting, tentative approval was granted for a 12" water main hookup in the vicinity of the Coggeshall Street Bridge. No final agreement will be signed until all details are worked out.

WATER REPORT

35 y

LEAKS

There has been twenty-eight leaks on main pipe during the year as herewith shown.

Date	Size	Location	Cause
Jan. 18	6"	Stetson St., N. x N. line Bedford St. 145'	Cracked Main
Feb. 4	6"	Pleasant St., S. x S. line Austin St. 123'	Cracked Main

15,759.1 feet of distribution pipe, in sizes from 4 inch to 16 inch was added to the system during the year and 11,396 feet was removed.

The total length of distribution pipe less than 4 inches now in use is 11,978.6 feet.

One hundred seventy-eight stop gates have been set and forty-nine of those previously set have been removed. The total number now in use is 4,088.

The total of small size stop gates now in use is 96.

One waste gate has been removed making a total of 205 now in use.

A total of 217 air vent valves are now in use.

Thirteen private gates have been set and eleven of those previously set have been removed making a total of 1,193 now in use.

Thirty-five new hydrants have been set and twenty-seven of those previously set have been removed. The total number now in use is 2,200.

The total of water cart hydrants now in use is 16.

Two hundred and fifteen service-pipes have been laid and one hundred and eighty-two of those previously laid have been removed. The total number now in place is 23,704. Of this number three hundred and ninety are unmetered fire services, twenty-one thousand and forty-eight are metered, and the balance of two thousand two hundred and sixty-six are not in use.

Three hundred and eighty-one service leaks have been repaired.

Two hundred taps have been cleared as follows:

Blow-offs 170

Trouble Inside 30

Eight hundred sixty-four meters have been removed for repairs, seven hundred ninety-one have been reset. Also two hundred meters have been set for year making the total number in use 21,048.

WATER REPORT

37

CONSUMPTION OF WATER

The consumption of water for the year has been as follows:

1969 Month	Monthly Consumption				Daily Average
	New Bedford	Dartmouth	Acushnet	Total	Consumption
	Gallons	Gallons	Gallons	Gallons	Gallons
January	590,461,450	369,750	6,244,500	597,075,700	19,260,506
February	518,377,000	452,250	7,259,250	526,088,500	18,788,875
March	584,947,900	566,250	9,920,250	595,434,400	19,207,561
April	577,792,300	604,500	8,769,000	587,165,800	19,338,860
May	609,960,200	977,200	12,349,500	623,286,900	20,106,029
June	670,184,750	10,537,300	8,586,750	689,308,800	22,976,960
July	661,219,200	20,733,350	13,817,250	695,769,800	22,766,768

*Includes population supplied in towns of Dartmouth and Acushnet consumers.

‡This consumption is for eleven months.

†This consumption is for thirteen months.

DATA ON METERED CONSUMPTION AND REVENUE

July 1, 1968 through June 30, 1969

No. of Accounts	Number of gallons			Receipts for metered water		
	Total Gallons	Per Account	Per day per Acct.	Total Receipts	Per Account	Per M Gals.
*Using less than minimum rate viz: 30,000 gallons per year	67,863,000	19,636	54	40,339.71	11.67	.594
Using over minimum rate but less than 75,000 gallons per quarter	1,471,481,250	87,955	244	393,493.80	23.52	.267
Using between 75,000 and 750,000 gallons per quarter	347,872,500	744,909	2,041	83,967.44	179.80	.241
Using between 750,000 and 7,500,000 gallons per quarter	656,544,000	6,436,706	17,635	139,745.10	1,370.05	.213
Using between 7,500,000 and 15,000,000 gallons per quarter	243,657,750	40,609,625	111,259	44,150.59	7,358.43	.181
Using over 15,000,000 gallons per quarter	3,938,971,500	218,831,750	599,539	282,846.36	15,713.68	.07180
Totals and averages	6,726,390,000			984,543.00		.146
Town of Dartmouth Venturi Meter	41,816,100			7,408.46		.177
Town of Acushnet, Special Rate	55,488,750			10,635.63		.191
City of New Bedford Departments	51,049,500			*12,213.30		
Metered Water Department Use	24,422,250			***5,027.40		
GRAND TOTALS	6,889,166,600			1,002,587.09		

*Includes special assessment accounts

**Not charged to City of N. B. Depts.

***Not included in grand total

As superintendent, I wish to express my appreciation for the help received from the Mayor, the Water Board, the members of the City Government, and particularly to the employees of the Water Department for their continued and wholehearted support.

Respectfully submitted,

GEORGE H. BRIGHTMAN,

Superintendent

TABLE I

STATEMENT OF WORK DONE BY ELECTRICALLY OPERATED
DeLAVAL CENTRIFUGAL PUMP No. 1 FOR THE YEAR ENDING
DECEMBER 31, 1969

Number of revolutions per minute	1200
Capacity when pumping alone per 24 hours	10 million gallons
Average static head for year	169.1
Average Dynamic head for year	185.8

Months	Number of days or parts of days pumping	Total pumping time per month	Current used per month K. W. H.	Number of gallons pumped per month	Number of gallons pumped per K. W. H.
		H. M.			
January	24	496:—	143,840	223,818,423	1556
February	28	584:—	169,360	242,785,528	1433
March	25	479:15	138,953	216,357,463	1557
April	20	423:45	122,888	188,921,962	1537
May	13	173:—	50,170	71,916,028	1433
June	26	440:—	127,600	211,240,831	1656
July	13	82:—	23,780	19,603,764	824
August	21	437:30	126,875	203,664,425	1605
September	17	280:15	81,272	123,811,955	1451
October	12	167:—	48,430	67,686,680	1398
November	14	171:30	49,735	68,587,109	1379
December	19	290:—	84,100	132,798,081	1579
Tots. & Avgs.	232	4,024:15	1,167,003	1,771,192,249	1450

Number of K. W. H. required to raise one million gallons into Reservoir
689.

$$\text{Duty} = \frac{1,771,192,249 \times 100 \times 8.34 \times 185.8}{1,167,003} = 169,733.136 \text{ lb. raised 1 ft. high per 100 K. W. H.}$$

Tots. & Avgs.	50	418:—	20,660	405,840,000	19,722

Number of gallons No. 2 Diesel fuel required to raise one million gallons 100 ft. = 26.13 gallons.

Useful work per gallon of No. 2 fuel = 31,296,707 lbs.

Average Pumping Rate = 16,181 gallons per minute.

Average Horsepower of Useful Works = 780 H. P.

Cost of fuel oil to pump one million gallons = \$7.55.

Cost of fuel oil to raise one million gallons 100 ft. = \$3.89.

Number in use December 31, 1969	2,200

TABLE W

STATEMENT OF WORK DONE BY THE SERVICE DEPARTMENT
FOR THE YEAR ENDING DECEMBER 31, 1969

Kind and Size	Services	Length on City and Taker
Copper tubing, 2 inch	6	256
Copper tubing, 1½ inch	8	452
Copper tubing, 1 inch	179	9,100
Copper tubing, ¾ inch	10	472.5
Cast iron, cement lined, 12 inch	1	18
Cast iron, cement lined, 8 inch	4	134.8
Cast iron, cement lined, 6 inch	4	65.9
Cash iron, cement lined, 4 inch	3	79.1
Totals.....	215	10,578.3

Thirty-six ⅝ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Twenty-five ⅝ inch light lead services have been removed and replaced with ¾ inch copper services.

Seven ½ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Seventeen ¾ inch light lead services have been removed and replaced with ¾ inch copper services.

Three 1 inch light lead services have been removed and replaced with 1 inch copper services.

Four 1 inch heavy lead services have been removed and replaced with 1 inch copper services.

Two ¾ inch heavy lead services have been removed and replaced with ¾ inch copper services.

Sixteen ¾" light lead services, sixty-nine ⅝ inch heavy lead services, thirty ½ inch heavy lead services, fourteen ⅝ inch light lead services, two ¾ inch heavy lead services, one ½ inch light lead services, one 10 inch cast iron service, twelve ¾ inch copper services, four 1" heavy lead services, ten 6 inch cast iron services, one 2 inch copper service, three 1 inch light lead service, one 1½ inch copper service, three 2 inch cast iron services, three 2 inch copper services, one 1¼ inch copper service, one 1 inch copper service, one 4 inch D. Lavaud service, four 4 inch cast iron services and one 3 inch cast iron services have been removed.

The following extensions were made to services by takers: 29 feet of ¾ inch copper tubing.

Length of service pipe laid during the year	10,607.3
Number of services laid in 1969	215
Number of services removed in 1969	182
Number to be deducted	33
Number in use December 31, 1968	23,737
Number in use December 31, 1969	23,704

SUMMARY OF STATISTICS

FOR THE YEAR ENDING DECEMBER 31, 1969

IN FORM RECOMMENDED BY THE NEW ENGLAND
WATER WORKS ASSOCIATION

NEW BEDFORD WATER WORKS

NEW BEDFORD

BRISTOL COUNTY, MASS.

GENERAL STATISTICS

Population by census of 1969 — 104,261.

Date of construction, 1866 to 1869, inclusive. Further supply, 1895 to 1899 inclusive.

By whom owned, City of New Bedford.

Source of supply. — Water was first introduced on Nov. 26, 1869. From that date until July 10, 1899, the supply was taken from a storing reservoir artificially formed by constructing a dam across the valley of the Acushnet River, seven miles north of the centre of the City. This supply was augmented by a connection made in 1886 with Little Quittacas Pond.

Since July 10, 1899, the whole supply has been taken from Great and Little Quittacas Ponds, eleven miles north of the centre of the city.

In 1926, under Legislative Authority to take $11\frac{1}{2}$ million gallons of water per day from Long, Assawompsett and Pocksha Ponds, a connection was made to bring water from Pocksha into Great Quittacas Pond, when needed.

Mode of supply. — Previous to July 10, 1899, the water flowed by gravity from the Acushnet Storing Reservoir (grade 40' + high water New Bedford Harbor) through a brick conduit 3 feet wide, 4 feet high, 5 $\frac{6}{10}$ miles long to a receiving reservoir (capacity 3 million gallons; grade 30') located opposite the Purchase Street Pumping Station. Thence it was pumped into the Mt. Pleasant Distributing Reservoir (capacity 15 million gallons; grade 154') located 1,879 feet distance, from whence it flowed by gravity into the city's distributing system.

Since July 10, 1899, the entire supply has been pumped from Little Quittacas Pond (grade 52'). It is pumped through two 48 inch force mains $8\frac{1}{4}$ miles long to a distributing reservoir (capacity 67 million gallons; grade 216') located upon High Hill, in the town of Dartmouth. From this reservoir, it flows into the city's distribution system by gravitation through two 36 inch cast iron pipes averaging $4\frac{1}{17}$ miles in length and one 42 inch pre-cast concrete pipe following a different course and approximately the same length. The concrete transmission line was put into operation in 1958.

It is also possible to pump directly to the city through a 48" and 36" main using the reservoir as a balance. This latter connection was completed in 1922.

The first named system is not now in use.

PUMPING STATISTICS

LITTLE QUITTACAS STATION

1. Builders of Pumping Machinery.

Electric Units

- No. 1 10 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, driven electrically by 400 H. P. 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.
- No. 2 Duplicate of No. 1.
- No. 3 15 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, electrically driven by 600 H. P., 3 phase, 4160 volt, 60 cycle synchronous motor with special step windings manufactured by the Electric Machinery Company.

The three foregoing pumps are controlled by switches and automatic starting equipment in a switchboard manufactured by the Electric Machinery Company.

- No. 4 30 million gallons per day centrifugal pump manufactured by De-Laval Steam Turbine Company, directly driven by 950 H. P. Baldwin locomotive type 6 cylinder supercharged Diesel engine, 600 R.P.M., manufactured by the Baldwin Locomotive Company.

Electric current purchased off New Bedford Gas and Edison Light Company.

Total installed capacity, 65 million gallons per day.

LITTLE QUITTACAS STATION — Pump 4 "Diesel"

2. Description of fuel used.

- a. No. 2 Diesel oil.
- b. Brand of oil — various.
- c. Price of oil per gallon — delivered to Little Quittacas Station 14.90 cents.
- 4. Total pumpage for the year — 405,840,000 gallons by Venturi meter.
- 5. Average static head against which pumps work — 171.2.
- 6. Average dynamic head against which pumps work — 191.3.
- 7. Number of gallons pumped per gallon of fuel oil — 19,643 gals.
- 8. Number of gallons raised 100 feet per gallon of fuel oil — 37,577 gals.
- 9a. Cost per million gallons raised into High Hill Reservoir — \$12.83.
- 9b. Cost per million gallons raised into High Hill Reservoir — diesel fuel only — \$7.58.

LITTLE QUITTACAS STATION — Pumps 1, 2, 3.

- 10. Total pumping time for the year — 13,944 Hrs.
- 11. Total current used for the year — 5,042,881 K.W.H.
- 12. Total Pumpage for the year — 7,295,170,000 gallons.
- 13. Number of gallons pumped per K.W.H. — 1,446.

WATER REPORT

81 y

14. Number of K.W.H. required to raise one million gallons into High Hill Reservoir — 691.
15. Average cost per K.W.H. — \$.0111. Cost per K.W.H. varies in accordance with amount consumed.
- 16a. Cost per million gallons raised into High Hill Reservoir, (Pumps 1, 2, 3) — \$24.40.
- 16m. Per power only — \$7.70.
Total cost of pumping, figured on pumping station expenses, viz: \$183,260.64.
17. Per million gallons pumped \$23.79.
18. Per million gallons raised one foot (dynamic) — 13 cents.
Cost of pumping figured on total maintenance and interest on bonds (see financial CC + DD) less credits, viz: \$775,026.32.
19. Per million gallons pumped \$100.63.
20. Per million gallons raised one foot (dynamic) — 53 cents.
Cost of pumping figured on total maintenance, interest on bonds and bond payments (see financial CC + DD + EE) less credits, viz: \$920,026.32.
21. Per million gallons pumped \$219.46.
22. Per million gallons raised one foot (dynamic) — \$1.12.

STATISTICS OF CONSUMPTION OF WATER

1. Estimated total population at date (New Bedford)	104,261
Acushnet 8,500; Dartmouth 19,200	*131,961
2. Estimated population on lines of pipe	*130,000
3. Estimated population supplied	*130,000
Year July 1, 1968 through June 30, 1969	
4. Total consumption for the year	7,528,544,200
5. Passed through meters	6,889,166,600
6. Percentage of consumption metered	91.5%
7. Average daily consumption	20,626,148
8. Gallons per day to each inhabitant	*156
9. Gallons per day to each consumer	*158
10. Gallons per day to each tap (active)	*723
11. Average rate received per million gallons metered	\$145.51
12. Average rate received per million gallons consumed	\$155.11
Year January 1, 1969 through December 31, 1969	
13. Cost of supplying water, per million gallons consumed figured on total maintenance (item CC) less credits	\$94.43
14. Cost of supplying water per million gallons consumed figured on total maintenance plus interest on bonds (CC + DD) less credits	\$100.65
15. Total cost of supplying water per million gallons consumed figured on total maintenance, plus interest on bonds and bond payments (CC + DD + EE) less credits	\$119.48

* Includes population supplied in the towns of Dartmouth and Acushnet.

STATISTICS RELATING TO DISTRIBUTING SYSTEM

MAINS

1. Kind of pipe cast iron, steel and cement asbestos.
2. Sizes, from 4 inch to 48 inch.
3. Extended 15,759.1 feet during year.
4. Discontinued 11,396 feet during year.
5. Total now in use 266.8 miles.
6. Cost of ordinary maintenance per mile including flushing and inspecting gates and hydrants — \$366.87.
7. Number of leaks per mile .1049.
8. Length of pipes less than 4 inches diam. 2.09 miles.
9. Number of hydrants added during the year 35. Number of hydrants removed 27.
10. Number of hydrants public 2,200.
11. Number of stop gates added during year 129.
12. Number of stop gates now in use, 4,088.
13. Number of stop gates smaller than 4 inch, 96.
14. Number of blow offs (waste gates) 205.
15. Range of pressure on mains, 23 lbs. to 91 lbs.

SERVICES

16. Kind of pipe; lead, cast iron and copper tubing.
17. Sizes, $\frac{1}{2}$ inch to 12 inch.
18. Extended 10,578.3 feet.
19. Discontinued 7,047.31 feet.
20. Total now in use 187.4223 miles.
21. Number of service taps added during year:

New Bedford	215
Dartmouth	149
Acushnet	75
Total added	439
22. Number now laid:

New Bedford	23,704
Dartmouth	5,581
Acushnet	1,811
Total now laid	31,096
Total now in use in N. B.	21,438
23. Average length of service 41.7 ft.
24. Average cost of service for the year:

(a) Gross	\$53.58
(b) Net	(minus)
25. Number of meters to be added 127.
26. Number now in use, New Bedford only 21,048 (See Table Y)
27. Percentage of active services metered 98.1%.
28. Percentage of water receipts from metered water +100.

WATER REPORT

WATER RATES

For water supplied from Quittacas Pumping Station:

For the first 10,000 cu. ft. per quarter or 3,300 cu. ft. per month	\$2.00 per thousand cu. ft.
For the next 90,000 cu. ft. per quarter or 30,000 cu. ft. per month	\$1.75 per thousand cu. ft.
For the next 900,000 cu. ft. per quarter or 300,000 cu. ft. per month	\$1.50 per thousand cu. ft.
For the next 1,000,000 cu. ft. per quarter or 333,300 cu. ft. per month	\$1.00 per thousand cu. ft.
For all over 2,000,000 cu. ft. per quarter or 666,600 cu. ft. per month	\$.30 per thousand cu. ft.

These rates shall apply only to units of property or to the total amount of water recorded as used, by one or more meters located on the same property or premises.

METER RENTALS

(Within Basement Walls)

Size $\frac{5}{8}$ inch	\$3.00 per year
Size $\frac{3}{4}$ inch	4.00 per year
Size 1 inch	6.50 per year

In boxes, sizes over 1 inch and other special conditions, ten per cent of cost of meter and installation.

The property owner must keep the meter within his premises easily accessible for reading at all times. The owner will be held responsible for proper protection of the meter from all damage which may occur to freezing or from hot water backing from overheated house boiler or other causes.

The owner of property shall pay at the established meter rate for amount registered whether used or wasted.

Should a meter fail to register for any cause, the quantity shall be determined and the charge based on average amount registered by meter when in order.

No meter shall be disconnected from the pipe, moved or disturbed without permission from the Water Registrar who will send a properly authorized person to attend to any change needed.

If a house becomes unoccupied the owner or agent may have the water shut off and the meter removed during the period of non-occupancy by making a request therefor to the Water Department and paying one (1) dollar to cover expenses.

Zoning Change No. 71

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Seventy

AN ORDINANCE

Changing the zoning classification of property on the south side of CAMPBELL STREET, between Pleasant and Purchase Streets, from Residence B to BUSINESS

Be it ordained by the City Council of the City of New Bedford, as follows:—

SECTION 1. That all of the property bounded and described as follows:—

Beginning at a point in the south line of Campbell Street, distant westerly therein eighty-six and 45/100 (86.45) feet west from its point of intersection with the westerly line of Purchase Street;

thence southerly in the easterly line of land now or formerly belonging to Morris Katz, a distance of eighty-one and 18/100 (81.18) feet to a point in the northerly line of land now or formerly belonging to Jomar Realty, Inc.;

thence westerly in said northerly line and continuing in the northerly line of land now or formerly belonging to Morris Glaser, a distance of sixty-four and 50/100 (64.50) feet to a point at the southeasterly corner of land now or formerly belonging to Pauline Estebo;

thence northerly in the easterly line of land now or formerly belonging to Pauline Estebo, a distance of eighty and 52/100 (80.52) feet to a point in the southerly line of Campbell Street;

thence easterly in said southerly line of Campbell Street, a distance of sixty-three and 60/100 (63.60) feet to the point of beginning;

all of which is now zoned as Residence B, be reclassified and zoned Business;

all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford, is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

IN CITY COUNCIL, December 11, 1969

Passed to a second reading — Yeas 6, Nays 4.

ELLEN M. GAUGHAN, Asst. City Clerk

IN CITY COUNCIL, December 23, 1969

Laid on the table — Yeas 6, Nays 4.

ELLEN M. GAUGHAN, Asst. City Clerk

IN CITY COUNCIL, February 26, 1970

Taken from the table.

Passed to be ordained — Yeas 9, Nays 2.

ELLEN M. GAUGHAN, City Clerk

Rule 40 waived

Presented to the Mayor for approval February 27, 1970

ELLEN M. GAUGHAN, City Clerk

Returned by the Mayor after the expiration of 10 days, neither approved nor disapproved.

ELLEN M. GAUGHAN, City Clerk

A true copy, attest:

ELLEN M. GAUGHAN, City Clerk

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Seventy

AN ORDINANCE

AMENDING CHAPTER 1 OF TITLE 11 OF THE CITY CODE REGULATING THE USE OF PUBLIC AND PRIVATE SEWERS AND DRAINS, THE INSTALLATION AND CONNECTION OF BUILDING SEWERS, AND THE DISCHARGE OF WATERS AND WASTES INTO THE PUBLIC SEWER SYSTEM; AND PROVIDING PENALTIES FOR VIOLATIONS THEREOF.

Be it ordained by the City Council of the City of New Bedford as follows: —

SECTION 1. Section 11-101 of Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by adding the following after the first paragraph:

“BOD” (denoting Biochemical Oxygen Demand) shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days of 20°C, expressed in milligrams per liter.

“Building Drain” shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer, beginning ten (10) feet outside the inner face of the building wall.

“Building Sewer” shall mean the extension from the building drain to the public sewer or other place of disposal.

“Combined Sewer” shall mean a sewer receiving both surface runoff and sewage.

“Garbage” shall mean solid wastes from the domestic and commercial preparation, cooking, and dispensing of food, and from the handling, storage and sale of produce.

“Industrial Wastes” shall mean the liquid wastes from industrial manufacturing processes, trade, or business as distinct from sanitary sewage.

“Natural Outlet” shall mean any outlet into a watercourse, pond, ditch, lake, or other body of surface or groundwater.

“Person” shall mean any individual, firm, company, association, society, corporation or group.

“pH” shall mean the logarithm of the reciprocal of the weight of hydrogen ions in grams per liter of solution.

“Properly Shredded Garbage” shall mean the wastes from preparation, cooking, and dispensing of food that have been shredded to such a degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particle greater than one-half ($\frac{1}{2}$) inch (1.27 centimeters) in any dimension.

"Public Sewer" shall mean a sewer in which all owners of abutting properties have equal rights, and is controlled by public authority.

"Sanitary Sewer" shall mean a sewer which carries sewage and to which storm, surface, and groundwaters are not intentionally admitted.

"Sewage" shall mean a combination of the water-carried wastes from residences, business buildings, institutions and industrial establishments, together with such ground, surface and stormwaters as may be present.

"Sewage Treatment Plant" shall mean any arrangement of devices and structures used for treating sewage.

"Sewage Works" shall mean all facilities for collecting, pumping, treating and disposing of sewage.

"Sewer" shall mean a pipe or conduit for carrying sewage.

"Shall" is mandatory; "May" is permissive.

"Slug" shall mean any discharge of water, sewage or industrial waste which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes, more than five (5) times the average twenty-four (24) hour concentration or flows during normal operation.

"Storm Drain" (sometimes termed "Stormed Sewer") shall mean a sewer which carries storm and surface waters and drainage, but excludes sewage and industrial wastes, other than unpolluted cooling water.

"Commissioner" shall mean the Commissioner of the Department of Public Works of the City of New Bedford, or his authorized deputy, agent or representative.

"Suspended Solids" shall mean solids that either float on the surface of, or are in suspension in water, sewage or other liquids, and which are removable by laboratory filtering.

"Watercourse" shall mean a channel in which a flow of water occurs, either continuously or intermittently.

SECTION 2. Section 11-103 of Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by deleting the same and substituting in place thereof the following:

Section 11-103 Building Sewers and Connections

No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof without first obtaining a written permit from the Commissioner of the Department of Public Works.

The property owner or his agent shall make application on a special form furnished by the city. The permit application shall be supplemented by any plans, specifications or other information con-

sidered pertinent in the judgment of the Commissioner. The estimated construction cost and the entrance and inspection fees shall be paid to the city at the time the application is filed.

All costs and expense incident to the installation and connection of the building sewer shall be borne by the owner. The owner shall indemnify the city from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer. The cost of all repairs made thereon shall also be borne by the owner.

A separate and independent building sewer shall be provided for every building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one building sewer.

Old building sewers may be used in connection with new buildings only when they are found, on examination and test by the Commissioner, to meet all the requirements of this ordinance.

The size, slope, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and backfilling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the city. In the absence of code provisions or in amplification thereof the materials and procedures set forth by the Commissioner shall apply.

Whenever possible, the building sewer shall be brought to the building at an elevation below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, or other sources of surface run-off or ground water to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer. There will be no variations from the above without a written statement explaining the reason for the variation, submitted by the property owner and approved by the Commissioner.

The connection of the building sewer into the public sewer shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the city. All such connections shall be made gastight and watertight. Any deviation from the prescribed procedures and materials must be approved by the Commissioner before the installation.

The applicant for the building sewer permit shall notify the Commissioner when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the Commissioner or his representative.

All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the City.

SECTION 3. Section 11-106 of Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by deleting the same and substituting in place thereof the following:

Section 11-106 Use of the Public Sewers

No person shall discharge or cause to be discharged any storm-water, surface water, groundwater, roof run-off, subsurface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer except as provided in Section 11-103, paragraph 8.

Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as combined sewers or storm sewers, or to a natural outlet approved by the Commissioner. Industrial cooling water or unpolluted process waters may be discharged, on approval of the Commissioner, to a storm sewer, combined sewer, or natural outlet.

No person shall discharge or cause to be discharged any of the following described waters or wastes to any public sewers:

- a. Any gasoline, benzene, naphtha, fuel oil, or other flammable or explosive liquid, solid, or gas.
- b. Any waters or wastes containing toxic or poisonous solids, liquids, or gases in sufficient quantity, either singly or by interaction with other wastes, to injure or interfere with any sewage treatment process, constitute a hazard to humans or animals, create a public nuisance, or create any hazard in the receiving waters of the sewage treatment plant.
- c. Any waters or wastes having a pH lower than (5.5), or having any other corrosive property capable of causing damage or hazard to structures, equipment, and personnel of the sewage works.
- d. Solid or viscous substances in quantities or of such size capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as, but not limited to, ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, un-

ground garbage, whole blood, paunch manure, hair and fleshings, entrails, and paper dishes, cups, milk containers, etc., either whole or ground by garbage grinders.

No person shall discharge or cause to be discharged the following described substances, materials, waters, or wastes if it appears likely in the opinion of the Commissioner that such wastes can harm either the sewers, sewage treatment process, or equipment, have an adverse effect on the receiving stream, or can otherwise endanger life, limb, public property, or constitute a nuisance. In forming his opinion as to the acceptability of these wastes, the Commissioner will give consideration to such factors as the quantities of subject wastes in relation to flows and velocities in the sewers, materials of construction of the sewers, nature of the sewage treatment process, capacity of the sewage treatment plant, degree of treatability of wastes in the sewage treatment plant, and other pertinent factors. The substance prohibited are:

- a. Any liquid or vapor having a temperature higher than one hundred fifty (150)°F (65°C).
- b. Any water or waste containing fats, wax, grease, or oils, whether emulsified or not, in excess of one hundred (100) mg/1 or containing substances which may solidify or become viscous at temperatures between thirty-two (32) and one hundred fifty (150)°F (0 and 65°C).
- c. Any garbage that has not been properly shredded. The installation and operation of any garbage grinder equipped with a motor or three-fourths ($\frac{3}{4}$) horsepower (0.76 hp metric) or greater shall be subject to the review and approval of the Commissioner.
- d. Any waters or wastes containing strong acid iron pickling wastes, or concentrated plating solutions whether neutralized or not.
- e. Any waters or wastes containing iron, chromium, copper, zinc, and similar objectionable or toxic substances; or wastes exerting an excessive chlorine requirement, to such degree that any such material received in the composite sewage at the sewage treatment works exceeds the limits established by the Commissioner for such materials.
- f. Any waters or wastes containing phenols or other taste or odor producing substances, in such concentrations exceeding limits which may be established by the Commissioner as necessary, after treatment of the composite sewage to meet the requirements of the State, Federal, or other public agencies or jurisdiction for such discharge to the receiving waters.

- g. Any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the Commissioner in compliance with applicable State or Federal regulations.
- h. Any waters or wastes having a pH in excess of (9.5).
- i. Materials which exert or cause:
 - 1. Unusual concentrations of inert suspended solids (such as, but not limited to, Fullers earth, lime slurries, and lime residues) or of dissolved solids (such as, but not limited to, sodium chloride and sodium sulfate).
 - 2. Excessive discoloration (such as, but not limited to, dye wastes and vegetable tanning solutions).
 - 3. Unusual BOD, chemical oxygen demand, or chlorine requirements in such quantities as to constitute a significant load on the sewage treatment works.
 - 4. Unusual volume of flow or concentration of wastes constituting "slugs" as defined herein.
- j. Waters or wastes containing substances which are not amenable to treatment or reduction by the sewage treatment processes employed, or are amenable to treatment only to such degree that the sewage treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.

If any waters or wastes are discharged, or are proposed to be discharged to the public sewers, which waters contain the substances or possess the characteristics enumerated above and which in the judgment of the Commissioner, may have a deleterious effect upon the sewage works, processes, equipment, or receiving waters, or which otherwise create a hazard to life or constitute a public nuisance, the Commissioner may:

- a. Reject the wastes,
- b. Require pretreatment to an acceptable condition for discharge to the public sewers,
- c. Require control over the quantities and rates of discharge, and/or,
- d. Require payment to cover the added cost of handling and treating the wastes not covered by existing taxes or sewer charges under the provisions of the last paragraph of this section.

If the Commissioner permits the pretreatment or equalization of waste flows, the design and installation of the plants and equipment shall be subject to the review and approval of the Commissioner, and subject to the requirements of all applicable codes, ordinances, and laws.

Grease, oil, and sand interceptors shall be provided when, in the opinion of the Commissioner, they are necessary for the proper handling of liquid wastes containing grease in excessive amounts, or any flammable wastes, sand, or other harmful ingredients; except that such interceptors shall not be required for private living quarters or dwelling units. All interceptors shall be of a type and capacity approved by the Commissioner and shall be located as to be readily and easily accessible for cleaning and inspection.

Where preliminary treatment or flow-equalizing facilities are provided for any waters or wastes, they shall be maintained continuously in satisfactory and effective operation by the owner at his expense.

When required by the Commissioner, the owner of any property serviced by a building sewer shall install a suitable control manhole together with such necessary meters, and other appurtenances in the building sewer to facilitate observation, sampling, and measurement of the wastes. Such manhole, when required, shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the Commissioner. The manhole and equipment shall be installed by the owner at his expense, and shall be maintained by him so as to be safe, accessible, and in good working condition at all times.

All measurements, tests, and analyses of the characteristics of waters and wastes to which reference is made in this ordinance shall be determined in accordance with the latest edition of "Standard Methods for the Examination of Water and Wastewater", published by the American Public Health Association, and shall be determined at the control manhole provided, or upon suitable samples taken at said control manhole. In the event that no special manhole has been required, the control manhole shall be considered to be the nearest downstream manhole in the public sewer to the point at which the building sewer is connected. Sampling shall be carried out by customarily accepted methods to reflect the effect of constituents upon the sewage works and to determine the existence of hazards to life, limb, and property. (The particular analyses involved will determine whether a twenty-four (24) hour composite of all outfalls of a premise is appropriate or whether a grab sample or samples should be taken. Normally, but not always, BOD and suspended solids analyses are obtained from 24-hour composites of all outfalls whereas pH's are determined from periodic grab samples.)

No statement contained in this article shall be construed as preventing any special agreement or arrangement between the city and any industrial concern whereby an industrial waste of unusual strength or character may be accepted by the city for treatment, subject to payment therefor, by the industrial concern.

SECTION 4. Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by adding the following section:

Section 11-111 Protection from Damage

No unauthorized person shall maliciously, willfully, or negligently break, damage, destroy, uncover, deface, or tamper with any structure, appurtenance, or equipment which is a part of the sewage works. Any person violating this provision shall be subject to immediate arrest under charge of disorderly conduct.

SECTION 5. Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by adding the following section:

Section 11-112 Powers and Authority of Inspectors

The Commissioner and other duly authorized employees of the city bearing proper credentials and identification shall be permitted to enter all properties for the purposes of inspection, observation, measurement, sampling, and testing in accordance with the provisions of this ordinance. The Commissioner or his representatives shall have no authority to inquire into any processes including metallurgical, chemical, oil, refining, ceramic, paper, or other industries beyond that point having a direct bearing on the kind and source of discharge to the sewers or waterways or facilities for wastes treatment.

While performing the necessary work on private properties referred to in the first paragraph of this section, the Commissioner or duly authorized employees of the city shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the city employees and the city shall indemnify the company against loss or damage to its property by city employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the gauging and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions as required in Section 11-106, paragraph 9.

The Commissioner and other duly authorized employees of the city bearing proper credentials and identification shall be permitted to enter all private properties through which the city holds a duly negotiated easement for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the sewage works lying within said easement. All entry and subsequent work if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

SECTION 6. Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by adding the following section:

Section 11-113 Penalties

Any person found to be violating any provision of this ordinance except Section 11-111 shall be served by the city with written notice stating the nature of the violation and providing a reasonable time limit for the satisfactory correction thereof. The offender shall, within the period of time stated in such notice, permanently cease all violations.

Any person who shall continue any violation beyond the time limit provided for in Section 11-113, paragraph 1, shall be guilty of a misdemeanor, and on conviction thereof shall be fined in the amount not exceeding twenty (\$20.00) dollars for each violation. Each day in which any violation shall continue shall be deemed a separate offense.

Any person violating any of the provisions of this ordinance shall become liable to the city for any expense, loss, or damage occasioned the city by reason of such violation.

SECTION 7. Chapter 1 of Title 11 of the Code of the City of New Bedford is hereby amended by adding the following section:

Section 11-114 Validity

The invalidity of any section, clause, sentence, or provision of this ordinance shall not affect the validity of any other part of this ordinance which can be given effect without such invalid part or parts.

SECTION 8. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

REGULATING THE FUNDING OF NEW PROGRAMS

Be it ordained by the City Council of the City of New Bedford,
as follows:—

SECTION 1. Chapter 1 of Title 1 of the Code of the City of New Bedford is hereby amended by adding a new section to be known as Section 1-108A which shall read as follows:

Section 1-108A Funding of New Programs

Any orders, programs or legislation requiring new or increased expenditures of city funds submitted by the Mayor to the City Council shall have printed thereon or attached thereto as an appendix an explanatory statement, and an estimate of the amount of city funds required to make its provisions effective, and the prospective source of said funds. This estimate shall set forth the amount of funds for the first full year of operation, and the prospective amount of funds which will be expended in the fifth year of operations as closely as said amounts can be determined.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Zoning Change No. 72

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Seventy

AN ORDINANCE

Extending the existing Business Zone of property at the northeast corner of COVE ROAD and CRAPO STREET, northerly to SCOTT STREET, changing the zoning classification of the property from Residence C to Business

Be it ordained by the City Council of the City of New Bedford, as follows:—

SECTION 1. That all of the property bounded and described as follows:

Beginning at the point of intersection of the southerly line of Scott Street and the easterly line of Crapo Street;

thence easterly in said southerly line of Scott Street, a distance of eighty-seven and $61/100$ (87.61) feet to a point at the north-westerly corner of land now or formerly belonging to Mario G. and Maria A. Oliveira;

thence southerly in the westerly line of said land, a distance of forty-three and $21/100$ (43.21) feet to a point in the northerly line of an existing Business Zone on the north side of Cove Road;

thence westerly in the northerly line of said Business Zone, a distance of eighty-six and $85/100$ (86.85) feet to a point in the easterly line of Crapo Street;

thence northerly in said easterly line of Crapo Street, a distance of thirty-six and $92/100$ (36.92) feet to the point of beginning;

all of which is now zoned as Residence C, be reclassified and zoned Business;

all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Zoning Change No. 75**CITY OF NEW BEDFORD**

In the Year One Thousand Nine Hundred and Seventy

AN ORDINANCE

Changing the zoning classification of property on the west side of SIXTH STREET, between School and Walnut Streets, from Residence A to Business.

Be it ordained by the City Council of the City of New Bedford, as follows:—

SECTION 1. That all of the property bounded and described, as follows:

Beginning at a point in the westerly line of Sixth Street distant northerly therein one hundred seven (107) feet more or less from the northerly line of Walnut Street;

thence continuing northerly in said westerly line of Sixth Street a distance of eighty-six and 50/100 (86.50) feet more or less to a point, said point being the southeast corner of land now or formerly belonging to New Bedford Lodge No. 73, Benevolent and Protective Order of Elks;

thence westerly in the southerly line of said Elks land, a distance of one hundred seven and 55/100 (107.55) feet more or less to a point, said point being in the easterly line of land now or formerly belonging to Walter F. and Ruth C. Martin;

thence southerly in said easterly line of Martin land and in the easterly line of land now or formerly belonging to Edward and Irene Fielding, a distance of eighty-six (86) feet more or less to a point, said point being in a northerly line of land now or formerly belonging to Frank Moniz, Jr. and Edward R. Machado;

thence easterly in said northerly line of Machado land and in the northerly line of land now or formerly belonging to Roland R. E. and Leona P. Dumas, a distance of one hundred six and 83/100 (106.83) feet more or less to the point of beginning.

all of which is now zoned as Residence A, be reclassified and zoned BUSINESS:

all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

Zoning Change No. 76

CITY OF NEW BEDFORD

In the Year One Thousand Nine Hundred and Seventy

AN ORDINANCE

Extending the existing Business Zone of property at the northeast corner of CHURCH STREET and TARKILN HILL ROAD

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. That all of the property bounded and described as follows:

Beginning at a point of intersection of the northerly line of Tarkiln Hill Road and the easterly limit of an existing Business Zone located at the northeasterly corner of Tarkiln Hill Road and Church Street,

thence northerly in the easterly line of said existing Business Zone, a distance of ninety-five (95) feet more or less to a point at the northeasterly corner of said existing Business Zone,

thence westerly in the northerly line of said existing Business Zone, a distance of fifty (50) feet more or less to a point in the easterly line of Church Street,

thence northerly in the easterly line of Church Street, a distance of thirty-five (35) feet more or less to a point at the south-westerly corner of land now or formerly belonging to Edwin M. and Mary T. Sitarz,

thence easterly in the southerly line of said land, a distance of ninety-five (95) feet more or less to a point in the westerly line of land now or formerly belonging to Andrew and Clara Cotoia,

thence southerly in the westerly line of said land, a distance of ninety-three and 43/100 (93.43) feet to a point in the northerly line of Tarkiln Hill Road,

thence westerly in said northerly line of Tarkiln Hill Road, a distance of fifty-five (55) feet more or less to the point of beginning,

all of which is now zoned as Residence B, be reclassified and zoned Business;

all as shown on a plan on file in the Office of the City Clerk; and, the Zoning Map adopted as part of Section 9-201 of the Code of the City of New Bedford is hereby amended to conform with said reclassification.

SECTION 2. This Ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

ESTABLISHING THE TIME OF REGULAR CITY
COUNCIL MEETINGS

Be it ordained by the City Council of the City of New Bedford,
as follows:

SECTION 1. That the provisions of Title 2, Chapter 1, Section 2-106 (second paragraph) of the Code of the City of New Bedford, as most recently amended June 10, 1968, be and the same are hereby amended by striking out in the third sentence of said Section 2-106 (second paragraph) the figures "7:45" and inserting in place thereof the figure "7:00", so that as amended said section shall read as follows:—

Sec.2-106 (second paragraph)

All other regular meetings of the City Council, except those designated in the next paragraph, shall be held in the City Council Chambers, Municipal Building, at 7:00 o'clock in the evening of the second and fourth Thursday of each month from the second Thursday of January to and including the fourth Thursday of June and from the second Thursday in September to and including the fourth Thursday in December, provided, however, that when a regular meeting day falls on a holiday, the Tuesday immediately preceding shall be the date for said meeting.

SECTION 2. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the General Laws (Ter. Ed.).

AN ORDINANCE

TRANSFERRING THE DUTIES AND RESPONSIBILITIES OF THE COLLECTION AND DISPOSAL OF GARBAGE AND BURNABLE REFUSE FROM THE BOARD OF HEALTH TO THE COMMISSIONER OF PUBLIC WORKS.

Be it ordained by the City Council of the City of New Bedford as follows:—

SECTION 1. Section 11-202 of the City Code is hereby amended by deleting the words "board of health" wherever they appear and substituting therefor the words "commissioner of public works", so that said Section 11-202 shall read as follows:

Sec. 11-202 Collection of Garbage; — Commissioner of Public Works

The commissioner of public works shall exercise general control over the collection and disposal of garbage, refuse, offal and rubbish; the superintendent of the garbage disposal plant under the rules and regulations of the commissioner of public works shall supervise and direct the collection and disposal of garbage, refuse, offal and rubbish.

SECTION 2. Section 11-208 of the City Code is hereby deleted.

SECTION 3. Section 3-302 of the City Code is hereby amended by deleting the third and fourth sentences and inserting in place thereof the following:

"He shall have charge of the collection and disposal of ashes, trash, garbage, refuse, and rubbish, and shall exercise general control over the maintenance of streets and sewers; he shall perform the duties of tree warden and forester and have the care and control of all public shade trees and the planting, trimming and cutting thereof except so far as is otherwise required by statute. He shall be empowered to adopt rules for the control of the storage, collection, transportation and disposal of all garbage, burnable and non-burnable material, rubbish, refuse, ashes, trash or waste matter. He shall perform such other duties as are consistent to his office.

SECTION 4. Title 11, Chapter 2 of the City Code is hereby amended by adding thereto the following new section:

Sec. 11-211 Authority of Board of Health

Nothing herein shall abridge the authority of the Board of Health to issue regulations pertaining to nuisances, sources of filth, and causes of sickness which may be, in the opinion of the Board of Health, injurious to public health under Chapter 111 of the General Laws.

SECTION 5. This ordinance shall take effect in accordance with the provisions of Chapter 43 of the Massachusetts General Laws (Ter. Ed.).
